

Sistema per serramenti  
a battente a taglio  
termico

PLANET **72** *plus*  
MATIC **72** *plus*  
PLANET **72** *Hi plus*

[alsistem.com](http://alsistem.com)

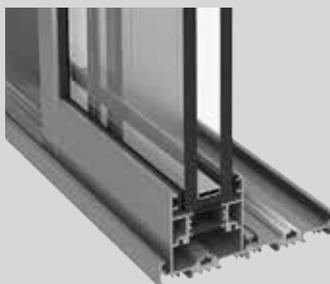

## Sistemi a design minimale

**3G**  
SYSTEM REVOLUTION

Sistema per serramenti a taglio termico con tripla guarnizione dal design minimale con nodo laterale di 75mm

*Minimal design system for thermal break frames with triple rebate sealing system. Architectural show lateral section 75mm*

**panoramico**

Sistema scorrevole dal design minimale, con nodo centrale di 30mm

*Minimal design sliding system. Architectural show central section 30mm*

## Sistemi a battente

**PLANET 45**

Sistema per serramenti non isolati ad elevata ermeticità

*Weatherproof European chamber non-insulated window and door systems*

**PLANET 50** g00000  
**62** g00000  
**72** g00000  
**NEJ** g00000

Sistema a taglio termico per serramenti con eccellenti valori termici, acustici e fisico meccanici

*Planet top-range thermal break system with excellent thermal- and acoustic-proofness and physical-mechanical properties*

**MATIC 50** g00000  
**62** g00000  
**72** g00000

Sistemi a taglio termico per serramenti con ferramenta perimetrale ed elevate prestazioni termiche ed acustiche

*Thermal break systems with perimeter hardware for high-performance thermal and acoustic-proof windows and doors*

## Sistemi oscuranti

**PLANET 45** g00000  
**venere** PRO

Persiane in alluminio a con sistema di tenuta a doppio battente ed esclusivo sistema orientabile Venere Pro

*European chamber aluminum shutters with double rebated sealing and unique Venere Pro pivot system*

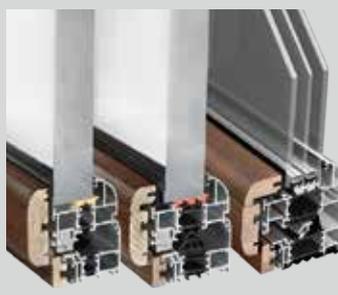

## Sistemi a battente alluminio-legno

**NATHURA 59**

Sistema alluminio/legno per serramenti non isolati ad elevata ermeticità

*Aluminum/wood system for weatherproof, non-insulated window and door frames*

**NATHURA 70** g00000  
**82** g00000  
**92** g00000

Sistemi alluminio/legno a taglio termico con ferramenta perimetrale ed elevatissime prestazioni di isolamento termico

*Aluminum/wood thermal break systems with perimeter hardware and extra high-performance thermal insulation*

## Sistemi scorrevoli e alzanti alluminio-legno

**SLIDE WOOD 160**

Sistema scorrevole alzante a taglio termico alluminio-legno con valori eccellenti di trasmittanza termica, tenuta all'acqua, di portata e sicurezza all'effrazione

*Sliding thermal break system, aluminum-wood, with excellent ratings of thermal transmittance, water sealing, load-bearing and anti-intrusion*

**TOP SLIDE WOOD 214**

Sistema a taglio termico alluminio-legno per serramenti alzanti di elevate dimensioni e peso

*Thermal break system, aluminum-wood, for large-size and heavyweight lift-and-slide window and door frames*

## Traccia per capitolato

Infissi in alluminio realizzati con la serie taglio termico Planet 72 PLUS con sistema di tenuta a giunto aperto con pinna centrale di forma tubolare e materiale coestruso, espanso/compatto. I profilati sono estrusi in lega di alluminio 6060 (EN 573.3), stato di fornitura T5 e T6 conformi alla norma EN 755.2 con tolleranze dimensionali e spessori conformi alla norma UNI12020-2 : 2001. Lega secondo la formula ALSistem. L'isolamento termico sarà costituito da barrette esclusivamente tubolari a doppia camera da 38 mm in poliammide 6.6 rinforzato al 25% con fibre di vetro, l'assemblaggio delle barrette avverrà a mezzo di rullatura meccanica computerizzata, e le caratteristiche meccaniche delle barrette dovranno rimanere inalterate sino ad una temperatura massima di trattamento di 245°C.

Il processo di produzione è controllato secondo le norme UAETC, i valori di scorrimento dovranno essere superiori ai 24 daN/mm. Il telaio fisso avrà profondità 72mm mentre le parti apribili avranno una profondità di 80mm. Il sistema di tenuta sarà a giunto aperto con guarnizione centrale, in EPDM, avente un'aletta di tenuta che sormonta di 4,5mm il piano inclinato della parte apribile, la guarnizione centrale dovrà essere raccordata nei giunti con gli opportuni angoli vulcanizzati. I profili avranno linee dritte o arrotondate internamente ed esternamente con la possibilità di accogliere soluzioni di fermavetri con taglio a 45° oppure 90°; nel caso di taglio a 90° con fermavetri arrotondati si potranno utilizzare gli appositi angoli di raccordo in alluminio pressofuso. La sigillatura dei vetri dovrà avvenire secondo le indicazioni riportate nel catalogo e solo ed esclusivamente con guarnizioni fermavetro originali. Appositi fori di drenaggio dovranno essere previsti sul telaio fisso e su quello mobile al fine di permettere il corretto drenaggio del serramento. La scelta dei profili sarà in funzione delle caratteristiche geometriche e dimensionali dell'infisso, della portata degli accessori e dei carichi di esercizio. Gli accessori utilizzati nella fabbricazione delle diverse tipologie dovranno essere solo ed esclusivamente quelli originali studiati appositamente per il sistema, riportati a catalogo e distribuiti dai licenziatari ALSistem, l'utilizzo di prodotti diversi da quelli indicati oppure il montaggio parziale o scorretto degli stessi comporterà la nullità dei certificati di prova e garanzia. La fabbricazione e la posa dovranno avvenire secondo i criteri di lavoro indicati da ALSistem. L'assemblaggio dei profili avverrà con squadrette in alluminio pressofuso multifunzione, i tagli dovranno essere protetti a mezzo sigillanti neutri.

La protezione e finitura dei profilati avverrà a mezzo dei normali trattamenti di superficie, ossidazione anodica conforme al marchio di qualità "Qualanod" oppure a mezzo di verniciatura con polveri poliesteri termoindurenti e polimerizzate in forno a temperature comprese tra 185°C e 195°C, in conformità del marchio di qualità "Qualicoat". La posa dovrà avvenire secondo i criteri disciplinati nel protocollo Thermoposa.

## Materiali

L'esecuzione dei serramenti è in lega d'alluminio EN AW 6060 sotto forma di profilati estrusi come indicato dalla disposizione normativa EN 755.3. Lo stato di fornitura è in classe T5 e T6 secondo norma EN 755.2. Le tolleranze dimensionali sono conformi alla UNI 12020-2 : 2001. Lega secondo la formula ALSistem.

## Caratteristiche tecniche e dimensionali

Aspetto visivo esterno: complanare

Aspetto visivo interno: complanare o sormonto di 8mm

Profilati: estrusi in lega leggera 6060 (UNI35690TA) anodizzabili e verniciabili

Sistema di tenuta: giunto aperto con precamera o doppia battuta, con guarnizioni in EPDM

Sistema di isolamento termico: realizzato con distanziali in poliammide da 38mm a forma tubolare

Sistema di accessori: originali ALSistem

Distanza telaio anta: 11.5mm

Sovrapposizione battuta anta su telaio: 6mm

Altezza battuta vetro: 22mm

Fuga tra i profili: 5mm

Profondità telaio: 72mm/77mm

Profondità anta: 80mm

Tubolarità profili finestra: 15mm

Tubolarità profili porta: 36.4mm

Fissaggio vetri: con fermavetri lisci, raggiati, smussati o modanati

Spazio vetro o pannello nei telai fissi: da 27mm a 65mm

Spazio vetro o pannello nelle ante: da 27mm a 73mm

## Protezione superficiale

La protezione dei profilati potrà essere effettuata mediante ossidazione anodica con classe di spessore >15 micron, come da norma UNI4522/00 (66-70), oppure mediante verniciatura a polveri poliesteri termoindurenti e polimerizzate in forno nel rispetto delle procedure di qualità "Quali-coat" e delle disposizioni UNI EN 12206-1.

## Resistenza della finitura

La finitura superficiale non deve subire corrosioni o alterazioni di aspetto per un periodo di tempo adeguato alla vita del manufatto. Le caratteristiche sufficienti per assicurarne il comportamento in funzione del tipo di ambiente sono specificate dalle norme UNI4522/00 per l'ossidazione e UNI EN 12206-1 per la verniciatura, ricordando che i principali fattori che influiscono sulla resistenza all'ambiente sono la vicinanza al mare, l'inquinamento atmosferico, la manutenzione e la pulizia anche dalla pioggia.

## Sicurezza

Al fine di non causare danni fisici o lesioni agli utenti, i serramenti devono essere concepiti secondo le prescrizioni della normativa in materia di sicurezza D.Lgs. 81/2008 e UNI 7697-07 ed il "Manuale uso e Manutenzione" dei serramenti e schermi oscuranti.

## Caratteristiche della vetratura

La scelta della vetratura deve essere effettuata secondo criteri prestazionali per rispondere ai requisiti di risparmio energetico, isolamento acustico, controllo della radiazione solare, sicurezza. Riferimento norme: UNI EN ISO 140-3:06, UNI6534:74, UNI EN 572-1:04, UNI EN 12758:04, UNI EN 12150-1:01, UNI 7143:72 DM 2 Aprile 1998, Legge 90/2013 e dei Requisiti Minimi.

## Guarnizioni

Le guarnizioni dovranno essere esclusivamente quelle originali studiate per il sistema, a garanzia delle prestazioni dello stesso e rispondenti alle norme di riferimento UNI 3952:98, UNI 12365:05.

## Sigillanti

I sigillanti devono corrispondere a quanto prescritto dalle norme di riferimento UNI EN ISO 11600:04. Tali materiali non devono corrodere le parti in alluminio e sue leghe con cui vengono a contatto, pertanto dovranno essere neutri.

## Accessori

Gli accessori dovranno essere quelli originali prodotti per la serie e rispondenti ai criteri indicati nelle norme UNI e alle disposizioni normative in materia di sicurezza D.Lgs. 81/2008.

## Prestazioni

La serie Planet 72 PLUS risponde ai requisiti della norma UNI EN 12207:00, UNI EN 12208:00, UNI EN 12210:00.

## Resistenza meccanica

Il sistema e gli accessori saranno resistenti alle sollecitazioni d'uso secondo i limiti stabiliti dalle norme UNI 12365:05.

## Isolamento acustico

La scelta della classe di isolamento acustico di un serramento va correlata alla destinazione d'uso del locale nel quale l'infisso dovrà essere inserito ed al livello del rumore esterno; il comportamento del serramento in opera è influenzato da fattori che non è possibile definire a priori (h dal suolo, orientamento delle sorgenti sonore, ecc...). Il potere fonoisolante potrà essere quindi stimato con buona approssimazione, in base alla permeabilità all'aria del serramento con un minimo di valore di permeabilità pari a 2, ed al potere fonoisolante del vetro. Secondo la metodologia descritta nella norma di riferimento UNI EN ISO 140-3:06.

## Isolamento termico

La scelta delle prestazioni di isolamento termico deve essere operata in base alle esigenze di risparmio energetico secondo la legge 10/91 e DL.192/05 e aggiornamento DL.311/06 ed alle esigenze di benessere ambientale o riferimento alla norma UNI EN ISO 10077-1:07. Si può calcolare la trasmittanza termica del serramento a partire dai valori di trasmittanza dei profili e delle superfici secondo norma UNI EN ISO 10077-1:07 con la formula:

$$U_w = (A_g \cdot U_g + A_f \cdot U_f + I_g \cdot \psi) \div (A_g + A_f)$$

## Certificazioni

Sarà possibile richiedere al costruttore dei serramenti o, in mancanza, al produttore dei profilati, fotocopia dei rapporti di prova relative a determinate prestazioni.

## Marcatura CE UNI EN 14351-1

La marcatura CE è OBBLIGATORIA e costituisce il sistema al quale tutti i Costruttori di serramenti devono uniformarsi per poter vendere i propri prodotti nell'Unione Europea. Spetta al Costruttore, o al suo rappresentante, con sede nella EEA [Area Economica Europea] la responsabilità di apporre la marcatura CE sul prodotto, su un'etichetta applicata al prodotto, sul suo imballaggio o sui documenti commerciali di accompagnamento.

La norma UNI EN 14351-1 si applica alle finestre, porte finestre, alle porte pedonali esterne, alle porte esterne sulle vie di fuga, alle finestre da tetto/lucernari (incluse quelle resistenti al fuoco proveniente dall'esterno), alle finestre a nastro, alle finestre accoppiate e alle finestre doppie. Tali serramenti possono essere a una o più ante, con ante mobili e parti fisse, con apertura verso l'interno o verso l'esterno, a movimentazione manuale oppure automatizzata, interamente oppure parzialmente vetrati, con o senza telaio di contenimento della vetratura, con o senza dispositivi di schermatura incorporati.

La norma UNI EN 14351-1 non è applicabile a:

- finestre, portefinestre e porte pedonali con caratteristiche di resistenza al fuoco e tenuta al fumo
- alle porte interne (EN 14351-2)
- alle chiusure oscuranti esterne (UNI EN 13659)
- alle porte girevoli
- alle finestre poste sulle vie di fuga

La norma contempla determinati requisiti volontari e/o obbligatori:

- Tenuta all'acqua
- Rilascio di sostanze pericolose
- Resistenza all'urto
- Resistenza al vento
- Capacità portante dei dispositivi di sicurezza
- Isolamento acustico
- Isolamento termico
- Proprietà radianti delle vetrazioni (trasmissione Luminosa)
- Permeabilità all'aria

## Piano di Controllo di Produzione (FPC)

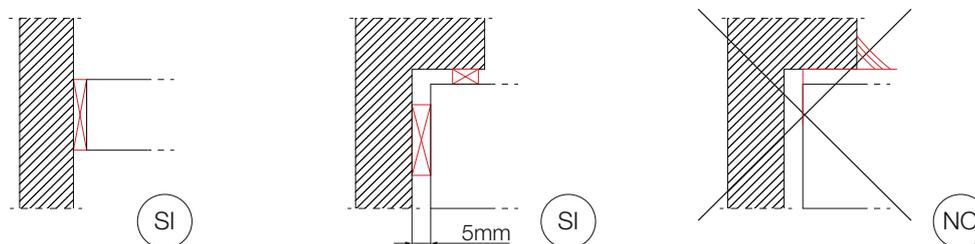

Il controllo di produzione in fabbrica è un sistema esercitato dal costruttore sotto propria responsabilità, al fine di assicurare che le caratteristiche costruttive del prodotto siano mantenute nel tempo entro certi limiti. Il costruttore dovrà stabilire delle procedure documentate, che indichino le modalità che, il personale addetto ai vari controlli, dovrà effettuare per monitorare con frequenza ed esattezza il processo assegnatogli. Il costruttore è tenuto a garantire la rintracciabilità del prodotto attraverso l'uso di codici o altro. Mediante uno schema, il produttore è inoltre tenuto a comunicare al committente indicazioni circa l'utilizzo, la movimentazione, l'installazione, la manutenzione e pulizia del prodotto. Non sono invece analizzate le caratteristiche dell'installazione ma suggeriamo caldamente di fare riferimento alle indicazioni riportate sui nostri manuali di posa Thermoposa.

## Test di Laboratorio (ITT)

Il controllo di produzione in fabbrica è un sistema esercitato dal costruttore sotto propria responsabilità, al fine di assicurare che le caratteristiche costruttive del prodotto siano mantenute nel tempo entro certi limiti. Il costruttore dovrà stabilire delle procedure documentate, che indichino le modalità che, il personale addetto ai vari controlli, dovrà effettuare per monitorare con frequenza ed esattezza il processo assegnatogli. Il costruttore è tenuto a garantire la rintracciabilità del prodotto attraverso l'uso di codici o altro. Mediante uno schema, il produttore è inoltre tenuto a comunicare al committente indicazioni circa l'utilizzo, la movimentazione, l'installazione, la manutenzione e pulizia del prodotto. Non sono invece analizzate le caratteristiche dell'installazione. Ma suggeriamo caldamente di fare riferimento alle indicazioni riportate sui nostri manuali di posa "Thermoposa".

## Posa in opera

E' molto importante, per ottenere un buon funzionamento del serramento, curare scrupolosamente la verticalità e il livellamento dell'infisso, dopodiché eseguire la sigillatura usando nastri autoespandenti Thermoposa seguendo i consigli dell'esempio sotto riportato, Controllare inoltre che le aperture siano caricate sufficientemente ( spessorando il vetro di 1-2 mm fuori quadro ), affinché, con l'assestamento dei materiali, non si verifichino delle intolleranze di funzionamento nel tempo.

Inoltre, fondamentale è posare il serramento in modo corretto; per questo ALSistem consiglia di utilizzare il sistema **Thermoposa** con il quale si garantisce un sistema di posa del serramento ad alta efficienza termo-acustica. Grazie a questo sistema garantiamo l'adeguato isolamento del foro finestra ed un efficiente messa in opera del serramento nelle nuove costruzioni e nelle ristrutturazioni. Sono pertanto consigliati 3 principali interventi: corretta posa in opera del serramento, coibentazione del cassonetto, quando presente, taglio del marmo, se passante. Per maggiori indicazioni invitiamo a collegarsi a [Thermoposa.com](http://Thermoposa.com).

## Manutenzione delle superfici in alluminio

A seguito dei forti tassi di inquinamento oramai raggiunti in tutti i paesi, specialmente nei grossi centri urbani e nelle zone costiere battute dal vento marino, è molto importante che le superfici in alluminio, a contatto con l'atmosfera, siano periodicamente pulite. Il nostro intento è quello di sensibilizzare il costruttore dei serramenti affinché possa di riflesso consigliare IL CLIENTE nel migliore dei modi.

E' buona norma tenere in considerazione 3 punti fondamentali:

- 1- quante volte deve essere eseguita l'operazione di pulizia nell'arco dell'anno
- 2- il periodo
- 3- il prodotto da usare

Ecco le risposte:

Il numero di interventi viene stabilito sulla base dello stato di inquinamento della zona in cui è ubicato il caseggiato, varia da 1 a 3 volte l'anno.

Il periodo può essere:

- a fine inverno
- a metà estate
- a metà autunno da scegliere a seconda del numero di interventi

Il prodotto per la pulizia è importante che sia neutro, un prodotto sbagliato potrebbe rovinare i materiali di diversa natura di cui è composto un serramento, ( guarnizioni, sigillanti, marmi, ecc..... ) e causare danni che potrebbero compromettere la funzionalità e la durata nel tempo dello stesso.

Le caratteristiche di tali prodotti assieme alla frequenza di pulizia da adottare sono definite nei progetti di norma UNIMET12.04.270 ed E12.04.277.0.

In mancanza di un prodotto neutro è preferibile utilizzare acqua tiepida con un panno non abrasivo.

Per una corretta installazione, manutenzione e pulizia dei serramenti, vi invitiamo inoltre a consultare le prescrizioni riportate sulle seguenti note tecniche Uncaal, UX 42 guida alla posa in opera delle finestre ed UX 10 pulizia delle superfici di serramenti e facciate continue.

## Fasi di verniciatura

1. Il ciclo di verniciatura offre la possibilità di ottenere sugli infissi un eccellente rivestimento protettivo superficiale ed una maggiore vivacità del colore;

2. lo strato deve avere uno spessore min. di 60 micron sulle parti a vista;

3. il materiale sarà sottoposto al seguente processo:

- sgrassatura senza attacco
- lavaggio
- decapaggio alcalino con attacco
- lavaggio
- disossidazione
- lavaggio
- cromatazione
- lavaggio in acqua demineralizzata
- asciugatura a 75°C
- verniciatura in polveri termoindurenti
- polimerizzazione in forno

Tutte le lavorazioni eseguite su alluminio devono essere conformi a quanto previsto dal marchio di qualità Qualicoat®.

## Fasi di anodizzazione

1. Lo strato ossido può variare secondo la zona di ubicazione del serramento da 15 a 20 micron (UNI4522-66);

2. può essere normale o elettrocolore;

3. il materiale sarà sottoposto al seguente processo:

- sgrassatura senza attacco
- lavaggio
- decapaggio alcalino con attacco (tranne le finiture lucide)
- lavaggio
- disossidazione
- lavaggio
- ossidazione in bagno acido solforico a 18/20°C, densità della corrosione 1,5[A]dmq
- colorazioni inorganiche od organiche od elettrocolore (tranne argento)
- lavaggio doppio
- asciugatura
- fase di fissaggio a caldo in ebollizione a Sali di nichel, fissaggio 2,5/3 minuti per ogni micron di spessore

## Osservazione

Nella fase preventiva il progettista o il serramentista dovrà determinare il tipo di serramento da impiegare sulla base degli elementi forniti dal committente. Nella scelta o controllo si dovrà considerare, sulla base della pressione del vento, il momento d'inerzia necessario e scegliere il profilato occorrente nella gamma Planet. Ovviamente dovranno essere utilizzati adeguati accessori, tra quelli originali ALSistem, predisposti per le serie Planet.

## Dimensione e pesi profilati

Le dimensioni e i pesi indicati sui disegni dei profilati a catalogo sono quelli teorici e possono variare in funzione delle tolleranze dimensionali di estrusione (Norme UNI EN 12020-02) e dal tipo di finitura. Anche la verniciatura, contribuisce ad aumentare gli spessori riducendo pertanto le sedi di inserimento delle guarnizioni e degli accessori. Questa variabilità potrebbe condizionare le dimensioni del taglio e di conseguenza quelle del serramento finito. Le differenze di taglio potranno aumentare in modo proporzionale anche in base al numero di ante per serramento. Si consiglia, nei primi lavori o in quelli con quantità importanti, di realizzare un campione reale per verificarne il corretto funzionamento.

## Dimensioni taglio

Le dimensioni teoriche di taglio indicate nel presente catalogo si dovranno modificare in funzione della tipologia e sulla base della precisione della macchina di taglio che si sta utilizzando, (ad es. per porte a 2 ante ap.est. con maniglione antipanico, la fuga dovrà essere 8mm anziché 5mm; le finestre a 3 e 4 ante e le finestre di misure ridotte dovranno avere le ante più strette del teorico, di almeno 0,5mm ogni traverso, per evitare interferenze sulla rotazione, ecc...).

## Consigli per un corretto assemblaggio

Per ottenere i migliori risultati utilizzando i profili Planet si consiglia di osservare attentamente tutte le voci di seguito riportate, atte a rinforzare tutti i punti deboli di una finestra comune, ottimizzando così le prestazioni offerte dal serramento.

Procedura corretta	Obiettivo
sigillare i profili tra loro nel giunto a 45°	evita infiltrazioni d'acqua evita la corrosione e l'ossidazione
sigillare i profili sul montante quando gli stessi vengono intestati	evita infiltrazioni d'acqua evita la corrosione e l'ossidazione
utilizzare la guarnizione giunto aperto sulla soglia anche nella soluzione doppia battuta	facilita l'evacuazione dell'acqua
utilizzare l'angolo vulcanizzato della guarnizione di battuta centrale	aumenta la permeabilità all'aria aumenta la tenuta all'acqua
utilizzare l'angolo vulcanizzato della guarnizione di battuta interna	aumenta la permeabilità all'aria e migliora la finitura dell'infisso
usare curve limite di utilizzo per la scelta del profilo	evita scelte inadeguate del profilo
sigillare il serramento sul perimetro tra profilo e controtelaio con sigillante BG1 seguendo le indicazioni contenute nel programma Thermoposa®	evita infiltrazioni d'acqua e garantisce il giunto primario per 10 anni
utilizzare sempre il tassello di registro e le turboviti per il fissaggio	facilita la posa in opera, inquadra meglio il telaio, isola i materiali e limita la trasmissione delle vibrazioni, garantisce solidità e sicurezza nel tempo
proteggere tutte le lavorazioni effettuate sui profilati	evita la corrosione e l'ossidazione facendo aumentare la durata dell'infisso nel tempo
per infissi con aperture antipanico usare profili maggiorati	facilita l'applicazione degli accessori
utilizzare controsagome durante il taglio a 45°	garantisce un taglio corretto al fine di ottenere una giunzione d'angolo perfetta
utilizzare squadrette multifunzione	garantisce giunzioni di alta qualità e robuste nel tempo

## Certificazione accessori

I prodotti in alluminio verniciato sono certificati secondo le specifiche tecniche del: **QUALICOAT**

I prodotti in alluminio anodizzato sono certificati secondo le specifiche tecniche del: **EURAS EWAA QUALANOD**

Gli accessori per le gamme Planet sono prodotti da aziende certificate ISO9001 e ISO14001

## Importante

Tutti i dati esposti in questo catalogo sono puramente indicativi e non impegnano in nessun modo la società la quale si riserva la possibilità di portare migliorie ai suoi prodotti in qualunque momento lo ritenga necessario. La società si riserva il diritto di proprietà del presente catalogo con la proibizione di riprodurlo o trasferirlo a terzi senza l'autorizzazione scritta.

## Certificazioni serie PLANET 72 Plus

Per il principio di estendibilità i certificati sotto riportati sono validi per la serie Planet 72 Plus per le diverse tipologie di serramenti indicati in tabella.

 CAPITOLATO  
Specification

TIPOLOGIE SERRAMENTI							
	Finestra 2 ante ribalta	H = 1.650 mm L = 1.350 mm	0970-CPD- RP0240	classe 4	classe E1050	classe C5

## Determinazione della trasmittanza termica dei nodi del sistema per serramenti Planet 72 Plus

Per la determinazione della trasmittanza termica dei profilati, l'intera serie Planet 72 Plus è stata certificata, dal laboratorio notificato IRCCOS, secondo la normativa di prodotto EN 14351-2006, seguendo il metodo di calcolo tramite "Flixo pro 8.0". Il codice di riferimento del documento rilasciato dal laboratorio corrisponde al n° 1994-CPR-RP1615.

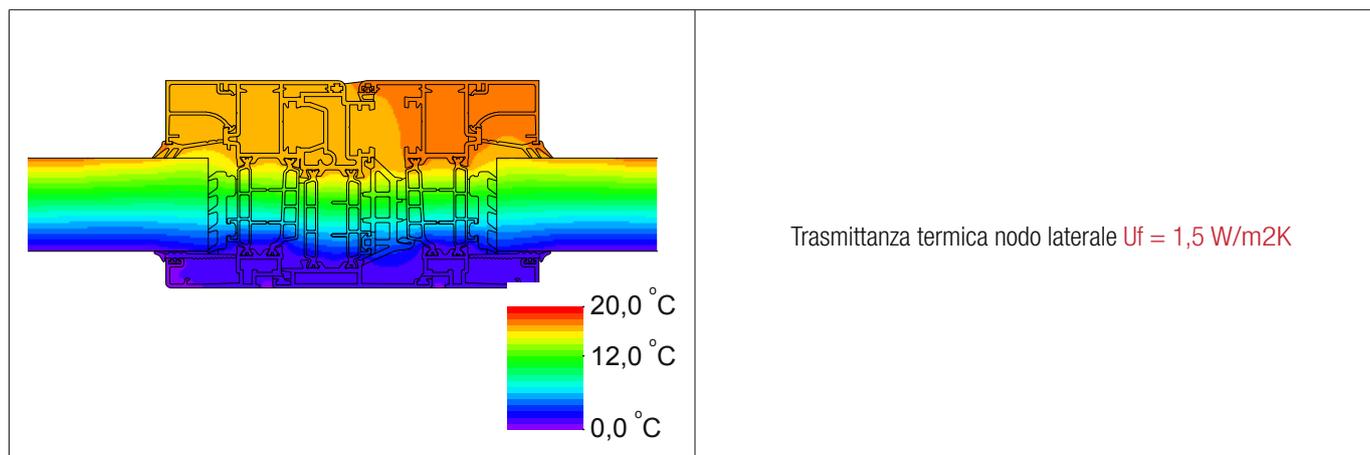

### Metodologia di analisi utilizzata

Il calcolo della trasmittanza termica è stato eseguito in accordo con la norma UNI EN ISO 10077-2:2004. Per i calcoli è stato utilizzato il software "Flixo pro 8.0". Si riporta come esempio, una pagina del documento rappresentante il nodo laterale, centrale e soglia.

#### Andamento delle temperature e dei flussi di calore nel nodo laterale TT 71803 + TT 71877

#### Andamento delle temperature e dei flussi di calore nel nodo laterale TT 71811 + TT 71813 + TT 71811

## General specifications

Aluminum frames created with thermal break Planet 72 Plus doors and windows with central. The profiles are extruded in aluminium alloy EN AW 6060 (EN 573.3), supply condition T5 and T6 in accordance with standard EN 755.2 with dimensional tolerances and thicknesses compliant with standard UNI EN 755-9 and UNI12020-2 : 2001. Alloy according to ALSistem formula. The thermal insulation will consist of 28mm polyamide 6.6 hi-tech solution strips reinforced 25% with fibreglass with a moisture absorption value lower than 2% at a temperature of 23°C and a level of humidity at 50%; the strips are assembled by means of computerised mechanical rolling, and the mechanical characteristics of the strips must remain unaltered up to a maximum treatment temperature of 245°C. The production process is controlled in accordance with UAETC standards, the sliding values must be greater than 24 da N/mm. The fixed frame shall be 72mm deep, whilst the openable parts shall be 80mm deep. The sealing system shall be of the open joint type with a central EPDM gasket with a seal fin on the sloping surface of the profile on the moving part of the window; the central gasket must be connected at the corners with the appropriate vulcanised corners. The profiles have been designed with straight of rounded lines internally and externally with the possibility of accommodating glazing bead solutions cut at 45° or 90°; where cut at 90° with rounded glazing beads, the appropriate connecting corners in die-cast aluminium can be used. The glazing must be sealed in accordance with the instructions shown in the catalogue and exclusively with original glazing bead gaskets. Appropriate drainage holes must be made on the fixed frame and on the moving frame in order to allow the correct drainage for the window/door. The limits of use of the profiles depend on their geometric characteristics, on the scope of the accessories and on the operating loads. The accessories used in the manufacture of the various types must be exclusively the originals designed especially for the system, as shown in the catalogue and distributed by the ALSistem licensees; the use of products other than those indicated or their partial or incorrect assembly shall render the test certificates and guarantee null and void. The manufacture and installation must be in accordance with the operating criteria indicated by ALSistem. The profiles shall be assembled with brackets in extruded or die-cast aluminium to be buttoned, pinned, crimped or screwed, the edges must be protected with acrylic, silicone or MS polymer sealants. The profiles must be protected and finished by means of normal surface treatments, anodic oxidation compliant with the "Qualanod" quality label or by painting with thermosetting polyester in powder form and oven-polymerised at temperatures between 185°C and 195°C, in accordance with the "Qualicoat" quality label.

## Materials

The doors and windows are made from aluminium alloy EN AW 6060 extruded profiles as indicated in standard EN 755.3. The supply condition is within class T5 and T6 in accordance with standard EN 755.2. Dimensional tolerances comply with UNI 12020-2 : 2001. Alloy according to ALSistem formula.

## Technical and dimensional characteristics

External visual appearance: flush

Internal visual appearance: flush or overlapping 8mm

Profiles: light alloy 6060 (UNI35690TA) extrusions; they can be anodised and painted. Alloy according to ALSistem formula.

Sealing system: open joint with pre-chamber or double rebate, with EPDM gaskets

Thermal insulation system: made using 28mm polyamide tubular spacers

Accessory system: top quality European chamber

Distance between frame and leaf: 11.5mm

Superimposition of leaf rebate on frame: 6mm

Height of glass rebate: 22mm

Space between the profiles: 5mm

Frame depth: 72mm/77mm

Leaf depth: 80mm

Tubularity of window profiles: 15mm

Tubularity of door profiles: 36.4mm

Glass fastening: with smooth or radial glazing beads

Space for glass or panel in fixed frames: from 27mm to 65mm

Space for glass or panel in leaves: from 27mm to 73mm

## Surface protection

The profiles can be protected by means of anodic oxidation with thickness category >15 micron as per standard UNI 4522/00 (66-70), or by painting with thermosetting polyester in powder form and oven polymerised in accordance with the "Qualicoat" quality procedures and with standard UNI EN 12206-1

## Resistance of the finish

The surface finish must not suffer any corrosion or alterations in appearance for a period of time appropriate to the life of the product. The characteristics required to ensure the behaviour in accordance with the type of environment are specified in standards UNI4522/00 for oxidation and UNI EN 12206-1 for painting, bearing in mind that the key factors influencing weather resistance are proximity to the sea, atmospheric pollution, maintenance and cleaning also from rain.

## Safety

In order to prevent physical harm or injury to users, the doors and windows must be designed in accordance with the relevant safety legislation, Italian Leg. Decree 81/2008 and UNI 7697-07. See "Uso e Manutenzione" by Thermoposa ALSistem.

## Characteristics of the glazing

The glazing must be selected in accordance with performance criteria to meet the requirements of energy saving, sound insulation, solar radiation control, safety. Relevant standards: UNI EN ISO 140-3:06, UNI6534:74, UNI EN 572-1:04, UNI EN 12758:04, UNI EN 12150-1:01, UNI 7143:72 DM 2 April 1998.

## Gaskets

The gaskets must only be the originals designed for the system, guaranteeing its performance and complying with reference standards UNI 3952:98, UNI 12365:05.

## Sealants

The sealants must comply with the provisions of reference standards UNI EN ISO 11600:04. These materials must not corrode the parts made of aluminium and its alloys with which they come into contact and must therefore be non-acetic or MSPolymer based.

## Accessories

The accessories must be the original ones produced for the range and in accordance with the criteria indicated in UNI standards and with the safety legislation, Italian Leg. Decree 81/2008. Available ITT test report.

## Performance

The Planet 72 TT Plus range meets the requirements of standards UNI EN 12207:00, UNI EN 12208:00, UNI EN 12210:00.

## Mechanical resistance

The system and its accessories shall be resistant to the stress of use in accordance with the limits established in standard UNI 12365:05.

## Sound insulation

The choice of the type of sound insulation for a door or window depends on the intended purpose of the location in which the frame is to be fitted and on the level of external noise; the behaviour of the door or window on site is influenced by factors that cannot be determined beforehand (height from the floor, orientation of noise sources, etc.). The sound insulation capacity can therefore be estimated to a large degree, based on window/door air permeability, with a minimum permeability value of 2, and on the sound insulation capacity of the glass. In accordance with the methodology described in reference standard UNI EN ISO 140-3:06.

## Thermal insulation

The choice of the heat insulation properties must be made on the basis of the energy saving requirements in accordance with law 10/91 and L.D.192/05 and update L.D.311/06 and of the environmental wellbeing requirements or with reference to standard UNI EN ISO 10077-1:07. The window/door thermal transmittance can be calculated from the transmittance values of the profiles and of the surfaces in accordance with standard UNI EN ISO 10077-1:07 using the formula:

$$U_w = (A_g \cdot U_g + A_f \cdot U_f + I_g \cdot \psi) \div (A_g + A_f)$$

## Certifications

It is possible to ask the manufacturer of the windows/doors, or alternatively the local licensee, for a photocopy of the test reports relating to specific properties.

## CE Marking UNI EN 14351-1

CE marking is OBLIGATORY and is the system to which all manufacturers of doors and windows must comply in order to be able to sell their products in the European Union. The Manufacturer, or its representative, with its headquarters in the EEA [European Economic Area] is responsible for affixing the CE marking to its product, on a label applied to the product, on its packaging or on its accompanying commercial documents. Standard UNI EN 14351-1 applies to windows, glass doors, external pedestrian doors, external doors on escape routes, roof windows/skylights (including those resistant to external fire), ribbon windows, coupled windows and double windows. These doors/windows can have one or more leaves, with moving leaves and fixed parts, opening inwards or outwards, operated manually or automatically, completely or partially glazed, with or without a frame to contain the glass, with or without built-in shielding devices.

Standard UNI EN 14351-1 does not apply to:

- windows, glass doors and pedestrian doors with fire-resistant and smoke-proof characteristics
- internal doors (EN 14351-2)
- external obscuring shutters (UNI EN 13659)
- revolving doors
- windows situated on escape routes

The standard relates to certain voluntary and/or obligatory requirements:

- Watertightness
- Release of hazardous substances
- Impact resistance
- Wind resistance
- Load-bearing capacity of safety devices
- Sound insulation
- Thermal insulation
- Glass radiance (light transmission)
- Air permeability

## Factory Production Control (FPC)

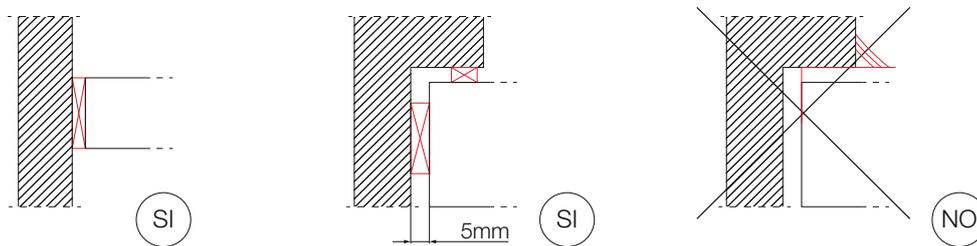

Factory production control is a system implemented by the manufacturer under its own responsibility, in order to ensure that the structural characteristics of the product are maintained over time within certain limits. The manufacturer must establish certain documented procedures, which indicate the methods that the personnel responsible for various controls must implement in order to monitor the process assigned to them frequently and accurately. The manufacturer is obliged to guarantee the traceability of the product by using codes or other methods. By means of a diagram, the manufacturer is also obliged to inform the purchaser of instructions relating to the use, handling, installation, maintenance and cleaning of the product. The installation characteristics, however, are not analysed. Refer to our Thermoposa manuals.

## Laboratory Test (ITT)

The characteristics of the door/window are assessed on the finished product complete with its metal fittings, double glazing, panels and all the accessories and treatments that render it ready for use. Any manufacturer who requests it can obtain the results of the tests (ITT) on the doors/windows directly from Al sistem or from the local licensee, which grants the right to use the results of the certificates of the ITTs received from the Laboratory, by means of a cascading agreement between the parties. The manufacturer is responsible for the product's compliance with the European standards indicated in the draft standard and found in the national standards (UNI standards).

## Installation

In order for the window to operate properly, it is very important to pay extremely close attention to the vertical positioning and levelling of the frame, and then to seal it using Thermoposa self-expanding tapes, following the advice in the example shown below, also checking that the openings are sufficiently filled (shimming the glass 1-2 mm out of square), so that, with the adjustment of the materials, there is no deterioration of operation over time.

Our company, that in the field of exterior doors has always been ahead in research and development In the high-efficiency thermo-acoustic solutions, adopts Thermoposa system to guarantee a correct redevelopment of the window hole.

The **Thermoposa** System includes 3 main interventions: - Proper installation of the window

- Insulation of the box
- Cutting Marble, whether through

## Maintenance of the aluminium surfaces

In view of the high amounts of pollution now reached in all countries, particularly in large cities and in coastal areas beaten by the sea wind, it is very important for aluminium surfaces that are in contact with the atmosphere to be cleaned regularly. Our intention is to raise the awareness of the manufacturers of doors and windows so that they can in turn advise THE CLIENT as well as possible.

It is good practice to take 3 fundamental points into consideration:

- 1- how often the cleaning operation must be carried out over the course of the year
- 2- the period
- 3- the product to be used

Here are the answers:

The number of cleaning operations depends on the level of pollution in the area in which the building is located, ranging from 1 to 3 times a year.

The period may be:

- at the end of winter
- in the middle of summer
- in the middle of autumn, depending on the number of cleaning operations

It is important that the product to be used for cleaning is neutral; using the wrong product could ruin the various different materials of which a door or window consists (gaskets, sealants, marble, etc) and cause damage that could compromise the efficiency and life of the product.

The characteristics of these products as well as the frequency of the cleaning to be adopted are defined in draft standards UNIMET12.04.270 and E12.04.277.0.

If no neutral product is available, it is preferable to use warm water with a nonabrasive cloth.

In order to install, maintain and clean the doors and windows correctly, we also suggest that you consult the instructions contained in the following Uncsaal technical notes: UX 42 guide to installing windows UX 10 cleaning of surfaces of doors/windows and continuous facades. Refer to our Thermoposa manuals.

## Painting phases

1. The painting cycle offer the possibility of obtaining an excellent protective coating on the surface of the frames and a greater brightness of colour;
2. The layer must have a min. thickness of 60 micron on the visible parts;
3. the material shall be subjected to the following process:
  - removal of grease/dirt without etching
  - washing
  - alkaline (or acid) pickling with etching
  - washing
  - deoxidising
  - washing
  - chromate treatment
  - washing in demineralised water
  - drying at 75°C
  - painting in thermosetting powder coating
  - oven polymerisation

All operations carried out on aluminium must comply with the provisions of the "Qualicoat" quality label.

## Anodisation phases

1. The oxide layer may vary from 15 to 20 micron (UNI4522-66), according to the area in which the door/window is located;
2. it can be normal or electro-colour;
3. the material shall be subjected to the following process:
  - removal of grease/dirt without etching
  - washing
  - alkaline pickling with etching (except for shiny finishes)
  - washing
  - deoxidising
  - washing
  - oxidation in sulphuric acid bath at 18/20°C, density of corrosion 1.5[A]dmq
  - inorganic or organic colouring or electro-colour (except for silver)
  - double washing
  - drying
  - hot fixing boiling with nickel salts, fixing 2.5/3 minutes for every micron of thickness

## Observation

During the preliminary phase the project manager or door/window fitter must determine the type of door/window to be used depending on the elements provided by the client. During the selection or inspection, the necessary moment of inertia must be considered depending on the wind pressure and the required profile chosen from the Planet range. Obviously, the appropriate accessories must be used from the original AL sistem accessories, provided for the Planet range.

## Profile dimensions and weights

The dimensions and weights indicated on the drawings of the profiles in the catalogue are theoretical and can vary according to the extrusion dimensional tolerances (Standard UNI EN 12020-02) and to the type of finish. Painting also adds to the thickness, thus reducing the housings for inserting the gaskets and accessories. This variability could influence the dimensions of the cut and consequently those of the finished door/window. The differences in cut can increase also in proportion to the number of leaves per door/window. It is advisable, in initial works or in those with large quantities, to create a true sample to check that it works properly.

## Cut dimensions

The theoretical dimensions of cut indicated in this catalogue must be altered according to the type and depending on the precision of the cutting machine being used, (e.g. for double-leaf doors opening outwards with panic exit bar, the space must be 8 mm rather than 5 mm etc.).

During fabrication of 3/4 leaf windows the leaftrans cutting size must be 0.5cm shorter.

## Advice for correct assembly

To obtain the best results when using Planet profiles, it is advisable to pay careful attention to all of the following points, designed to reinforce all of the weak points of a normal window, thus optimising the performance offered by the window.

Correct procedure	Objective
seal the profiles together in the join at 45°	prevents water seepage, prevents corrosion
seal the profiles on the jamb when they are faced	prevents water seepage, prevents corrosion
use the open joint gasket on the sill also in the double rebate solution	facilitates water drainage
use the vulcanised corner of the central rebate gasket	increases air permeability increases watertightness
use the vulcanised corner of the internal rebate gasket	increases air permeability and improve the finish of the casing
use limit curves to select the profile	avoids choosing the wrong profile
seal the window or door on the perimeter between profile and counter-frame with Thermoposa self-expanding tapes	prevents water seepage
always use the wall spacer and the screw for fixing	facilitates installation, ensures better frame positioning, insulates materials and minimises the transmission of vibrations
protect all the work carried out on the profiles	prevents corrosion increasing the life of the frame over time
for installations with emergency openings use oversized profiles	facilitates the application of accessories
use counterprofile during the 45° cut	guarantees a correct cut in order to obtain a perfect angle joint
use multi-purpose corner brackets	guarantees high-quality joints and solid in time

## Accessory certification

The painted aluminium products are certified according to the technical specifications of:  
**QUALICOAT**

The anodised aluminium products are certified according to the technical specifications of:  
**EURAS EWAA QUALANOD**

The accessories for the Planet ranges are produced by ISO9001 and ISO14001 certified companies

## Important

All the information provided in this catalogue is for guidance purposes only and in no way commits the company, which reserves the right to make improvements to its products whenever it deems this to be necessary. The company reserves the right of ownership of this catalogue and it is prohibited to reproduce or transfer it to third parties without written authorisation.

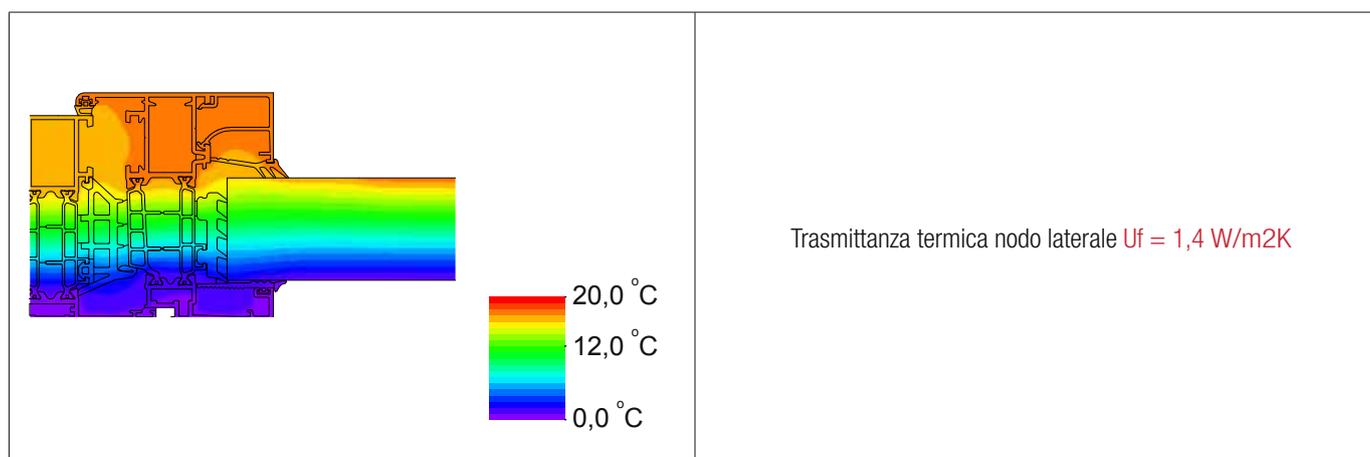

## Determination of thermal transmittance of the sections of the Planet 72 Plus system for windows

For the determination of the thermal transmittance of the profiles, the entire series Planet 72 Plus has been certified by the notified laboratory IRCCOS, according to the product standards EN 14351-2006, following the method of calculation by software "Flixo pro 8.0". The reference of the document issued by the laboratory correspond to n° 1994-CPR-RP1615.

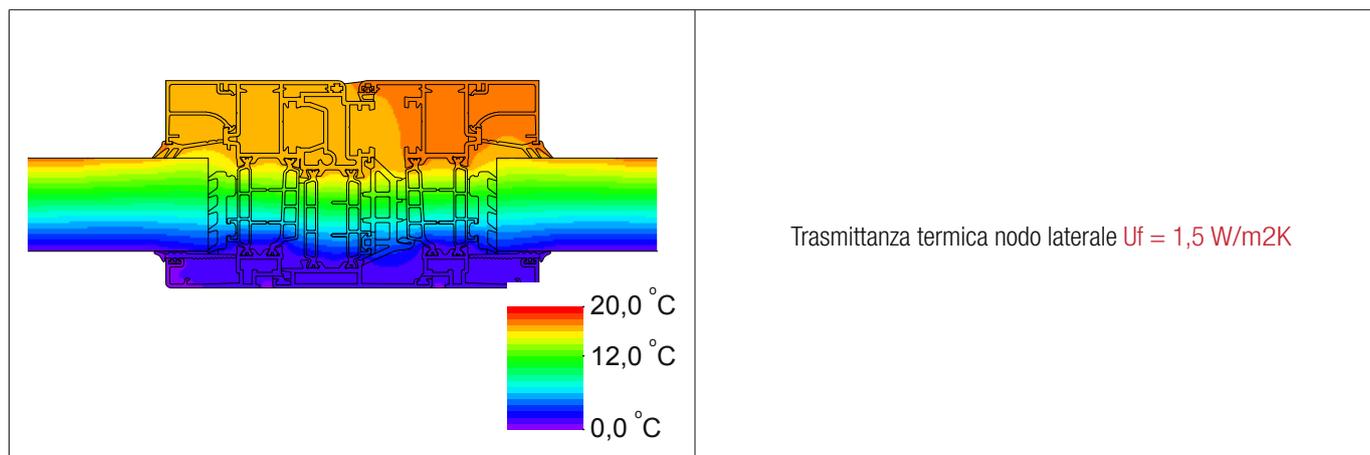

### Methodology analysis used

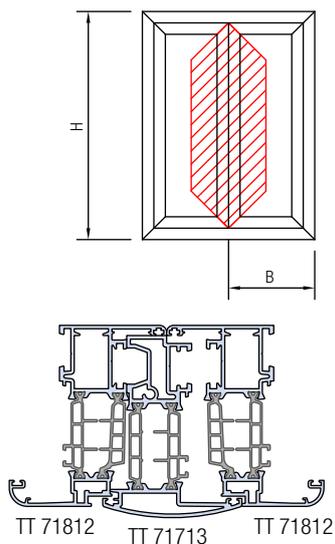

The calculation of the thermal transmittance was performed according to the UNI EN ISO 10077-2: 2004. For the calculations we used the software "Flixo pro 8.0".

### Trend of temperatures and heat flows in the lateral section TT 71803 + TT 71877

## LEGENDA BATTUTA-SPALLA

### BEAT-ABUTMENT

Allo scopo di unificare la terminologia utilizzata nel catalogo:

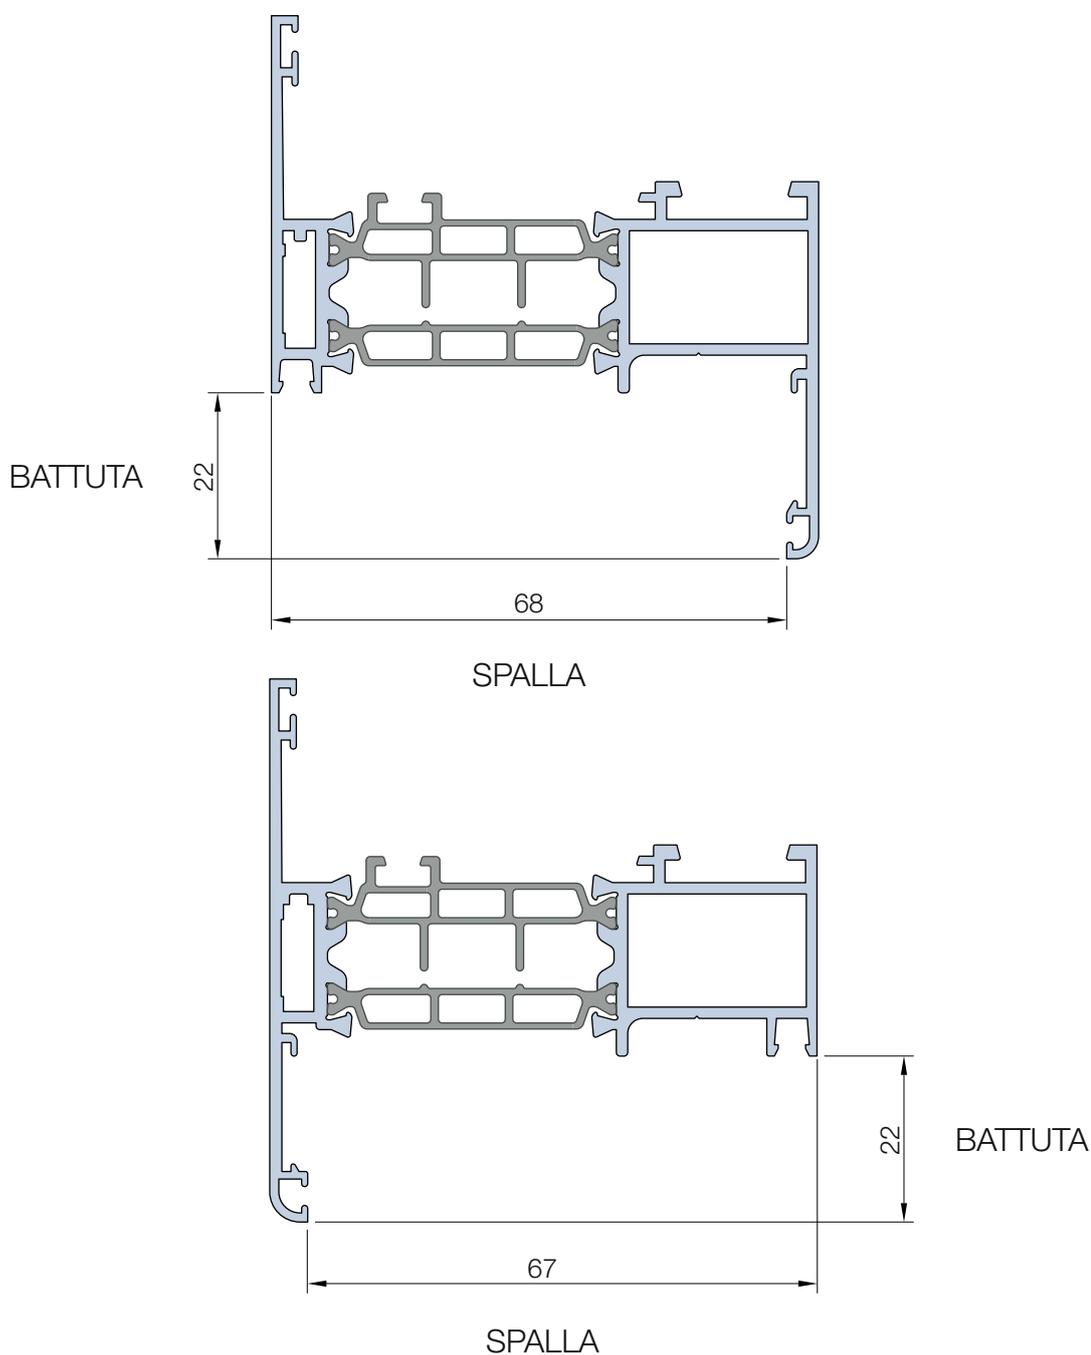

*In order to unify the technical terminology conventionally measured te following terms:*

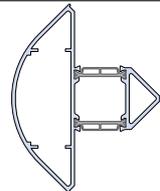

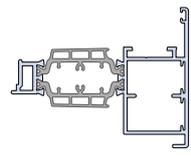

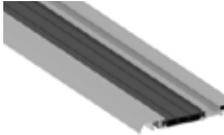

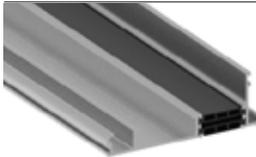

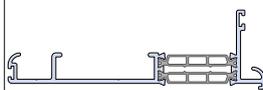

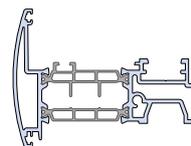

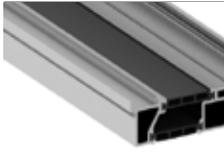

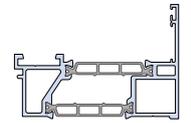

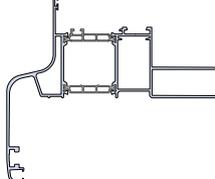

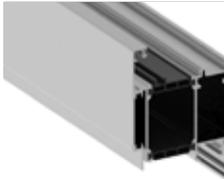

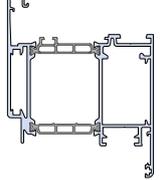

**BATTUTA:** la quota della lunghezza dell'aletta dei telai che copre il giunto con la muratura

*BEAT: the part of the fin lenght of frames that covers the joint with the masonry*

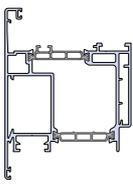

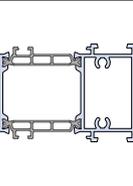

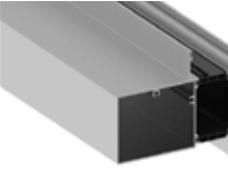

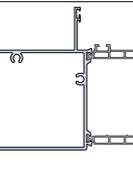

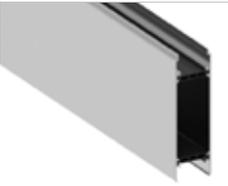

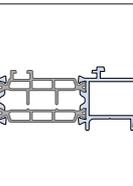

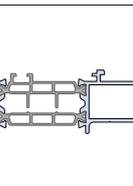

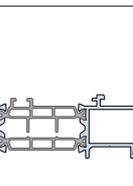

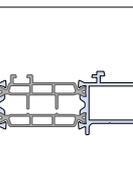

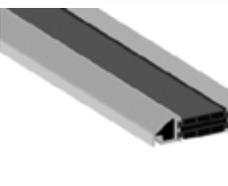

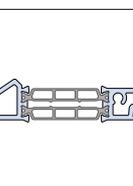

**SPALLA:** la quota della profondità tra la battuta e il filo esterno del profilato

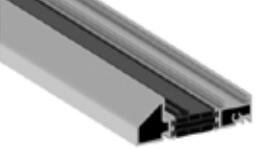

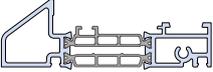

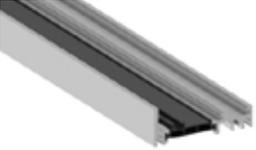

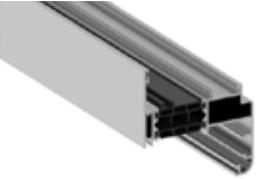

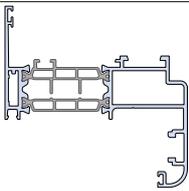

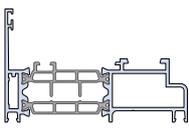

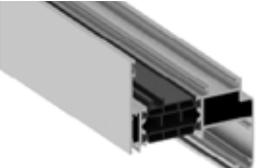

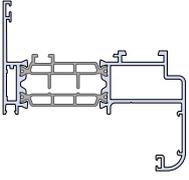

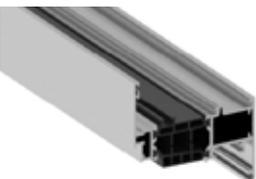

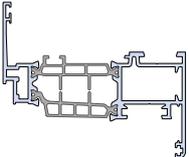

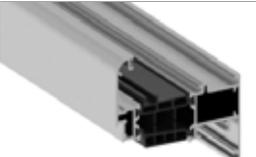

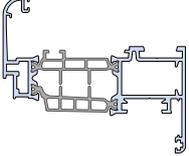

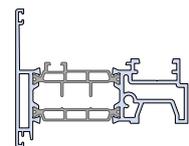

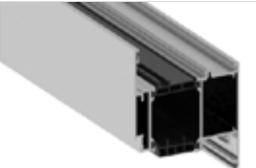

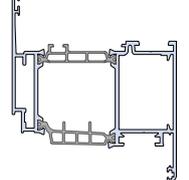

*ABUTMENT: the porportion of the depth between the stop and the external thread profile*

ACP 1001/210	<sup>THERMOPOSA</sup> Vite TORX testa svasata T30 7,5x210 <i>Countersunk screw</i>
ACP 5001	Vite Ø8 per squadrette multifunzione ACP 7001/ 7002 / 5801/ 5802 <i>Screw ø8 for multi-function corner cleat ACP 7001/ 7002/ 5801/5802</i>
ACP 5002	Squadretta 23X14mm a pulsante Ø10mm strong – filettata <i>Corner bracket 23x14mm with push-button ø10mm strong - threaded</i>
ACP 5005	Cerniera premontata, per telai piani <i>Hinge for flat frames</i>
ACP 5005D	Cerniera premontata destra, per telai piani <i>Right hinge for flat frames</i>
ACP 5005S	Cerniera premontata sinistra, per telai piani <i>Left hinge for flat frames</i>
ACP 5006	Cerniera 3 ali componenti inox e piastrini premontati, per telai piani <i>3-wings hinge for flat frames, stainless steel components and pre-assembled plates</i>
ACP 5007	Cerniera 3a anta componenti inox e piastrini premontati, usare 1 coppia hmax=1800mm per h oltre 1800mm inserire la 3a cerniera <i>3rd leaf hinge. Use a pair of hinge for hmax=1800mm, 3 hinges for h&gt;1800mm</i>
ACP 5007D	Cerniera 3a anta premontata destra, usare 1 coppia hmax=1800mm per h oltre 1800mm inserire la 3a cerniera <i>3rd leaf hinge, inox component and preassembled plate DX. Use a pair of hinge for hmax=1800mm, 3 hinges for h&gt; 1800mm</i>
ACP 5007S	Cerniera 3a anta premontata sinistra, usare 1 coppia hmax=1800mm per h oltre 1800mm inserire la 3a cerniera <i>3rd leaf hinge, inox component and preassembled plate SX. Use a pair of hinge for hmax=1800mm, 3 hinges for h&gt; 1800mm</i>
ACP 5008	Squadretta allineamento in acciaio inox <i>Alignment corner joint, stainless steel</i>
ACP 5010	Cerniera vasistas doppio scatto <i>Hinge, double snap for bottom hung open in</i>
ACP 5011	Bracci sporgere telescopici a coppie <i>Top-hinged telescopic arms for projected windows</i>
ACP 5012	Cerniera vasistas scatto singolo <i>Hinge, single snap for bottom hung open in</i>
ACP 5013	Cricchetto vasistas in alluminio <i>Awning/hopper window</i>
ACP 5014	Angolino fermavetro tondo <i>Round glazing bead angle</i>
ACP 5016	Braccio sganciabile inox <i>Stainless steel releasable arm</i>
ACP 5017	Cricchetto vasistas applicazione rapida in alluminio <i>Awning/hopper window quick fitting finger catch</i>
ACP 5019	Riscontro 3a chiusura <i>Keeper for 3rd locking piece</i>

ACP 5021	Kit 3a chiusura registrabile <i>3rd adjustable locking piece kit</i>
ACP 5022	Catenacciolo in nylon <i>Bolt</i>
ACP 5024	Incontro asta doppio in zama <i>Zamak keeper double rod</i>
ACP 5025	Terminale asta in nylon <i>Rod terminal</i>
ACP 5026	Piastrina sostegno anta <i>Plastic support for leaf</i>
ACP 5027	Gommino di bloccaggio per fermavetri a contrasto <i>Glazing bead locking rubber strip for PL 1404 and PL 1407 and tubulars</i>
ACP 5030	Spina Ø3mm per squadrette ACP 50153 e ACP 50154 con manico <i>Pin ø3mm with grip for ACP 62153 and ACP 62154 multifunction corner cleats</i>
ACP 5035	Regolo muro in nylon <i>Nylon wall spacer</i>
ACP 5036	Regolo muro in metallo <i>Metal wall spacer</i>
ACP 5043	Kit cerniere per anta abbinata telai piani (sormonto interno) <i>Hinge kit to combine leaf to flat frame</i>
ACP 5044	Kit cerniera per anta abbinata telai modanati e raggiati (complanare interno) <i>Hinge kit for tilt and turn combined leaf with moulded frames (in flat frames)</i>
ACP 5045	Blocchetti collegamento cremonese in zama <i>Zamak connection pieces for Cremonese handle</i>
ACP 5046/350	Braccio ribalta 345/410mm <i>Tilt window arm 345/410 mm</i>
ACP 5046/411	Braccio ribalta 411/540mm <i>Tilt window arm 411/541 mm</i>
ACP 5046/541	Braccio ribalta 541/1500mm <i>Tilt window arm 541/1500 mm</i>
ACP 5047	Catenacci a leva in kit anta abbinata <i>Locking kit for combined leaf</i>
ACP 5049	Braccio supplementare per L>1000mm <i>Additional arm</i>
ACP 5052	Catenaccioli a spinta in kit in alluminio con eccentrico di registrazione per anta semifissa <i>Metal bolt set</i>
ACP 5053	Giunzione astina per prolunga catenaccioli ACP 5052 <i>Connection rod for extension bolt ACP 5052</i>
ACP 5056	Chiusura supplementare orizzontale / fulcro orizzontale in kit <i>Connection rod for extension bolt ACP 5052</i>
ACP 5057	Chiusura supplementare verticale in kit <i>Vertical additional kit</i>

ACP 5058	Rotella inserimento guarnizione centrale <i>Gasket fitting roller</i>
ACP 5069	Cerniera 3 ali 3a anta componenti inox e piastrini premontati <i>3-wings hinge for 3rd leaf, stainless steel components and pre-assembled plates</i>
ACP 5081	Incontro asta singolo in nylon <i>Nylon single rod keeper</i>
ACP 5082	Incontro asta doppio in nylon <i>Metal single rod keeper</i>
ACP 5084	Squadretta allineamento con vite di tiraggio per telai e imbotti <i>Alignment corner bracket with tightening screw for frames and wall profiles</i>
ACP 5092	Frizione bilico orizzontale portata 175kg <i>Friction joint for horizontal pivot window, capacity 175kg</i>
ACP 5092V	Frizione bilico verticale portata 175kg, Abbinare asta di trasmissione ACP 50102 <i>Friction joint for vertical pivot window, capacity 175kg Combine with transmission rod ACP 50102</i>
ACP 5093	Tappi cassonetto <i>Box covers</i>
ACP 5094	Spessore in acciaio inox di compenso tra frizione bilico ACP 5092 e ACP 5092V e profilo anta bilico <i>Stainless steel shim for adjustment between ACP 5092 / ACP 5092V friction joint and pivot leaf profile</i>
ACP 5095	Inviti guida tapparella <i>Roller shutter guide supports</i>
ACP 5150/D	Kit A/R con cerniere a scomparsa SECRET anta destra braccio corto - portata max 100kg <i>Secret tilt and turn mechanism with concealed hinges, right, short arm - Max load 100kg</i>
ACP 5150/S	Kit A/R con cerniere a scomparsa SECRET anta sinistra braccio corto - portata max 100kg <i>Secret tilt and turn mechanism with concealed hinges, left, short arm - Max load 100kg</i>
ACP 5151/D	Kit A/R con cerniere a scomparsa SECRET anta destra braccio lungo - portata max 100kg <i>Secret tilt and turn mechanism with concealed hinges, right, long arm - Max load 100kg</i>
ACP 5151/S	Kit A/R con cerniere a scomparsa SECRET anta sinistra braccio lungo - portata max 100kg <i>Secret tilt and turn mechanism with concealed hinges, left, long arm - Max load 100kg</i>
ACP 5152	Incontro doppio in zama SECRET per finestra 2 ante battente <i>Zamak double keeper for casement window</i>
ACP 5153	Braccio supplementare SECRET per L>1000mm da abbinare ad ACP 5151 <i>SECRET additional window arm, L&gt;1000mm</i>
ACP 5154	Chiusura supplementare lato cerniere (rostro) <i>Beak for passive leaf</i>
ACP 5155	Chiusura supplementare per cerniera scomparsa A/R SECRET. Si usa anche in orizzontale per L>1000mm e tra le cerniere per H>1200mm <i>Additional locking piece for SECRET tilt &amp; turn mechanism. L&gt;1000mm H&gt;1200mm</i>
ACP 5156	Catenacciolo ante passive in abbinamento ad anta ribalta SECRET <i>Bolt for passive leaf, SECRET tilt and turn mechanism</i>
ACP 5157	Kit catenacci con manovra bidirezionale SECRET ante passive <i>Bolt kit and SECRET bidirectional mechanism for passive leaf</i>

ACP 5158	Incontro singolo in zama per catenacciolo superiore anta passiva ribalta SECRET, abbinare a ACP 5160 <i>Zamak single keeper for SECRET passive tilt &amp; turn mechanism</i>
ACP 5159	Terminale in zama SECRET, finestre a battente <i>Zamak SECRET rod-end for casement windows</i>
ACP 5160	Kit manovra antaribalta SECRET. Abbinare a ACP 5150 e ACP 5151 <i>SECRET tilt and turn kit for ACP 5150 and ACP 5151</i>
ACP 5161/D	Kit cerniera a scomparsa SECRET anta passiva destra - portata max 100kg <i>Secret concealed hinges, right - Max load 100kg</i>
ACP 5161/S	Kit cerniera a scomparsa SECRET anta passiva sinistra - portata max 100kg <i>Secret concealed hinges, left - Max load 100kg</i>
ACP 5162/D	Kit A/R con cerniere a scomparsa SECRET anta destra braccio corto - portata max 150kg <i>Secret tilt and turn mechanism with concealed hinges, right, short arm - Max load 150kg</i>
ACP 5162/S	Kit A/R con cerniere a scomparsa SECRET anta sinistra braccio corto - portata max 150kg <i>Secret tilt and turn mechanism with concealed hinges, left, short arm - Max load 150kg</i>
ACP 5163/D	Kit A/R con cerniere a scomparsa SECRET anta destra braccio lungo - portata max 150kg <i>Secret tilt and turn mechanism with concealed hinges, right, long arm - Max load 150kg</i>
ACP 5163/S	Kit A/R con cerniere a scomparsa SECRET anta sinistra braccio lungo - portata max 150kg <i>Secret tilt and turn mechanism with concealed hinges, left, long arm - Max load 150kg</i>
ACP 5164/D	Kit cerniera a scomparsa SECRET anta passiva destra - portata max 150kg <i>Secret concealed hinges, right - Max load 150kg</i>
ACP 5164/S	Kit cerniera a scomparsa SECRET anta passiva sinistra - portata max 150kg <i>Secret concealed hinges, left - Max load 150kg</i>
ACP 5198	Meccanismo martellina monodirezionale per A/R, quadro 7mm <i>Monodirectional handle mechanism for A/R windows</i>
ACP 5199	Meccanismo martellina bidirezionale per battente, quadro 7mm <i>Bidirectional handle mechanism for casement windows, 7mm</i>
ACP 5501	Squadretta maggiorata 23X35mm a pulsante <i>Oversized bracket 23x35mm with push-button</i>
ACP 5502	Squadretta piccola a bottone 17.5X15mm per inversione TT 71723 <i>Bracket 17.5x15mm with push-button for reversal TT 71723</i>
ACP 5504	Squadretta 23X14mm estrusa, angolo variabile min. 30° max.178° <i>Bracket 23x14mm, variable angle, min 30° max 178°</i>
ACP 5506	Squadretta maggiorata 23X35mm estrusa, angolo variabile min. 55° max.315° <i>Oversized bracket 23x35mm, variable angle, min 55° max 315°</i>
ACP 5521	Cavallotto a pulsante 23X14mm in pressofuso <i>Cross junction 23x14mm, die-cast, with push-button</i>
ACP 5800	Spina per squadretta multifunzione ACP 5801, ACP 5802, ACP 7001, ACP 7002 <i>Pin for multifunction corner cleat ACP 5801, ACP 5802, ACP 7001</i>
ACP 5801	Squadretta 23X14mm multifunzione, avvitare, spinare e cianfrinare <i>Multi-purpose bracket 23x14mm, screwing, broaching and crimping</i>
ACP 5802	Squadretta maggiorata 23X35mm multifunzione, avvitare, spinare e cianfrinare <i>Multi-purpose bracket 23x35mm, screwing, broaching and crimping</i>

ACP 5805	Squadretta pressofusa 23X14mm angolo variabile min.60° max 120° <i>Bracket 23x14mm variable angle - strong min 60° max 120°</i>
ACP 5821	Cavallotto 23X14mm in pressofuso con grano e codolo <i>Cross junction 23x14 mm die-cast with dowel and shank</i>
ACP 6220	<sup>THERMOPOSA</sup> Traverso inferiore 20mm Thermopro in PVC <i>Thermopro PVC sill transom, 20mm</i>
ACP 6246/25	<sup>THERMOPOSA</sup> Controtelaio Thermopro spalla 72mm, battuta 25 rifilabile <i>Thermopro subframe 72mm, beat 25</i>
ACP 6246/49	<sup>THERMOPOSA</sup> Controtelaio Thermopro spalla 72mm battuta 49 rifilabile <i>Thermopro subframe 72mm, beat 49</i>
ACP 6249	<sup>THERMOPOSA</sup> Traverso inferiore 40mm Thermopro in PVC <i>Thermopro PVC sill transom</i>
ACP 6254	<sup>THERMOPOSA</sup> Staffe per traverso ACP 6249 <i>Transom bracket for ACP 6249</i>
ACP 6255	<sup>THERMOPOSA</sup> Zanche per fissaggio del controtelaio ACP 6246 <i>Clamps for fixing of subframe for ACP 6246</i>
ACP 6256	<sup>THERMOPOSA</sup> Squadretta angolare per controtelaio ACP 6246 <i>Corner cleat for ACP 6246</i>
ACP 6257	<sup>THERMOPOSA</sup> Piastra di allineamento per controtelaio ACP 6246 <i>Alignment plate for ACP 6246</i>
ACP 6258	<sup>THERMOPOSA</sup> Squadretta di rinforzo per controtelaio ACP 6246 <i>Reinforced bracket for ACP 6246</i>
ACP 6259	<sup>THERMOPOSA</sup> Rinforzo tubolare aperto in acciaio 12x40mm per controtelaio ACP 6246 <i>Steel tubular reinforcement 12x40mm for ACP 6246</i>
ACP 6260	<sup>THERMOPOSA</sup> Staffe per traverso ACP 6220 <i>Transom bracket for ACP 6220</i>
ACP 7001	Squadretta piccola multifunzione 17.5X15mm avvitare, spinare e cianfrinare per inversione TT 71723 <i>Multi-purpose bracket 17.5x15 mm, screwing, broaching and crimping for reversal TT 71723</i>
ACP 7207	Cavallotto di allineamento scocca esterna profili dritti <i>Cross junction for flate frame</i>
ACP 7208	Cavallotto di allineamento scocca esterna profili raggiati <i>Cross junction for rounded profiles</i>
ACP 7272	Tappo sotto porta per TT 71835/TT 71735 <i>Under door plug for TT 71835/TT 71735</i>
ACP 7273	Tappo sotto porta per TT 71837/TT 71737 <i>Under door plug for TT 71837/TT 71737</i>
ACP 7274	Tappo sotto porta per TT 71813/TT 71713 <i>Under door plug for TT 71813/TT 71713</i>
ACP 9909	Spessore 8mm per cerniere ad applicazione frontale <i>8mm thickness for frontal hinges</i>
ACP 9915	Spessore 7mm per cerniere ad applicazione frontale <i>7mm thickness for frontal hinges</i>

ACP 9918	Cerniera Strong a 2 ali per telai piani <i>2-wing Strong hinge for flat frame</i>
ACP 9938	Cerniera Strong a 2 ali, 3° anta anche per telai complanari <i>2-wing 3rd leaf Strong hinge for flat frame</i>
ACP 9963/60	Cerniera frontale, 3 ali interasse 60mm <i>3 wings frontal hinge, 60mm</i>
ACP 9963/93	Cerniera frontale, 3 ali interasse 93mm <i>3 wings frontal hinge, 93mm</i>
ACP 9964/60	Cerniera frontale 2 ali interasse 60mm <i>2 wings frontal hinge, 60mm</i>
ACP 9964/93	Cerniera frontale 2 ali interasse 93mm <i>2 wings frontal hinge, 93mm</i>
ACP 9973	Kit fissaggio cerniere applicazione frontale 2 ali <i>2-wings front hinge kit</i>
ACP 9974	Kit fissaggio cerniere applicazione frontale 3 ali <i>3-wings front hinge kit</i>
ACP 9998	Dima di foratura per cerniere applicazione frontale <i>Front hinge holes template</i>
ACP 50010	Avvolgitore senza placca <i>Winder without plate</i>
ACP 50011	Placca per avvolgitore <i>Plate for winder</i>
ACP 50095	Guida cinghia a cassonetto <i>Box belt guide</i>
ACP 50102D	Asta di trasmissione per frizione ACP 5092V per bilico verticale destro <i>Transmission rod for friction joint ACP 5092V right vertical pivot</i>
ACP 50102S	Asta di trasmissione per frizione ACP 5092V per bilico verticale sinistro <i>Transmission rod for friction joint ACP 5092V left vertical pivot</i>
ACP 50103	Limitatore di apertura per frizioni bilico ACP 5092 e ACP 5092V <i>Opening restrictor for pivot friction joint ACP 5092 and ACP 5092V</i>
ACP 50110	Squadretta allineamento con eccentrici di tiraggio per ante <i>Alignment corner bracket with tightening eccentrics</i>
ACP 50115	Tappo terminale sotto porta per anta a girare per PL 2059 <i>Under door plug for PL 2059</i>
ACP 50117D	Mensola destra per supporto a squadra ACP 50220 <i>Right bracket for square support ACP 50220</i>
ACP 50117S	Mensola sinistra per supporto a squadra ACP 50220 <i>Left bracket for square support ACP 50220</i>
ACP 50118	Nastro magnetico in acciaio per sistema oscurante Easysun per PL 1325 <i>Easysun magnetic tape for PL 1325</i>
ACP 50119	Kit tappi inversione bilico orizzontale per TT 7120 <i>Horizontal pivot plug for TT 7120</i>

ACP 50119V	Kit tappi inversione bilico verticale per TT 7120 <i>Vertical pivot plug for TT 7120</i>
ACP 50122	Clip fermavetro <i>Glazing bead clip</i>
ACP 50128	Cappetta scarico acqua in nylon <i>Nylon drainage plug</i>
ACP 50128C	Cover in alluminio, da abbinare ad ACP 50128 <i>Aluminium cover to ACP 50128</i>
ACP 50146/350	Braccio ribalta manovra logica 345/410mm, abbinare ACP 50180 <i>Logical tilt &amp; turn arm 345/410mm</i>
ACP 50146/411	Braccio ribalta manovra logica 411/540mm, abbinare ACP 50180 <i>Logical tilt &amp; turn arm 411/540mm</i>
ACP 50146/541	Braccio ribalta manovra logica 541/1500mm, abbinare ACP 50180 <i>Logical tilt &amp; turn arm 541/1500mm</i>
ACP 50149	Braccio supplementare ribalta manovra logica L>1000mm <i>Tilt &amp; turn additional arm</i>
ACP 50153	Squadretta multifunzione 4X14mm spinare, cianfrinare e avvitare <i>Multi-purpose bracket 4x14mm broaching-crimping and screwing</i>
ACP 50154	Squadretta multifunzione 4X36mm spinare, cianfrinare e avvitare <i>Multi-purpose bracket 4x36mm broaching-crimping and screwing</i>
ACP 50155	Vite inox per squadrette multifunzione ACP 50153 e ACP 50154 <i>Stainless steel screw for multipurpose corner brackets ACP 50153 and ACP 50154</i>
ACP 50156	Kit anta ribalta per telai piani senza cremonese <i>Tilt &amp; turn kit for flat frame, no cremonese handle</i>
ACP 50157	Kit anta ribalta senza cremonese per telai complanari interni <i>Tilt &amp; turn kit for flat frame, no cremonese handle</i>
ACP 50158	Kit chiusura 6 punti per bilico/scorrevole parallelo. Abbinare a ACP 5092 e ACP5092V <i>Pivot window closing kit. Combined with ACP 5092 and ACP 5092V</i>
ACP 50159D	Kit base scorrevole parallelo dx portata 150kg per anta <i>Parallel slide base kit, right, capacity 150kg per leaf</i>
ACP 50159S	Kit base scorrevole parallelo sx portata 150kg per anta <i>Parallel slide base kit, left, capacity 150kg per leaf</i>
ACP 50160/1100	Kit binari per scorrevole parallelo L anta = da 851mm a 1100mm <i>Parallel slide track kit L=851 to 1100mm</i>
ACP 50160/1350	Kit binari per scorrevole parallelo L anta = da 1101mm a 1350mm <i>Parallel slide track kit L=1101 to 1350mm</i>
ACP 50160/1600	Kit binari per scorrevole parallelo L anta = da 1351mm a 1600mm <i>Parallel slide track kit L=1351 to 1600mm</i>
ACP 50161/1200	Kit forbici scorrevole parallelo soluzione manuale per ante fino a L 1200mm, abbinare ad ACP 50165 <i>Developed scissor sliders kit for leaf up to 1200mm, matching with ACP 50165</i>

ACP 50162	Kit forbici scorrevole parallelo soluzione automatica per ante, fino a L 1600mm di anta utilizzare ACP 50159, da 1600 a 2000 mm occorrono carrelli con portata 180kg. KIT DISPONIBILE SU RICHIESTA ABBINARE ALLA MANIGLIA ACP 50170 <i>Developed scissor sliders kit for leaf up to 2000mm. Up to 1600mm matching with ACP 50165. From 1600 to 2000mm, use trailers with capacity 180kg. Available on request only matching with handle ACP 50170</i>
ACP 50163	Kit accessori per trasformare il kit manuale ACP 50161 in semiautomatico <i>Accessories kit to make semiautomatic ACP 50161 mechanism</i>
ACP 50164	Kit coperture. Disponibile nelle colorazioni argento ossidato, RAL 9010 e nero elettro-colore <i>Cover kit, finish available: silver, RAL 9010, black</i>
ACP 50165	Spessori per forbici da abbinare con ACP 50161/1200 o ACP 50162 <i>Thickness matching with ACP 50161/1250 or ACP 50162</i>
ACP 50166	Placchetta di fermo - per modificare il kit forbici manuale in semiautomatico da abbinare ad ACP 50163 <i>Plate to make semiautomatic the developed scissor sliders kit - matching with ACP 50163</i>
ACP 50167	Kit supplementare al kit 50161 per ante oltre L 1200mm da abbinare alle astine ACP 50168 e ACP 50169 <i>Additional kit matching with ACP 50168 and ACP 50169, leaf up to 1200mm</i>
ACP 50168	Astina per kit supplementare ACP 50167 per ante da L 1201mm fino a 1350mm <i>Rod ACP 50167 for additional kit, leaf 1201mm to 1350mm</i>
ACP 50169	Astina per kit supplementare ACP 50167 per ante da L 1351mm fino a 1600mm <i>Rod ACP 50167 for additional kit, leaf 1351mm to 1600mm</i>
ACP 50175	Kit finestra battente 1 anta: blocchetti di collegamento, incontri, terminali d'asta, piastrino sostegno anta <i>1-leaf casement window kit</i>
ACP 50176	Cremonese Aurora monodirezionale per anta ribalta e scorrevole parallelo con antirollio <i>Monodirectional Cremonese Aurora handle for tilt and turn and parallel slide</i>
ACP 50180	Kit anta ribalta fulcro orizzontale/manovra logica <i>Tilt and turn logical kit</i>
ACP 50200	Cremonese Aurora bidirezionale completa di piastrini anti rollio <i>Bidirectional cremonese Aurora handle</i>
ACP 50220	Supporto a squadra 46X10mm rullo tapparella <i>Square bracket 46x10mm for rolling shutter</i>
ACP 50232	Manico per cremonese Aurora ACP 50233 <i>Cremonese Aurora handle for ACP 50233</i>
ACP 50233	Cremonese Aurora bidirezionale senza manico completa di piastrino antirollio <i>Bidirectional Cremonese Aurora handle</i>
ACP 50234	Cremonese Aurora bidirezionale con chiave completa di piastrini antirollio <i>Aurora bidirectional Cremonese handle with key</i>
ACP 50235/D	Cremonese Aurora monodirezione destra con chiave e antirollio <i>Aurora right monodirectional Cremonese handle with key</i>
ACP 50235/S	Cremonese Aurora monodirezione sinistra con chiave e antirollio <i>Aurora left monodirectional Cremonese handle with key</i>
ACP 50239	Doppia maniglia Aurora per porte <i>Aurora double handle for door</i>

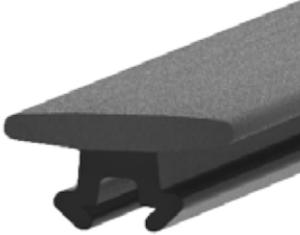

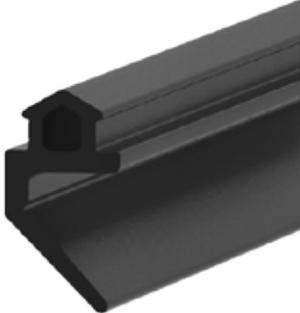

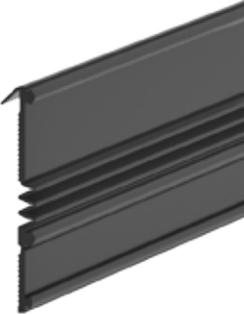

ACP 50241	Basetta copricilindro per doppia maniglia Aurora <i>Base for cylinder dust cap for Aurora double handle</i>
ACP 50252	Martellina Aurora 0°-90°-180° quadro 7mm <i>Martellina Aurora handle</i>
ACP 50253	Martellina Aurora con chiave 0°-90°-180° quadro 7mm <i>Martellina Aurora handle with key</i>
ACP 50267	Meccanismo martellina bidirezionale per bilico <i>Martellina bidirection handle mechanism for pivot window</i>
ACP 50311	Movimento monodirezionale per maniglia EXENS <i>EXENS Monodirectional mechanism for EXENS handle</i>
ACP 50312	Movimento bidirezionale per maniglia EXENS <i>EXENS Bidirectional mechanism for EXENS handle</i>
ACP 50314	Maniglia EXENS linea Aurora <i>Aurora EXENS handle</i>
ACP 50318	Doppia EXENS linea Aurora per porte <i>Double Aurora EXENS handle for door</i>
ACP 50321	Maniglia EXENS linea tonda con chiave <i>Rounded key-handle without plate</i>
ACP 50322	Maniglia EXENS linea squadrata con chiave <i>Squared key-handle without plate</i>
ACP 50323	Kit manovra logica <i>Tilt and turn logic kit</i>
ACP 50420	Cavallotto 23X14 mm a scatto in estruso <i>Snap clamp 23x14 mm extruded</i>
ACP 50454	Cavallotto a scatto doppio in estruso <i>Extruded aluminium snap cross junction for transoms</i>
ACP 50535	Fresa a due diametri 9/19mm applicazione regolo obliquo ACP 50539 <i>Two diameter cutter for wall spacer fittings</i>
ACP 50536	Regolo obliquo in zama per viti tradizionali <i>Zamak wall spacer</i>
ACP 50537	Dima di posizionamento per foratura profilo per applicazione ACP 50536/ ACP 50539 <i>Profile drilling position template for ACP 50536 fitting</i>
ACP 50538	Fresa a due diametri 7/14mm applicazione regolo obliquo per ACP 50536 <i>Two diameter cutter for wall spacer fittings</i>
ACP 50539	Regolo obliquo in nylon per turboviti <i>Nylon wall spacer</i>
ACP 50704	Cassetta semi incasso <i>Semi-embedded box</i>
ACP 50705	Avvolgitore con placca nera per cinghia tapparella <i>Winder with black plate for roller shutter belt</i>
ACP 50825	Puleggia da 180mm <i>180mm pulley</i>

ACP 50832	Calotta di supporto per rullo <i>Roller support cover</i>
ACP 51001	Guida cinghia da montante <i>Jamb belt guide</i>
ACP 51190	Boccola di giunzione rullo/puleggia rullo/calotta <i>Joint bushing, for roller/pulley and roller/cover</i>
ACP 51520	Vite di fissaggio supporto/ mensole <i>Support/bracket fastening screw</i>
ACP 72134	Appoggio vetro <i>Glass support</i>
ACP 72178M	Tappo riporto centrale versione doppia battuta Planet 72 Plus <i>Central plug for double rebate version</i>
ACP 72179	Tappo riporto centrale per versione giunto aperto Planet 72 Plus <i>Central plug for open joint</i>
ACP 99124	Cover per cerniera ACP 9918 e ACP 9938 <i>Cover for hinge ACP 9918 and ACP 9938</i>
ACP 99125	Piastrino registrabile universale per le cerniere strong ACP 9918 e ACP 9938 <i>Adjustable plate for strong hinge ACP 9918 and ACP 9938</i>
ACP 99126	Chiave per montaggio cerniera ACP 9918 e ACP 9938 <i>Key to fix hinge ACP 9918 and ACP 9938</i>
ACP 99130	Distanziatore 35-50mm per cerniere ad applicazione centrale su profilo ad apertura esterna <i>35-50mm thickness for frontal hinges - matching with putward opening profile</i>
AGG 3000	Guarnizione di battuta per telai capannoni e imbotti porte interne <i>Rebate gasket for industrial shed frames and wall profiles of internal wall</i>
AGG 3092	Giunto per finestre a nastro <i>Joint for ribbon windows</i>
AGP 4000	Guarnizione di battuta in EPDM <i>EPDM rabbet seal</i>
AGP 4002	Guarnizione isolamento perimetrale muro-telaio <i>Wall-frame perimeter insulation seal</i>
AGP 4004	Guarnizione di battuta in EPDM coestruso, inserimento ad infilare <i>Rebate gasket in co-extruded EPDM</i>
AGP 4005	Guarnizione di battuta per riporto centrale lato semifisso per versione doppia battuta <i>Rebate gasket for central connection profile on the semi-fixed side for double rebate version</i>
AGP 4006	Guarnizione di battuta per riporto centrale lato semifisso per versione giunto aperto <i>Astragal seal, semi-fixed side, for internal gasket sealing version</i>
AGP 4009	Guarnizione sottoporta ante a giro. Abbinare a PL 2059 <i>Under door gasket for PL 2059</i>
AGP 4013	Guarnizione vetro esterna in EPDM 2.5mm <i>EPDM external glazing seal 2,5mm</i>
AGP 4014	Guarnizione vetro esterna in EPDM 4mm <i>EPDM external glazing seal, 4mm</i>

AGP 4015	Guarnizione acustica di battuta esterna, coestrusa con base rigida, sostituibile <i>External rabbet acoustic gasket, co-extruded, with replaceable rigid base</i>
AGP 4040	Guarnizione chiudi cava 15mm, color argento <i>Frame recess cover strip 15mm and beat sliding version, silver color</i>
AGP 4085	Angoletto vulcanizzato per AGP 4000 <i>Vulcanized corner piece for AGP 4000</i>
AGP 4099	Guarnizione isolamento perimetrale telaio-controtelaio <i>Frame-subframe perimeter insulating seal</i>
AGP 40131	Guarnizione sottovetro in polietilene espanso <i>Expanded polystyrene glazing strip</i>
AGP 4103	Guarnizione vetro in EPDM 2.5/3.5mm per isolamento acustico e termico <i>Internal glass gasket in EPDM 2.5/3.5mm for sound and thermal insulation</i>
AGP 4106	Guarnizione vetro in EPDM 4/6mm per isolamento acustico e termico <i>Internal glass gasket in EPDM 4/6mm for sound and thermal insulation</i>
AGP 4113	Guarnizione vetro esterna in coestruso EPDM/SPUGNA da 2.5mm per isolamento acustico e termico <i>External glass gasket in co-extruded EPDM/FOAM 2.5mm for sound and thermal insulation</i>
AGP 4123	Guarnizione vetro esterna in EPDM da 2.5mm a baffo per siliconare. Garantisce maggiore ermeticità <i>EPDM external glass gasket, 2.5mm Lip sealing strip for applying silicone sealant. Guarantees greater hermetic sealing</i>
AGP 4135	Guarnizione vetro esterna in EPDM da 3.5mm a baffo per siliconare. Garantisce maggiore ermeticità <i>EPDM external glass gasket, 3.5mm Lip sealing strip for applying silicone sealant. Guarantees greater hermetic sealing</i>
AGP 4203	Guarnizione vetro interna 3mm filo fermavetro. Consente la piega a 90° <i>inner glazing bead seal, 3mm</i>
AGP 4204	Guarnizione vetro interna 4mm filo fermavetro. Consente la piega a 90° <i>Inner glazing bead seal, 4mm</i>
AGP 4205	Guarnizione vetro interna 5mm filo fermavetro. Consente la piega a 90° <i>Inner glazing bead seal, 5mm</i>
AGP 4206	Guarnizione vetro interna 6mm filo fermavetro. Consente la piega a 90° <i>Inner glazing bead seal, 6 mm</i>
AGP 4807	Spazzolino dim. 4.8X7mm per sottoporta <i>Under door brush strip 4.8X7mm</i>
AGP 5030/I	<sup>THERMOPOSA</sup> Profilo portaintonaco per esterno con asole 250cm <i>Outdoor plaster profile</i>
AGP 5031	<sup>THERMOPOSA</sup> Profilo portaintonaco per interno con asole 250cm <i>Inner plaster profile</i>
AGP 5032	<sup>THERMOPOSA</sup> Barriera al vapore per controtelaio ACP 6246 <i>Vapor barrier for ACP 6246</i>
AGP 5033	<sup>THERMOPOSA</sup> Nastro precompresso BG1 da 15mm per sigillatura della battuta <i>BG1 beat sealing, 15mm</i>
AGP 5034/25	<sup>THERMOPOSA</sup> Nastro precompresso per posa in battuta per la sigillatura della spalla <i>Band for laying batting, wall sealing</i>

AGP 5035/... <small>THERMOPOSA</small>	Sigillante MS Polimero bianco, marrone, grigio o nero, 290 ml <i>MS Polymer sealant</i>
AGP 5036 <small>THERMOPOSA</small>	Schiuma poliuretana elastica fissaggio controtelaio ACP 6246 <i>Elastic polyurethane foam for ACP 6246</i>
AGP 5037 <small>THERMOPOSA</small>	Nastro in schiuma di PVC per soglia e traverso inferiore <i>PVC foam band for transom and threshold</i>
AGP 5806	Spazzolino dim. 5.8X6mm per profili monoblocco <i>Brush strip 5.8 X 6mm for single-unit profiles</i>
AGP 5813	Spazzolino dim. 5.8X13mm per celino monoblocco <i>Brush strip 5.8 X 13mm for single-unit profiles</i>
AGP 6280	Guarnizione di giunzione telaio battente-telaio scorrevole <i>Side-hung frame/sliding frame interface seal</i>
AGP 6502	Guarnizione supplementare per soglia ribassata da abbinare a AGP 62172 <i>Additional seal for low threshold Planet 72 Plus</i>
AGP 7007	Guarnizione vetro esterna da 3mm, filo alluminio, consente la piega a 90° senza taglio <i>External glazing seal, 3mm, installed flush with aluminum. Can be bent at a 90° angle without cutting</i>
AGP 7202	Guarnizione sottoporta <i>Under door gasket</i>
AGP 72172	Guarnizione battuta centrale in EPDM coestruso <i>Standard fin seal</i>
AGP 72185	Angolo vulcanizzato per AGP 72172 45X45mm <i>Vulcanized corner piece for AGP 72172 45X45mm</i>
TAC 1000	Astina in poliammide. Disponibile in grigio e nero <i>PA rod. Available in color grey and black</i>

- portata max 150kg  
Cfz: 10 kit

*Secret concealed hinges, left - Max load 150kg  
Pkg: 10 kit*

**ACP 5160**

Kit manovra antaribalta SECRET. Abbinare a ACP 5150 e ACP 5151  
Cfz: 10 pz

*SECRET tilt and turn kit, for ACP 5150 and ACP 5151  
Pkg: 10 pcs*

**ACP 5152**

Incontro doppio in zama SECRET per finestra 2 ante battente  
Cfz: 100 pz

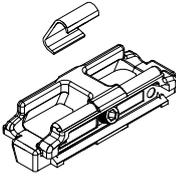

*Zamak double keeper for casement window  
Pkg: 100 pcs*

**ACP 50323**

Kit manovra logica  
Cfz: 10 pz

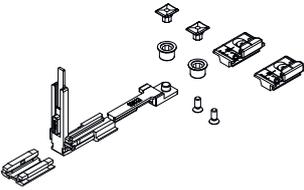

*Tilt and turn logic kit  
Pkg: 10 pcs*

**ACP 5158**

Incontro singolo in zama per catenacciolo superiore anta passiva ribalta SECRET, abbinare a ACP 5160  
Cfz: 100 pz

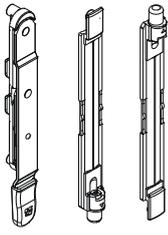

*Zamak single keeper for SECRET passive tilt & turn mechanism  
Pkg: 100 pcs*

**ACP 5155**

Chiusura supplementare per cerniera scomparsa A/R SECRET. Si usa anche in orizzontale per L > 1000mm e tra le cerniere per H > 1200mm  
Cfz: 10 kit

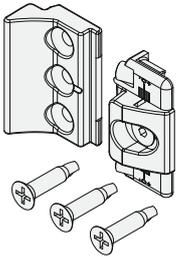

*Additional locking piece for Secret tilt & turn mechanism. L > 1000mm H > 1200mm  
Pkg: 10 pcs*

**ACP 5157**

Kit catenacci con manovra bidirezionale SECRET anta passiva  
Cfz: 10 pz

*Bolt kit and SECRET bidirectional mechanism for passive leaf  
Pkg: 10 pcs*

**ACP 5154**

Chiusura supplementare lato cerniere (rostro)  
Cfz: 50 pz

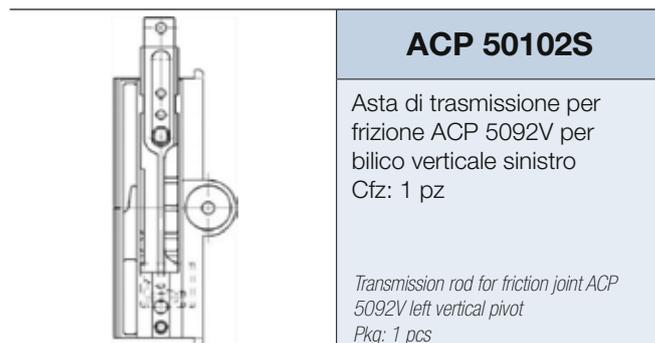

*Beak for passive leaf  
Pkg: 50 pcs*

ACCESSORI  
Fittings

**ACP 5156**

Catenacciolo anta passiva in abbinamento ad anta ribalta SECRET  
Cfz: 10 pz

*Bolt for passive leaf, SECRET tilt & turn mechanism  
Pkg: 10 pcs*

**ACP 50102S**

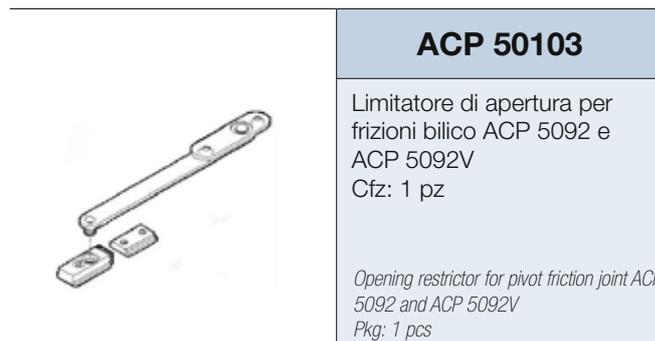

Asta di trasmissione per frizione ACP 5092V per bilico verticale sinistro  
Cfz: 1 pz

*Transmission rod for friction joint ACP 5092V left vertical pivot  
Pkg: 1 pcs*

**ACP 5092**

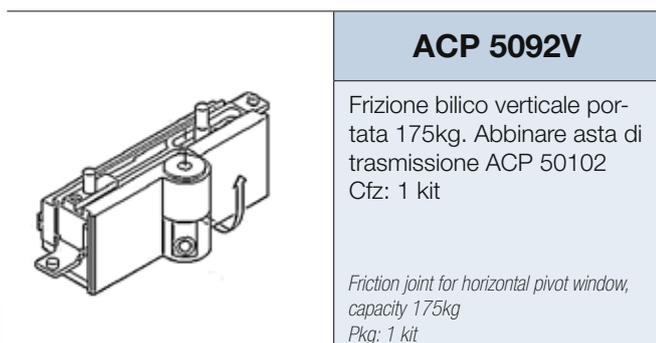

Frizione bilico orizzontale portata 175kg  
Cfz: 1 kit

*Friction joint for horizontal pivot window, capacity 175kg  
Pkg: 1 kit*

**ACP 50103**

Limitatore di apertura per frizioni bilico ACP 5092 e ACP 5092V  
Cfz: 1 pz

*Opening restrictor for pivot friction joint ACP 5092 and ACP 5092V  
Pkg: 1 pcs*

**ACP 5092V**

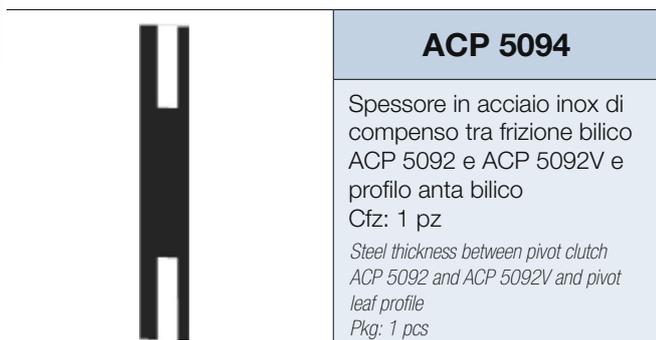

Frizione bilico verticale portata 175kg. Abbinare asta di trasmissione ACP 50102  
Cfz: 1 kit

*Friction joint for horizontal pivot window, capacity 175kg  
Pkg: 1 kit*

**ACP 50158**

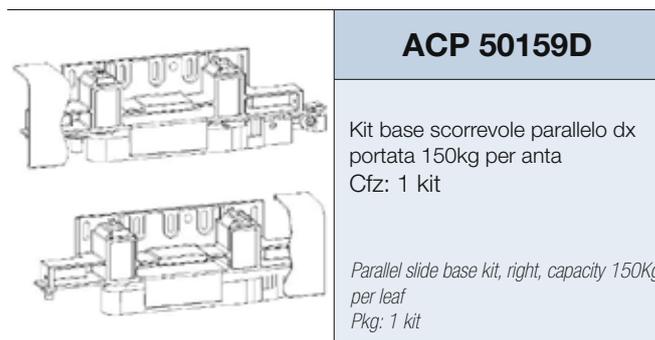

Kit chiusura 6 punti per bilico/scorrevole parallelo. Abbinare a ACP 5092 e ACP 5092V  
Cfz: 1 kit

*Pivot closer 6 locking piece set. Combined with ACP 5092 and ACP 5092V  
Pkg: 1 kit*

**ACP 5094**

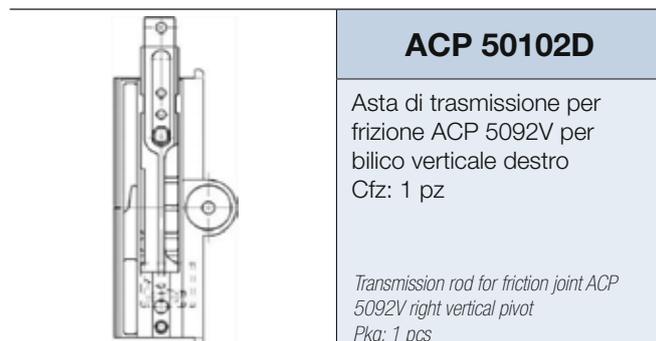

Spessore in acciaio inox di compenso tra frizione bilico ACP 5092 e ACP 5092V e profilo anta bilico  
Cfz: 1 pz

*Steel thickness between pivot clutch ACP 5092 and ACP 5092V and pivot leaf profile  
Pkg: 1 pcs*

**ACP 50159D**

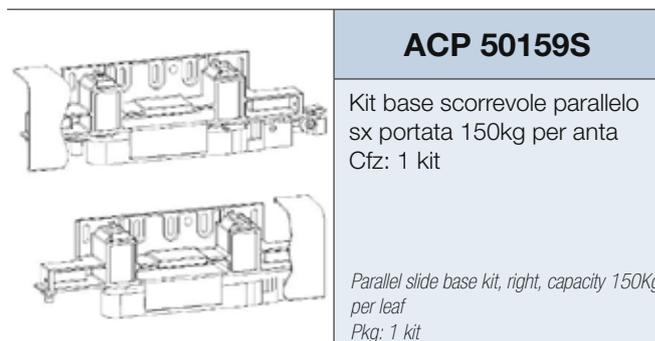

Kit base scorrevole parallelo dx portata 150kg per anta  
Cfz: 1 kit

*Parallel slide base kit, right, capacity 150Kg per leaf  
Pkg: 1 kit*

**ACP 50102D**

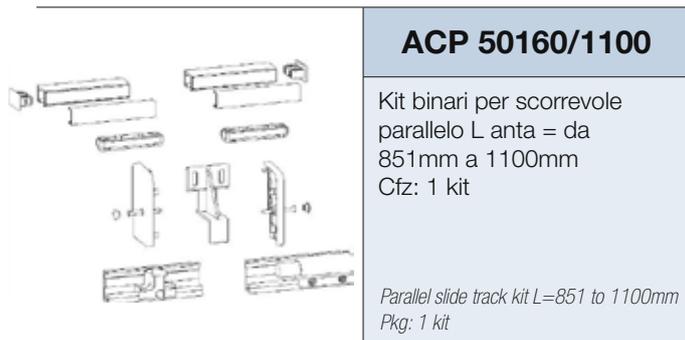

Asta di trasmissione per frizione ACP 5092V per bilico verticale destro  
Cfz: 1 pz

*Transmission rod for friction joint ACP 5092V right vertical pivot  
Pkg: 1 pcs*

**ACP 50159S**

Kit base scorrevole parallelo sx portata 150kg per anta  
Cfz: 1 kit

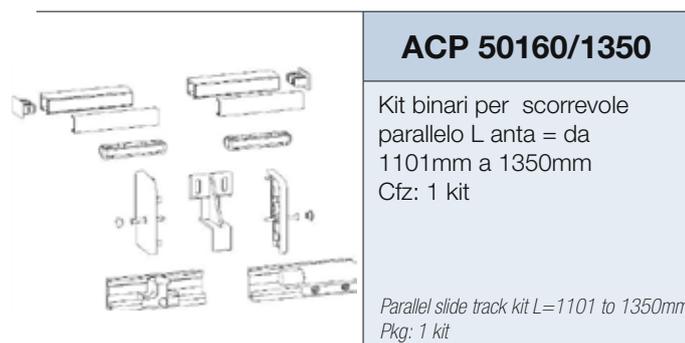

*Parallel slide base kit, right, capacity 150Kg per leaf  
Pkg: 1 kit*

## ACP 50160/1100

Kit binari per scorrevole  
parallelo L anta = da  
851mm a 1100mm  
Cfz: 1 kit

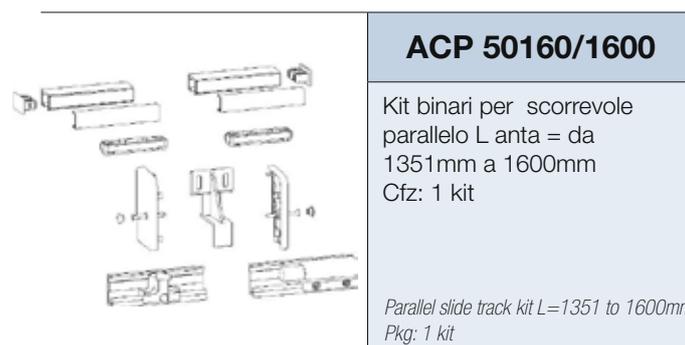

*Parallel slide track kit L=851 to 1100mm  
Pkg: 1 kit*

## ACP 50160/1350

Kit binari per scorrevole  
parallelo L anta = da  
1101mm a 1350mm  
Cfz: 1 kit

*Parallel slide track kit L=1101 to 1350mm  
Pkg: 1 kit*

## ACP 50160/1600

Kit binari per scorrevole  
parallelo L anta = da  
1351mm a 1600mm  
Cfz: 1 kit

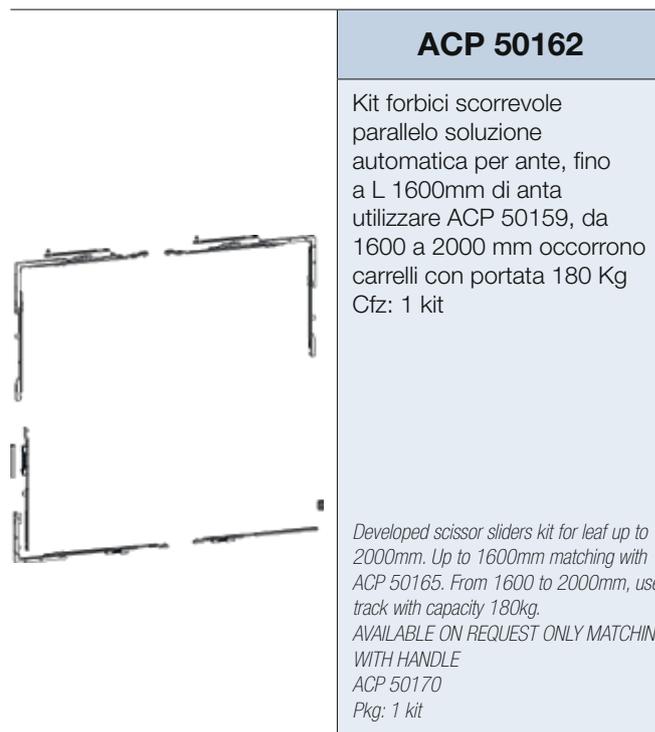

*Parallel slide track kit L=1351 to 1600mm  
Pkg: 1 kit*

## ACP 50161/1200

Kit forbici scorrevole  
parallelo soluzione manuale  
per ante fino a L 1200mm,  
abbinare ad ACP 50165  
Cfz: 1 kit

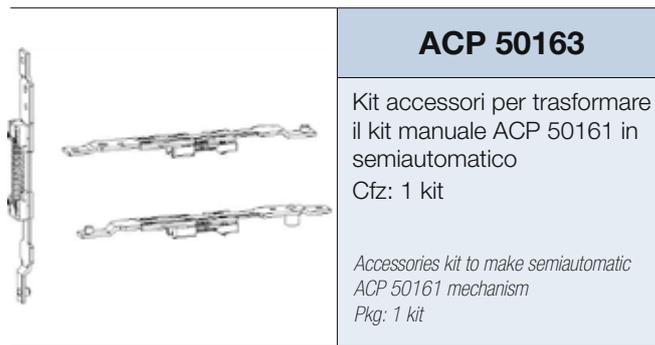

*Developed scissor sliders kit for leaf up to  
1200mm, matching with ACP 50165  
Pkg: 1 kit*

## ACP 50162

Kit forbici scorrevole  
parallelo soluzione  
automatica per ante, fino  
a L 1600mm di anta  
utilizzare ACP 50159, da  
1600 a 2000 mm occorrono  
carrelli con portata 180 Kg  
Cfz: 1 kit

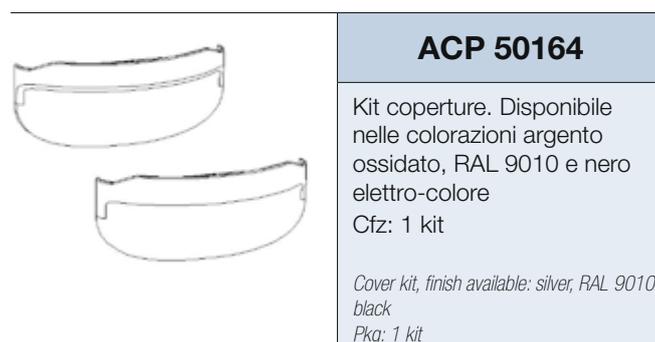

*Developed scissor sliders kit for leaf up to  
2000mm. Up to 1600mm matching with  
ACP 50165. From 1600 to 2000mm, use  
track with capacity 180kg.  
AVAILABLE ON REQUEST ONLY MATCHING  
WITH HANDLE  
ACP 50170  
Pkg: 1 kit*

## ACP 50163

Kit accessori per trasformare  
il kit manuale ACP 50161 in  
semiautomatico  
Cfz: 1 kit

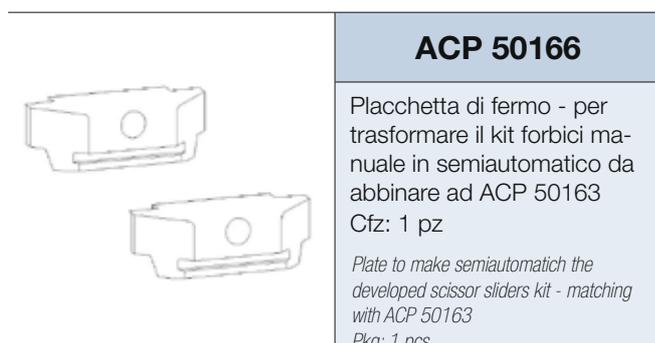

*Accessories kit to make semiautomatic  
ACP 50161 mechanism  
Pkg: 1 kit*

## ACP 50164

Kit coperture. Disponibile  
nelle colorazioni argento  
ossidato, RAL 9010 e nero  
eletto-colore  
Cfz: 1 kit

*Cover kit, finish available: silver, RAL 9010,  
black  
Pkg: 1 kit*

## ACP 50166

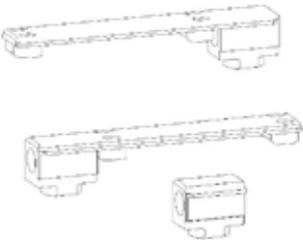

Placchetta di fermo - per  
trasformare il kit forbici ma-  
nuale in semiautomatico da  
abbinare ad ACP 50163  
Cfz: 1 pz

*Plate to make semiautomatic the  
developed scissor sliders kit - matching  
with ACP 50163  
Pkg: 1 pcs*

**MCT PL 44 PT**

Gruppo frese per serie Planet 72 Plus

*Cutting machine for the Planet 72 Plus serie*

**MCT PL 14460**

Punzonatrice completa per eseguire tutte le lavorazioni specifiche delle serie: Planet 45, 50 PLUS, 62 PLUS, 72 PLUS, Nathura70, 82, 92 Matic 50 PLUS, 62 PLUS, 72 PLUS, Elite door 72, telai Slide 80/160, Slidewood 160

*Full punching for machining for: Planet 45, 50TT, 62TT, 72HT Nathura70, 82, 92, Matic 50 plus, 62 plus, 72 plus, Elite Door 72 and Slide 80/106, Slidewood 160*

**MCT PL 319 06 35**

Punzonatrice portatile per fare il foro 3 mm nelle ante per poter spinare le squadrette ACP 50153 e ACP 50154

*Portable punching machine for making the 3mm hole in the leaf for broaching the brackets ACP 50153 and ACP 50154*

**MCT PL 350 431/45**

Fresa per intestatura fermavetri arrotondati qualora si volessero tagliare a 45° senza utilizzare gli angoletti. Il kit è utilizzabile sulle intestatrici EM140G

*Cutter stack for rounded glazing beads when a 45° cut is desired without using the angles the kit can be used on EM140G milling machines*

**MCT PL JOLLY**

Punzonatrice parziale per eseguire tutte le lavorazioni specifiche della serie Planet: 45, 50TT, 62TT, Matic, Elite Door e parziali Nathura, Slide, squadrette e aerazione vetro su anta

*This punching machine performs all the specific machining for the Planet range: 45, 50TT, 62TT, Matic, Elite Door and partials Nathura and Slide*

**MCT PL 402 01 96**

Polmoncino per lavorazione squadretta a spinare Planet

*Pneumatic machine for machining brackets to be pinned of the Planet range*

**MCT PL 402 01 98**

Polmoncino per lavorazione squadretta con pulsante da 10,5 mm

*Pneumatic machine for machining brackets with pushbutton 10.5mm*

**MCT PL PL01**

Punzonatrice per fare il foro 3 mm nell'anta per poter spinare ACP 50153 e ACP 50154

*Punching machine for making the 3 mm hole in the leaf for broaching ACP 50153 and ACP 50154*

**MAC 210 SC**

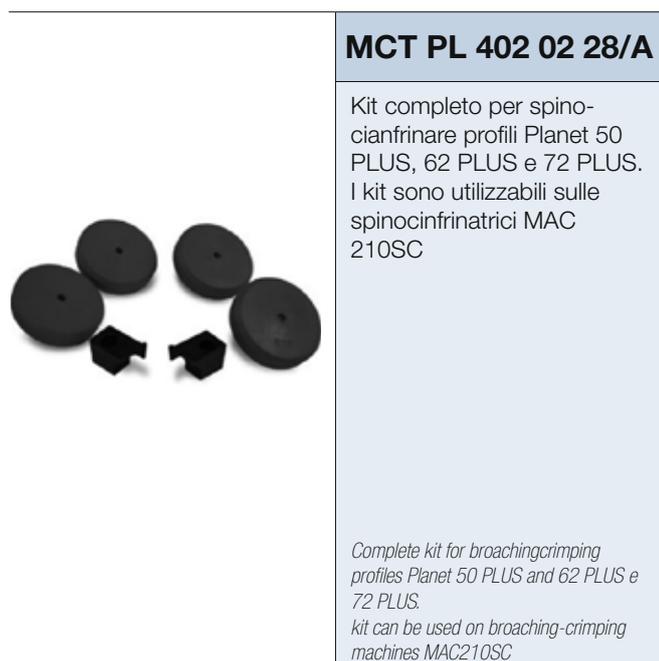

Spino cianfrinatrice pneumatica universale

*Pneumatic crimping machine*

**MCT PL CIANFRINA**

Coppia di coltelli per cianfrinare la serie Planet

*Pair of blades for crimping the Planet range*

**MCT PL 402 02 28/A**

Kit completo per spino-cianfrinare profili Planet 50 PLUS, 62 PLUS e 72 PLUS. I kit sono utilizzabili sulle spinocinfrinatrici MAC 210SC

*Complete kit for broaching/crimping profiles Planet 50 PLUS and 62 PLUS e 72 PLUS. kit can be used on broaching-crimping machines MAC210SC*

**EM 140G**

Intestatrici per fermavetri arrotondati con morsa e gruppo frese

*Glazing bead fixing machine*

**MCT PL 400 03 63**

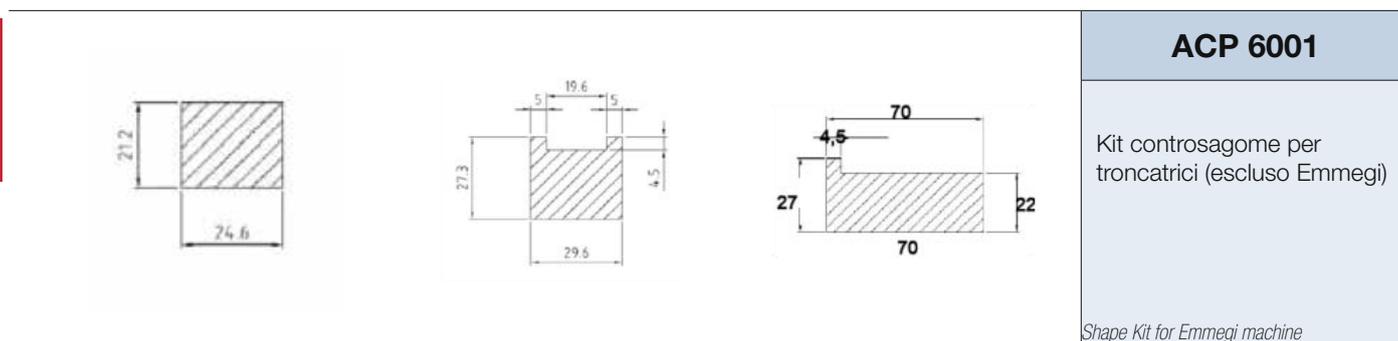

Controsagoma per intestatura fermavetri arrotondati qualora si volessero tagliare a 45° senza utilizzar gli angoletti. Il kit è utilizzabile sulle intestatrici EM140G

### Inserimento squadrette ACP 50153 - ACP 50154

Inserire la squadretta e chiudere l'angolo scegliendo tra le seguenti opzioni:

*Application ACP 50153 - 50154. Insert corner cleat and close the corner by choosing from the following options:*

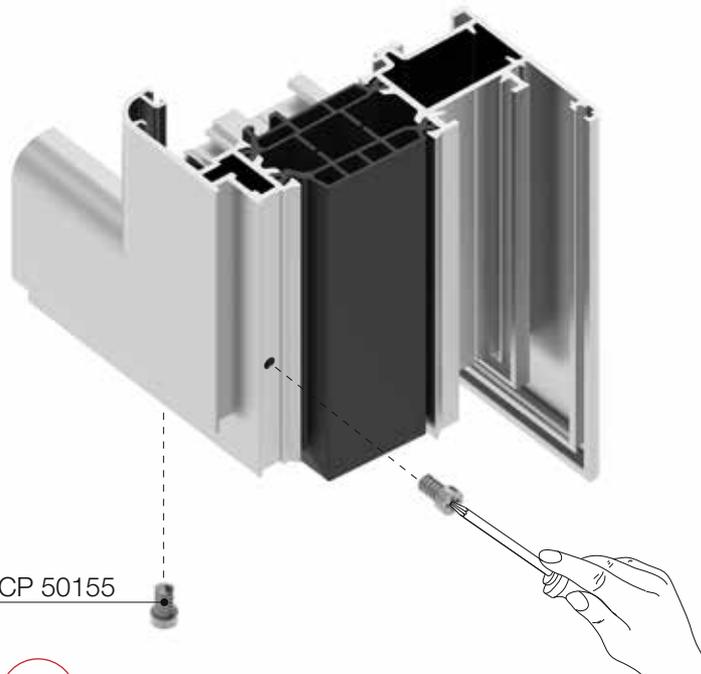

- 1 cianfrinatura tramite l'apposito kit  
*crimping using the appropriate kit*

- 2 spinatura tramite la spina ACP 5030, con impugnatura a perdere, foro Ø3 di punzonatrice  
*broaching using pin ACP 5030 with disposable stem, Ø3 hole by punching machine*

INTERASSE FORO: 32,3mm  
*hole centre distance: 32,3mm*

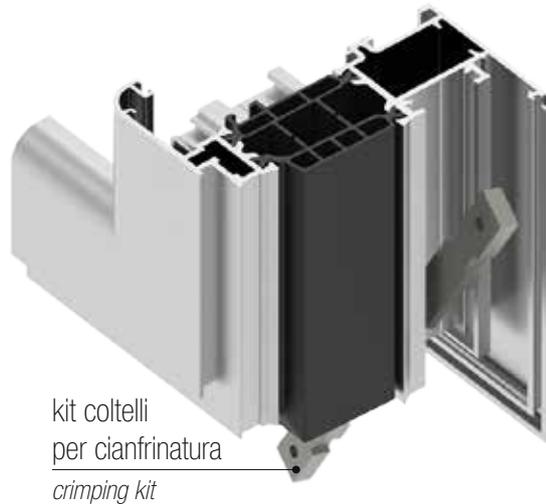

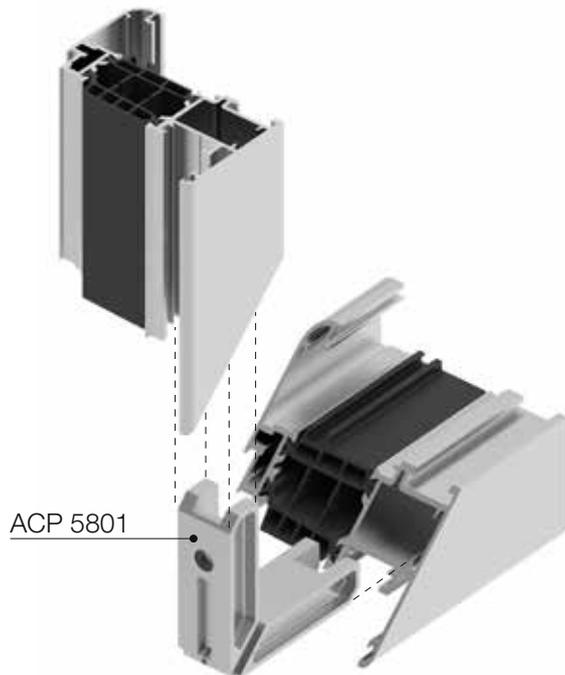

- 3 avvitatura con vite ACP 50155 foro Ø4 di punzonatrice (non può essere utilizzata sui profili telaio)  
*screwing with screw ACP 50155, Ø4 hole by punching machine (cannot be used on frame profiles)*

## 29

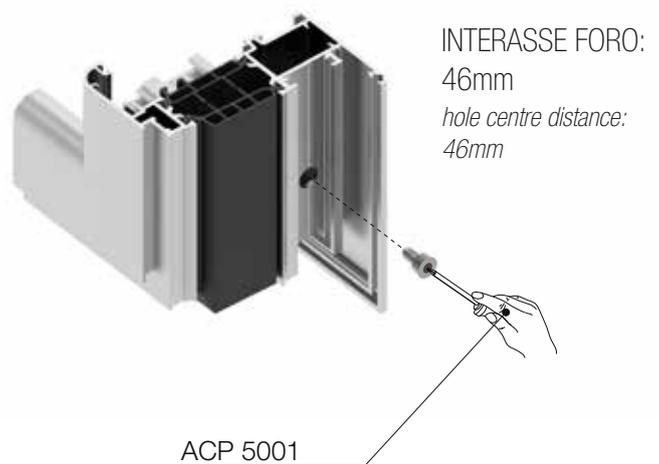

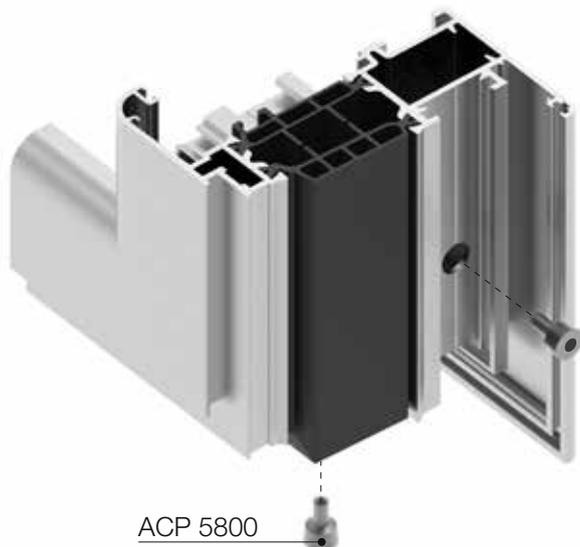

## Applicazione ACP 5801 - ACP 5802 - ACP 7001

Inserire la squadretta e chiudere l'angolo scegliendo tra le seguenti opzioni:

*Application ACP 5801 - ACP 5802 - ACP 7001. Insert corner cleat and close the corner by choosing from the following options:*

- 1 cianfrinatura tramite l'apposito kit  
*crimping using the appropriate kit*

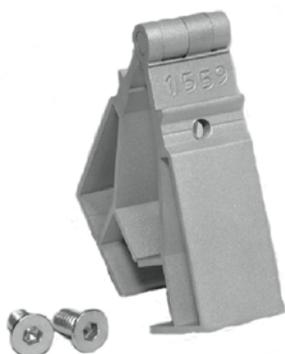

- 2 spinatura tramite la spina ACP 5800, foro Ø8 di punzonatrice  
*broaching using pin ACP 5800, Ø8 hole by punching machine*

- 3 avvitatura con vite ACP 5001, foro Ø8 di punzonatrice  
*screwing with screw ACP 5001, Ø8 hole by punching machine*  
Dare un giro per lato, fino a che la testa della vite va  
A FILO PROFILO

### Lavorazioni fori per montaggio squadretta maggiorata angolo variabile ACP 5506

Assembly oversize adjustable corner cleat ACP 5506

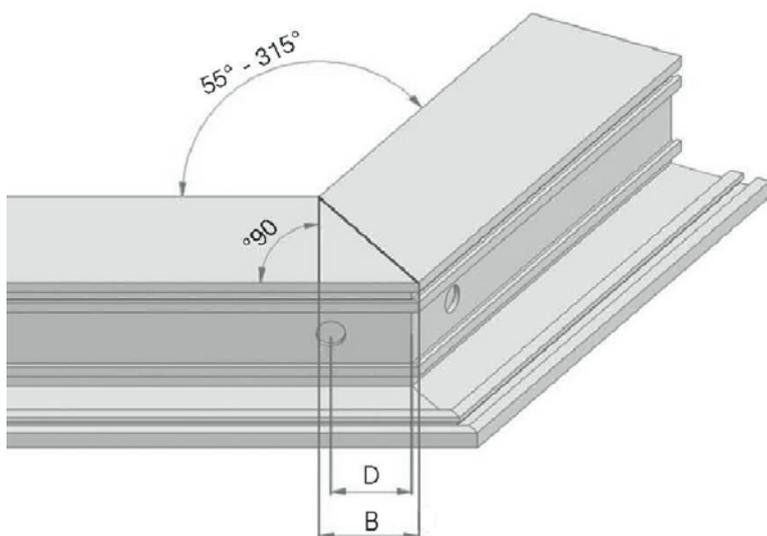

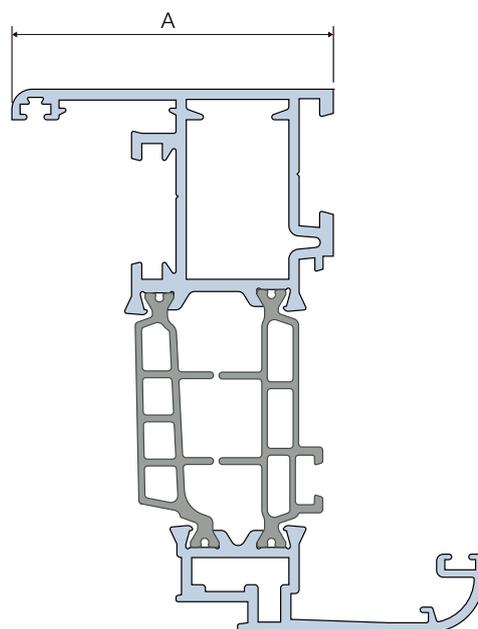

#### PROCEDURA PER ACP 5506

- stabilito l'angolo di taglio del profilo misurare la quota B
- eseguire il calcolo come suggerito nella formula in basso
- visto l'ampio campo di regolazione delle squadrette, la misura ottenuta può essere arrotondata + o - al mm

#### PROCEDURE FOR ACP 5506

- identify the cut angle, gauge the dimension B
- make calculations (as the bottom formula)
- the obtained value can be round off + or - mm

Per calcolare l'asse di foratura

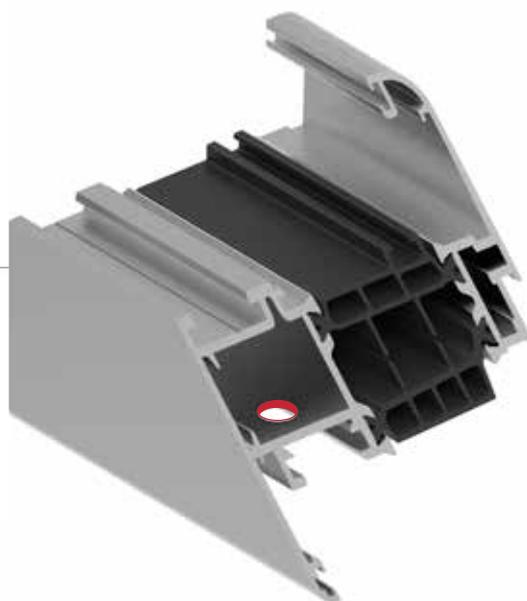

$$D = 25 + (7 \times B \div A)$$

A = larghezza profilo

B = proiezione (a 90°) vertice interno su lato esterno

Esempio con B = 35 mm A = 50 mm

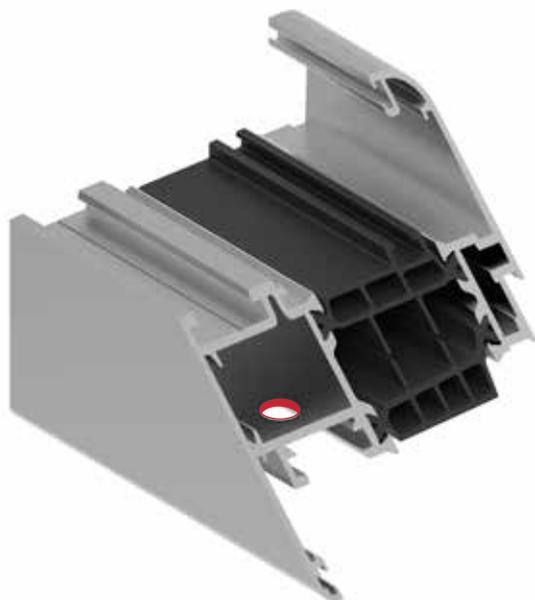

$$D = 25 + (7 \times 35 \div 50) = 30 \text{ mm}$$

## 31

## Lavorazione fori per montaggio squadrette angolo variabile ACP 5504/ ACP 5805

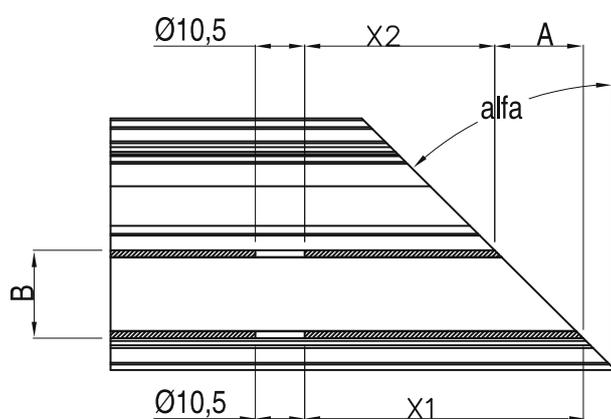

Machining of holes to fit variable corner brackets ACP 5504/ ACP 5805

**PROCEDURA PER ACP 5504**

- stabilito l'angolo di taglio del profilo, misurare la quota A o determinarla in linea teorica applicando la seguente formula:  
 $A = B \times \tan(\text{alfa})$
- sommare o detrarre al coefficiente C la metà della quota A (prima determinata) per ottenere la distanza di foratura X1 esterna oppure X2 per la distanza interna
- visto l'ampio campo di regolazione delle squadrette, la misura ottenuta può essere arrotondata + o - al mm

**PROCEDURE FOR ACP 5504**

- once the profile cut angle has been established, measure value A or determine it theoretically by applying the following formula:  $A = B \times \tan(\text{alfa})$
- add to or subtract from the coefficient C half of value A (previously determined) to obtain the external drilling distance X1 the internal drilling distance X2
- the obtained value can be round off + or - mm

**PROCEDURA PER ACP 5805**

Per questa squadretta valgono le stesse regole per il calcolo di A, mentre per X1 il coefficiente da aggiungere è sempre 41mm

PERTANTO:  $X1 = A + 41$

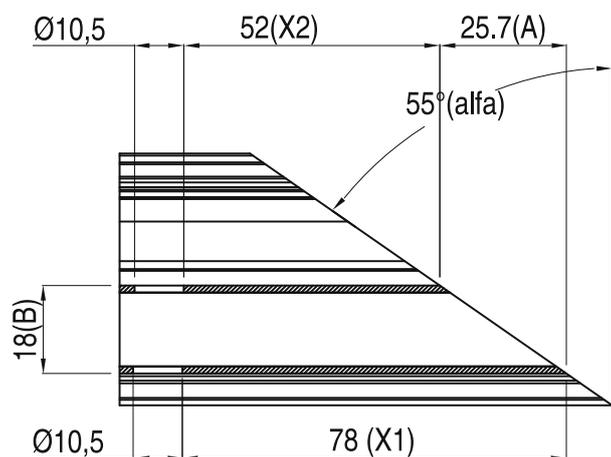

**PROCEDURE FOR ACP 5805**

For this bracket the same rules apply for the calculation of A, whereas for X1 the coefficient to be added is always 41mm. Therefore:  $X1 = A + 41$

Angolo = alfa	Angle = alfa
$A = B \times \tan(\text{alfa})$	$A = B \times \tan(\text{alfa})$
$C = 65$	$C = 65$
$X1 = C + (A/2)$	$X1 = C + (A/2)$
$X2 = C - (A/2)$	$X2 = C - (A/2)$

Esempio con angolo di taglio alfa = 55°

Example of alpha cutting angle = 55°

Angolo = 55

$A = 18 \times (\tan \text{ di } 55)$

$C = 65$  (art.0910.10)

$X1 = 65 + (25.71/2) = 77.85$  circa

$X2 = 65 - (25.71/2) = 52.15$  circa

arrotondare

$X1 = 78$

$X2 = 52$

Angle = 55

$A = 18 \times (\tan \text{ of } 55)$

$C = 65$  (art.0910.10)

$X1 = 65 + (25.71/2) = 77.85$  approximately

$X2 = 65 - (25.71/2) = 52.15$  approximately

round up/down

$X1 = 78$

$X2 = 52$

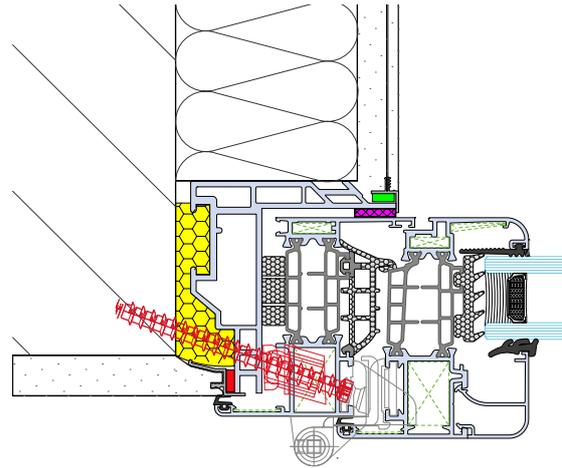

## 32

### Regolo a muro obliquo

*Sloping wall spacer*

Per un corretto e sicuro fissaggio al controtelaio occorre sempre utilizzare il regolo a muro. Sui telai Planet, a tubularità normale si può utilizzare il regolo obliquo che evita le spaccature dell'intonaco dovute ad un fissaggio troppo periferico causato dai normali regoli.

*For a correct and safe fixing to the counter-frame it is always necessary to use the wall spacer. The sloping spacer can be used on Planet frames with a standard chamber. This spacer prevents the plaster from cracking as a result of too peripheral a fixing caused by normal guides.*

#### ACP 50536

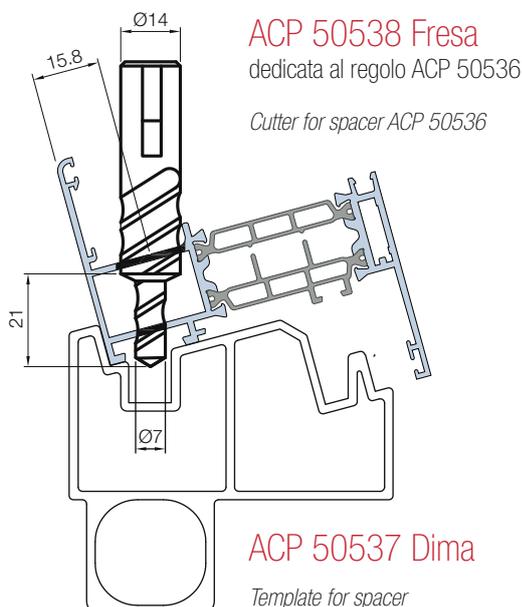

#### Regolo obliquo in zama

*Zama sloping spacer*

Forare la tubularità del telaio con la fresa ACP 50538, utilizzando come base d'appoggio la dima ACP 50537

*Make a hole in the tubularity of the frame with the cutter ACP 50538, using template ACP 50537 as a support base*

Utilizzare su finestre con dimensioni max 2 mq

#### ACP 50539

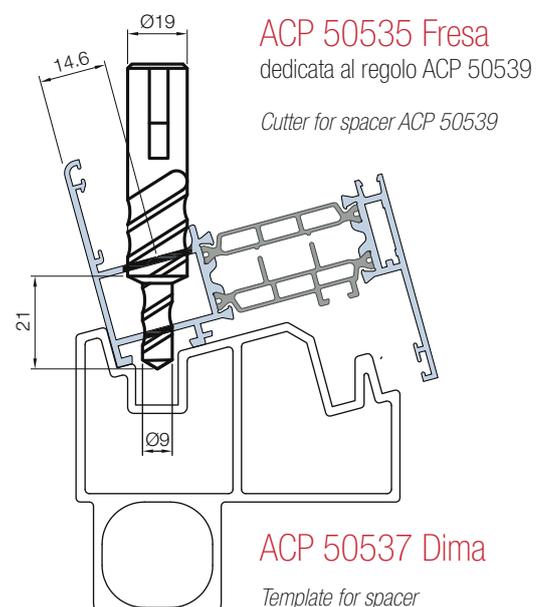

#### Regolo obliquo in nylon per turboviti

*Nylon sloping spacer*

Forare la tubularità del telaio con la fresa ACP 50535, utilizzando come base d'appoggio la dima ACP 50537

*Make a hole in the tubularity of the frame with the cutter ACP 50535, using template ACP 50537 as a support base*

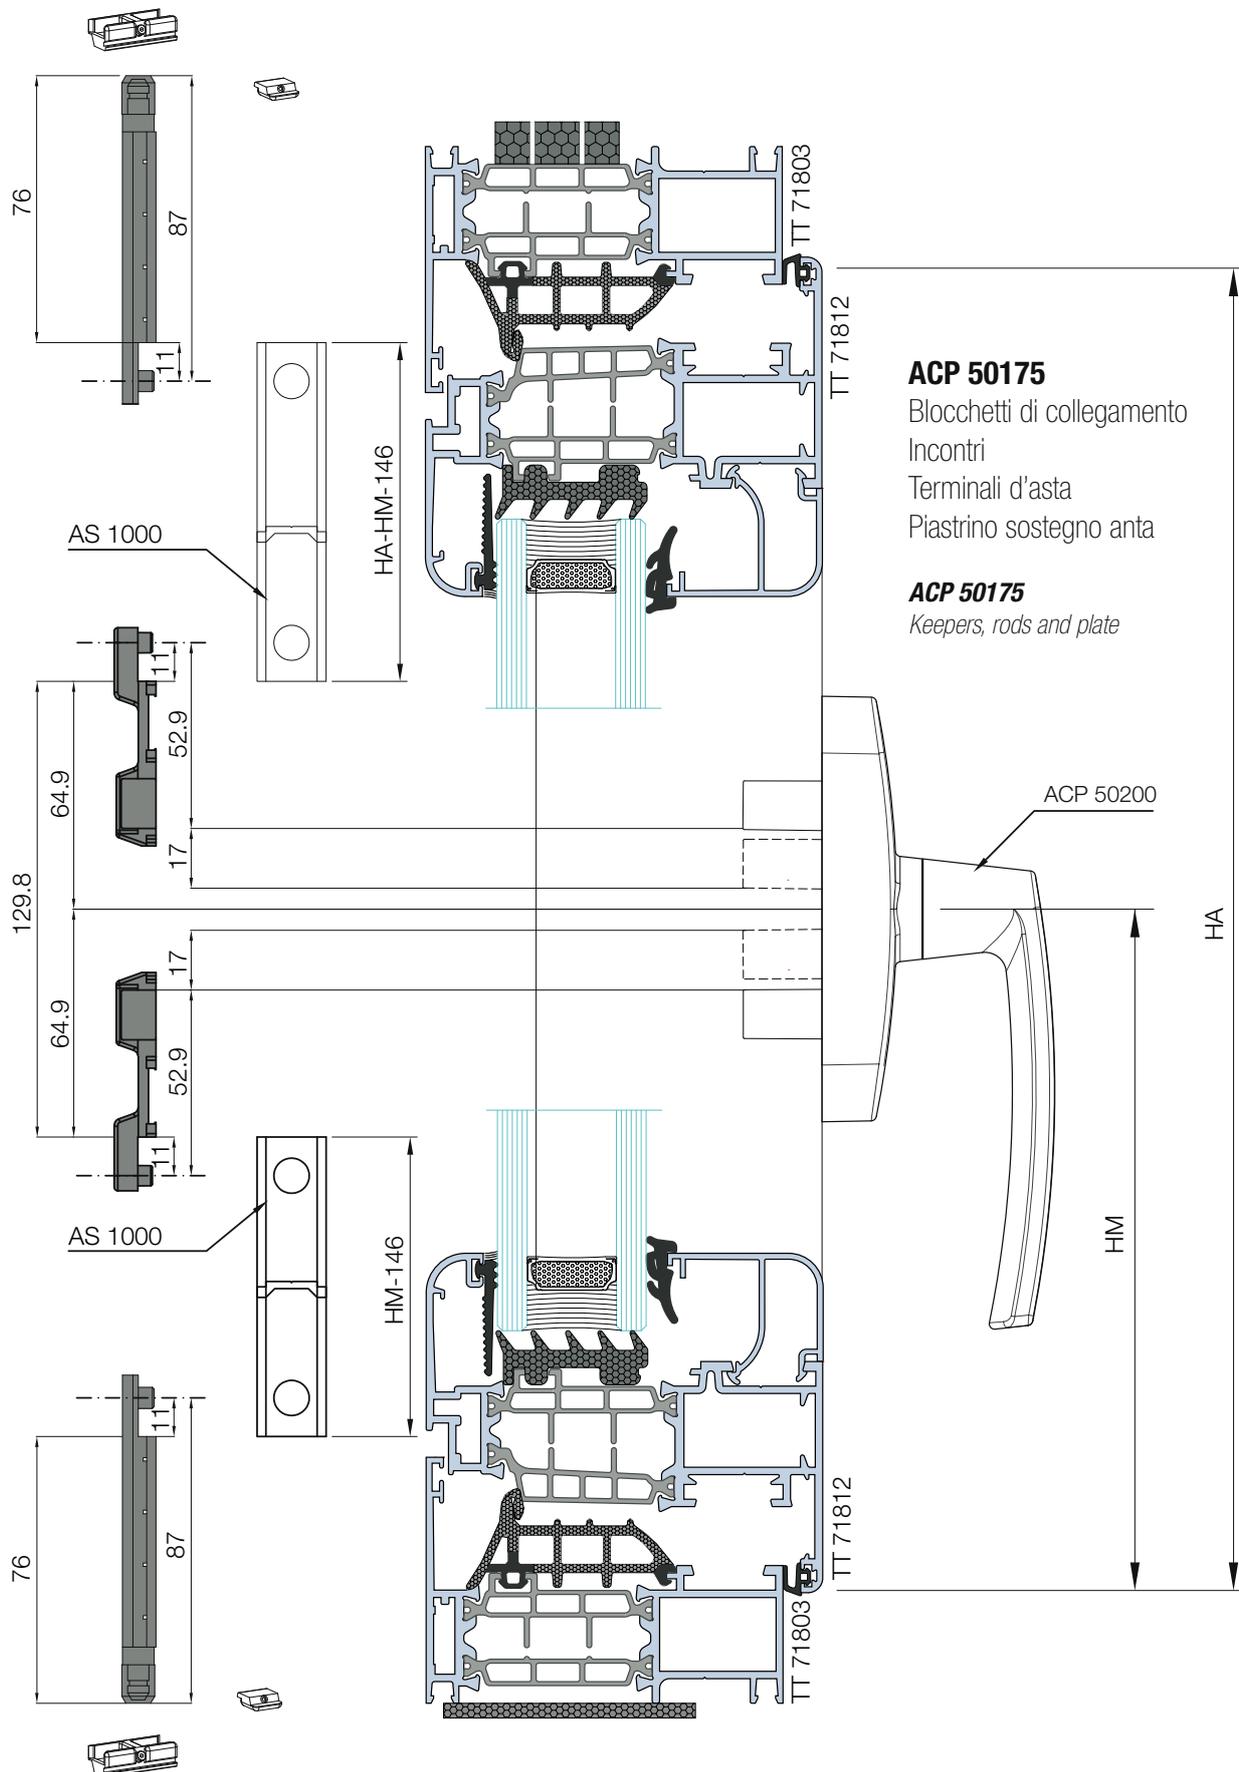

Utilizzare su finestre con dimensioni > 2 mq

# 33

## Lavorazione taglio astina per kit ACP 50175

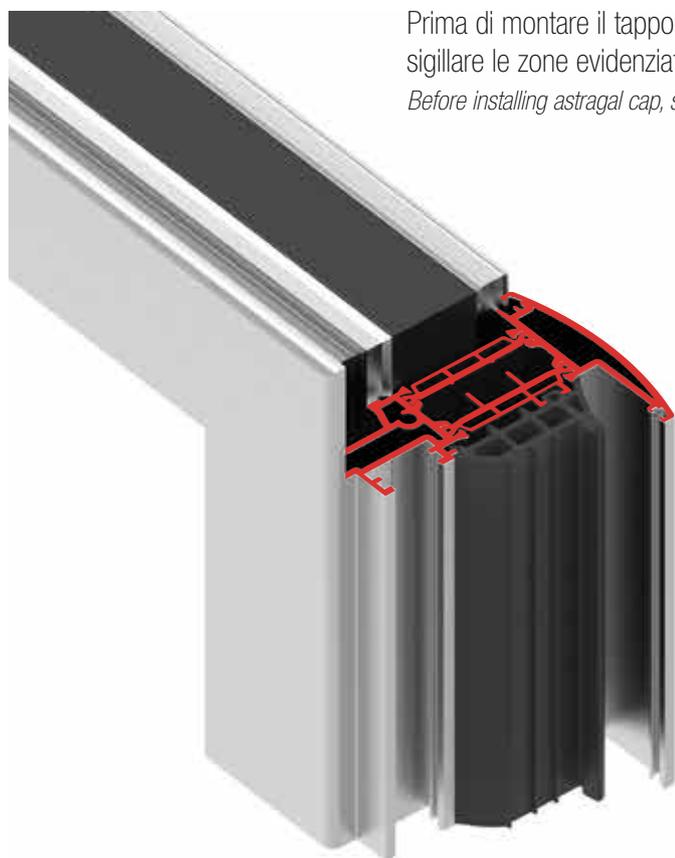

Leaf closure rod cutting for ACP 50175

## 34

### Montaggio tappo riporto centrale ACP 72179

*Fitting the central connection profile cap*

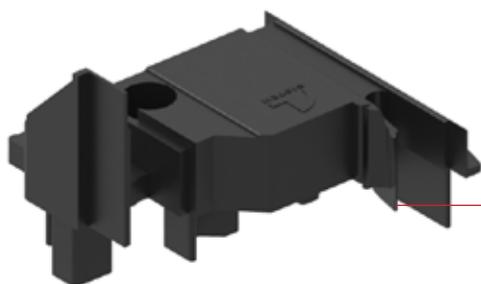

Prima di montare il tappo riporto centrale occorre sigillare le zone evidenziate nel disegno  
*Before installing astragal cap, seal areas shown on drawing*

Avvitare con vite TC-CE4,8  
*Screwing with screw TC-CE4,8*

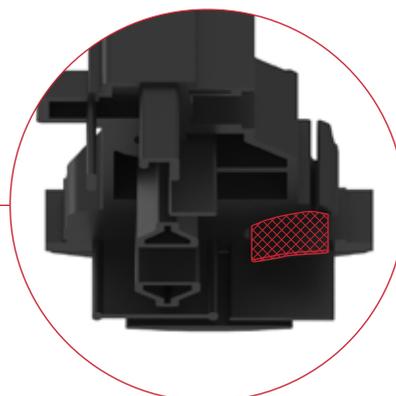

Dopo aver inserito il tappo, accostare la pinna centrale incollando la zona di contatto, come evidenziato nell'immagine sotto

*After fitting the cap, place the central fin, gluing the contact area*

ACP 72179

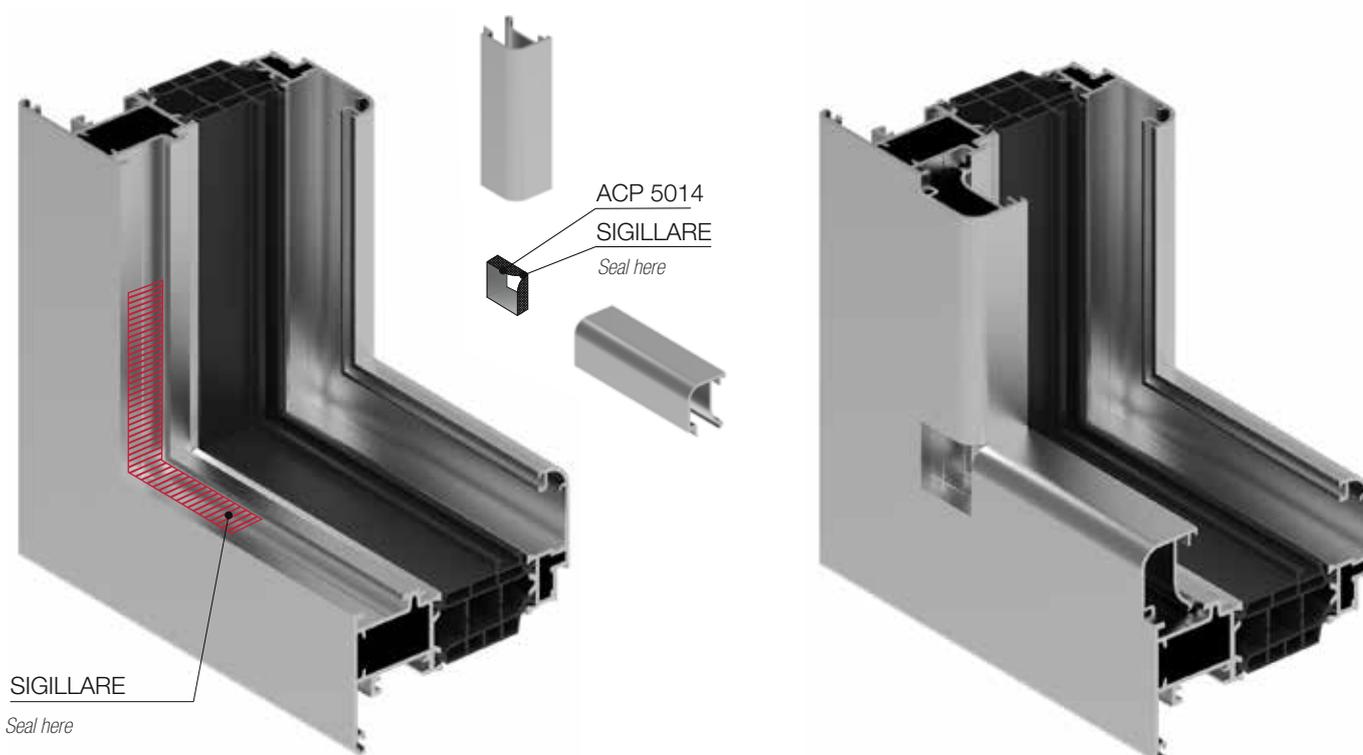

## 35

### Montaggio angolino fermavetri ACP 5014

Prima di montare l'angolino occorre sigillare la sede del fermavetro nell'angolo e le giunzioni con i fermavetri

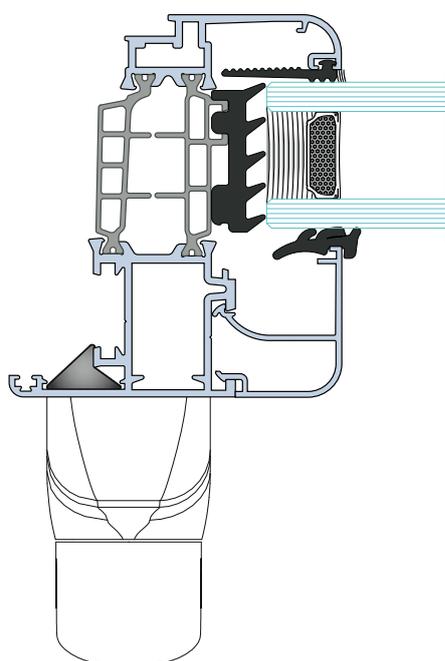

*ACP 5014 assembly. Gluing the contact area before assembly ACP 5014*

## 36

### Montaggio piastrino antirollio cremonese Aurora ACP 50200

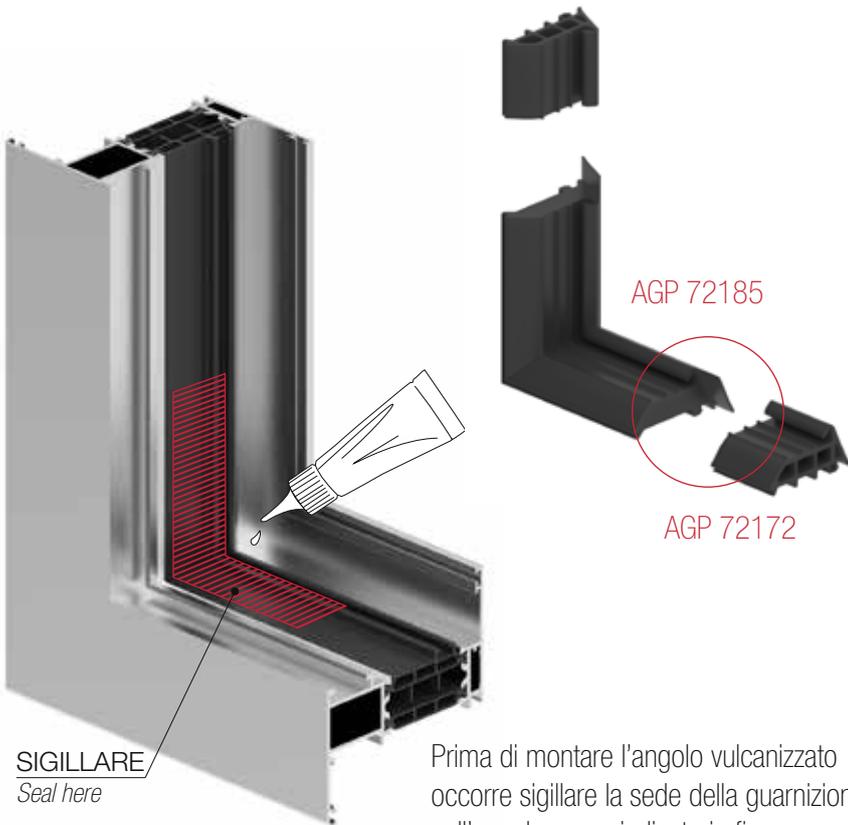

*Assembly of anti-roll plate for cremonese Aurora ACP 50200*

## 37

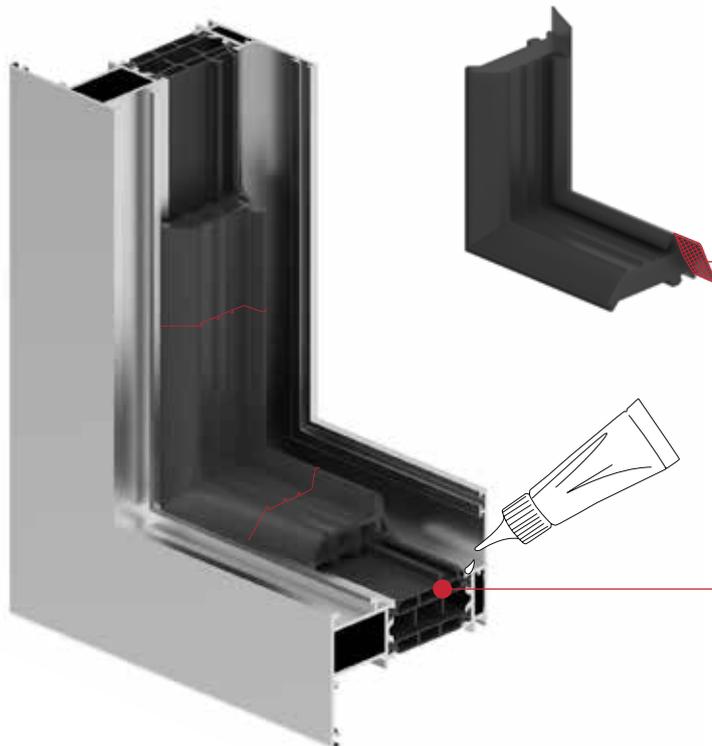

### Montaggio angolo vulcanizzato AGP 72185 e AGP 4085

*Assembly for vulcanized corner*

**SIGILLARE**  
*Seal here*

Prima di montare l'angolo vulcanizzato occorre sigillare la sede della guarnizione nell'angolo come indicato in figura  
*Before assembling the vulcanized corner, seal the gasket housing in the corner*

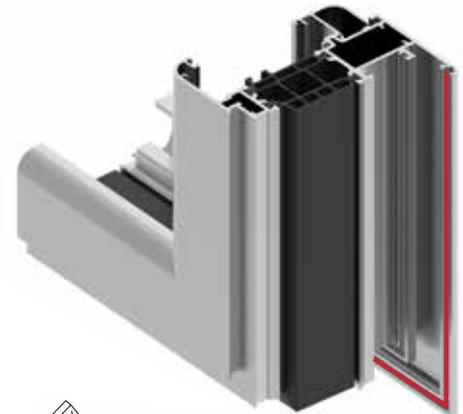

Dopo aver montato l'angolo vulcanizzato accostare la pinna incollando la zona di contatto

*After assembling the vulcanized corner, place the fin, gluing the contact area*

#### ATTENZIONE

Sequenza valida anche per sigillare l'angolo vulcanizzato AGP 4085 e guarnizione AGP 4000

*Sealing AGP 4085 AND AGP 4000 like in the description for AGP 62185*

AGP 4085

inserire la guarnizione nella sede appropriata (indicata in rosso)  
*insert the gasket in the correct position*

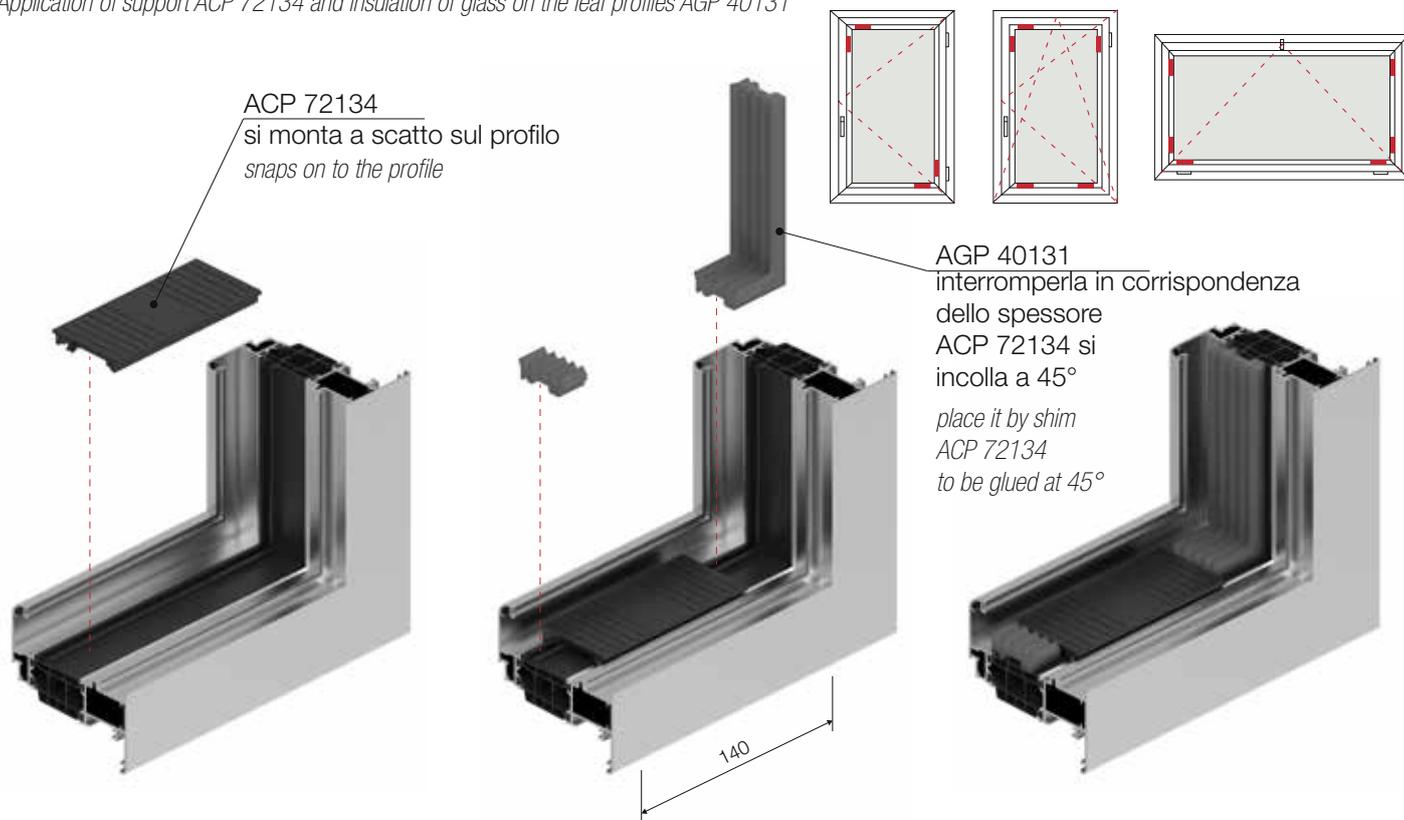

Sul traverso inferiore del telaio praticare un cordolo di sigillante sotto la guarnizione centrale e per tutta la lunghezza del traverso

*Make a sealing bead under the central gasket along the whole length of the sill transom frame*

## 38

## Applicazione supporto ACP 72134 e isolamento vetro AGP 40131 sui profili anta

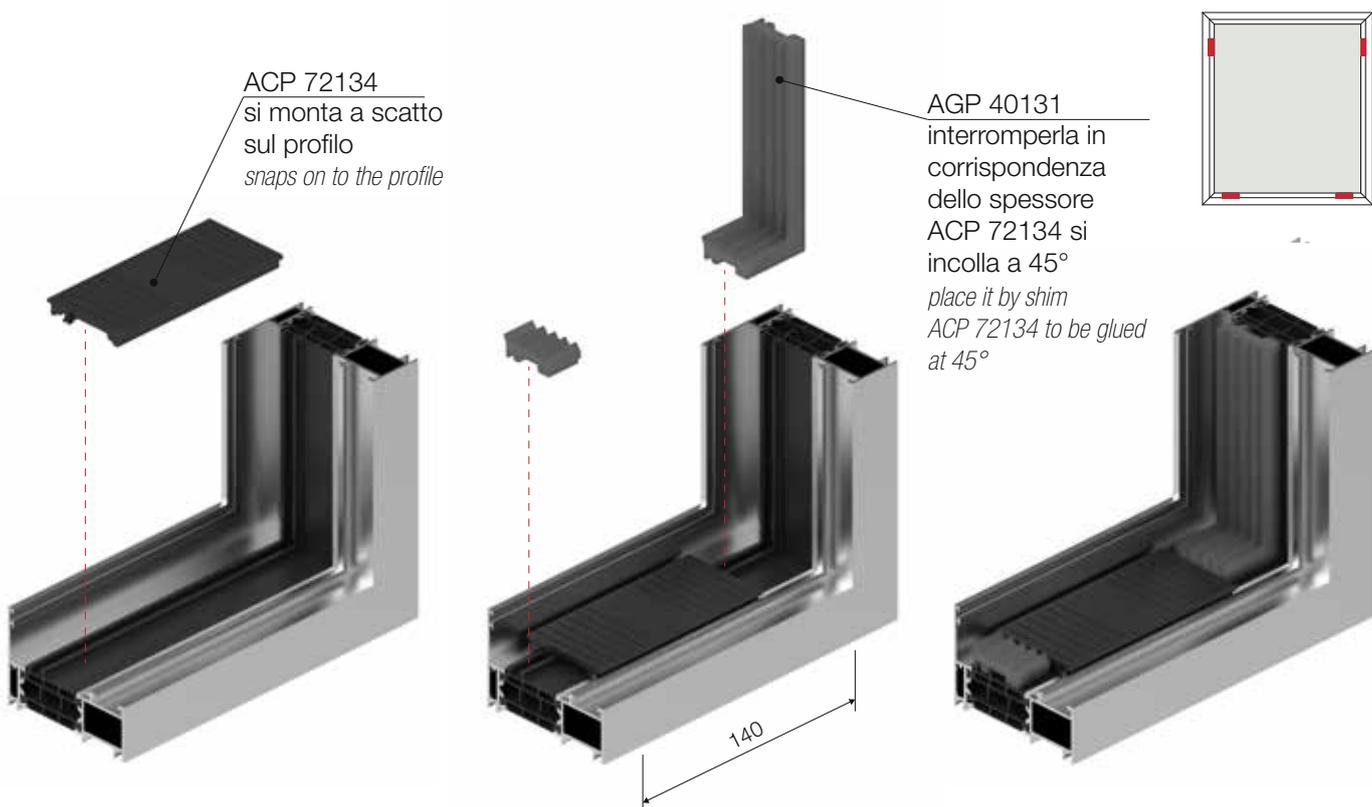

Application of support ACP 72134 and insulation of glass on the leaf profiles AGP 40131

## 39

## Applicazione supporto e isolamento vetro sui profili telaio nel caso di specchiature fisse

Application of support and insulation of glass on the frame profiles in the case of fixed glass

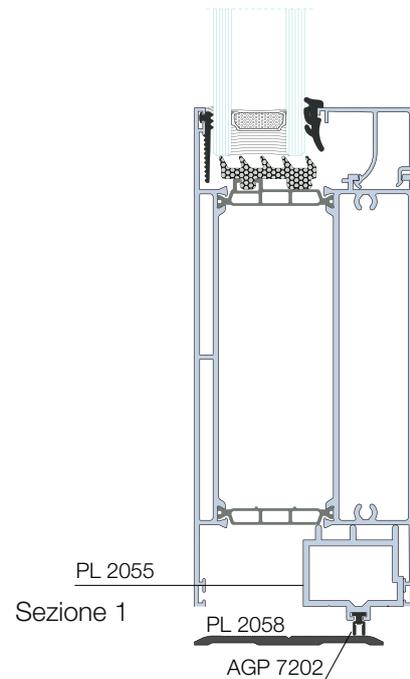

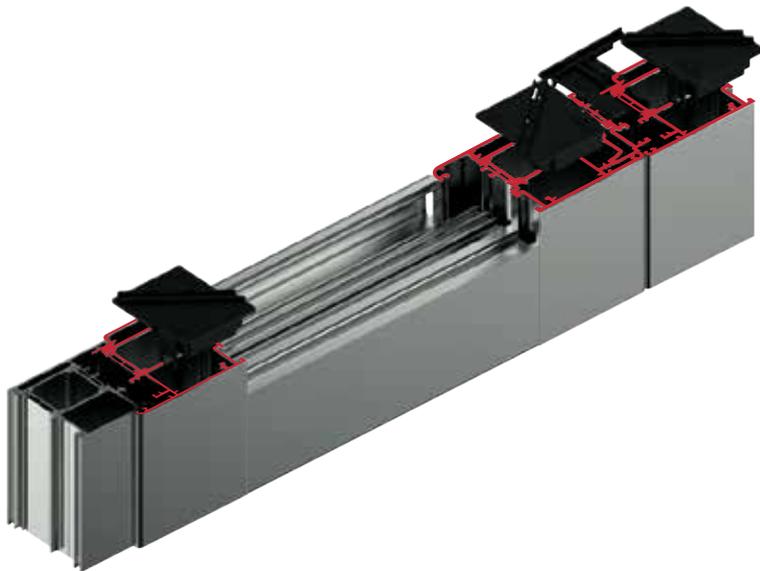

## 40

### Applicazione tappi sottoporta ACP 7272, ACP 7273 e ACP 7274

I tappi ACP 7272, ACP 7273 e ACP 7274 consentono di mantenere una tenuta continua anche sotto il montante dell'anta e del riporto centrale grazie all'apposita sede che permette l'inserimento dello spazzolino. Utilizzando la soglia calpestabile PL 2058 lo spazzolino assumerà la posizione di lavoro solo in chiusura evitando di danneggiare la pavimentazione. Lo spazzolino può essere sostituito dalla guarnizione AGP 7202 come indicato nella sezione 1.

*Applying under door cap ACP 7272, ACP 7273 e ACP 7274*

*The caps ACP 7272, ACP 7273 e ACP 7274 allow you to keep a continuous seal even under the leaf's mullion and the astragal using the appropriate venue that allows the insertion of the floor-brush. Using the floor threshold PL 2058, the brush will work in the right position only in closing to avoid the floor's damage. The brush can be replaced by the gasket AGP 7202 as described in section 1.*

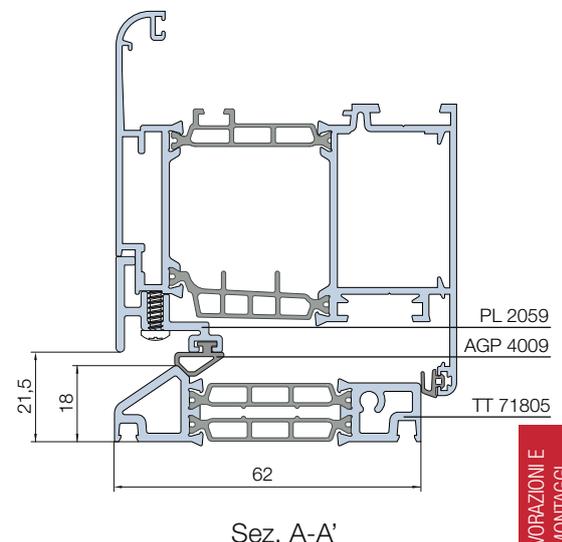

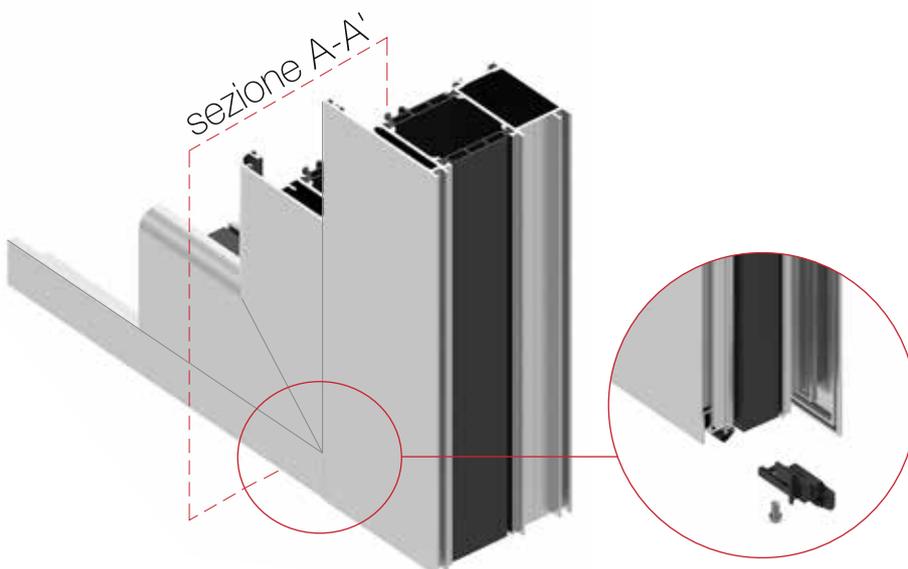

## 41

### Applicazione tappo terminale sottoporta ACP 50115

Nuovo tappo terminale per porte che prevedono l'anta a girare come traverso inferiore a pavimento al posto dello zoccolo. Il tappo terminale (destra e sinistra) è stato creato per rendere l'infisso ermetico in quanto darà continuità tra la guarnizione di battuta (AGP 4009) e quella giunto aperto presente sui montanti del telaio. Non saranno pertanto necessari i 2 angoli vulcanizzati inferiori. Il tappo andrà inserito e successivamente avvitato al profilo porta spazzolino PL 2059, come indicato nelle immagini qui sotto.

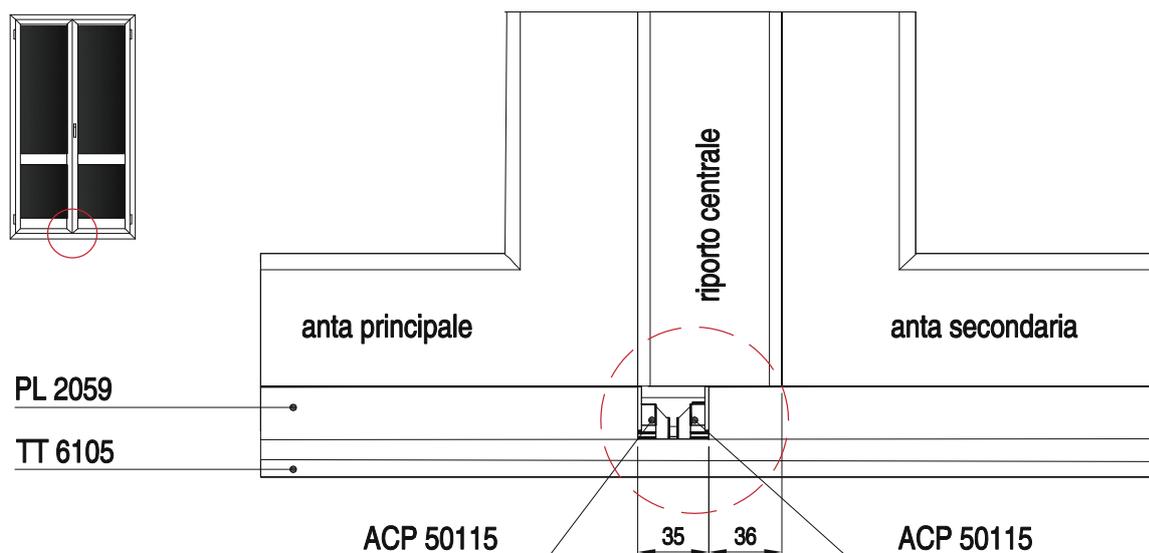

*ACP 50115: floor door cap*

*New cap for turn+leaf+doors wich provide the leaf as sill in place of the base. The end cap (right and left) was created to make the system more hermetic as it will give continuity between the gasket (AGP 4009) and the mullion's fin seal. Therefore it won't need two vulcanized corner. The cap will be inserted and screwed on toothbrush holder profile PL 2059, as illustrated in the pictures below.*

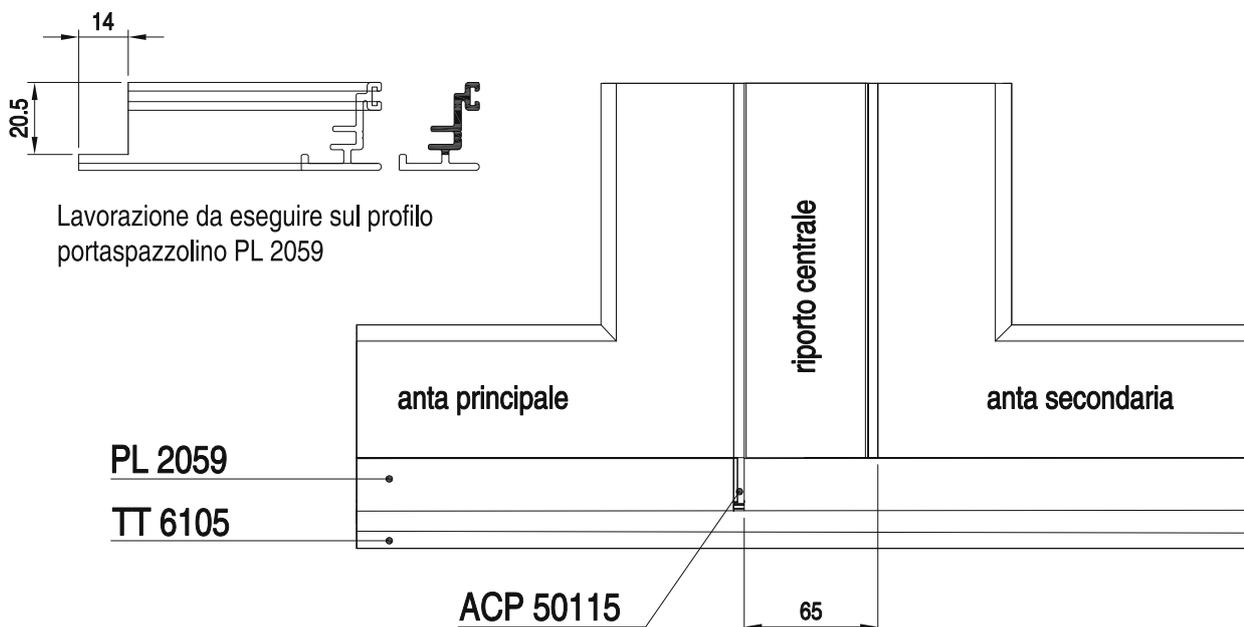

Nel nodo centrale dell'infisso a 2 ante è possibile adottare 2 differenti soluzioni in base alle proprie esigenze. La soluzione ermetica prevede l'inserimento del tappo ACP 50115 su entrambe le ante, creando però una zona centrale con i tappi a vista da 35x30mm, come evidenziato nel disegno qui sotto.

*In 2-leaf window central section can use two different solutions according to your needs. The hermetic solution provide for application the cap ACP 50115 on both leaves, however, it makes a central area with 35x30mm plug in view, as shown in the below figure.*

Nella soluzione estetica, grazie allo scasso di 20,5x14mm, il profilo portaspazzolino PL 2059 arriva a filo del riporto centrale, come evidenziato nel disegno qui sotto. Il tappo ACP 50115 va inserito solo sull'anta principale. Utilizzando questa soluzione c'è il rischio di minime infiltrazioni di aria e acqua.

*In aesthetic solution, thanks to the space 20,5x14mm, the brush holder PL 2059 profile is flush the astragal, as shown in the below figure. The cap ACP 50115 is inserted in the main leaf. Using this solution you risk a little air and water infiltration.*

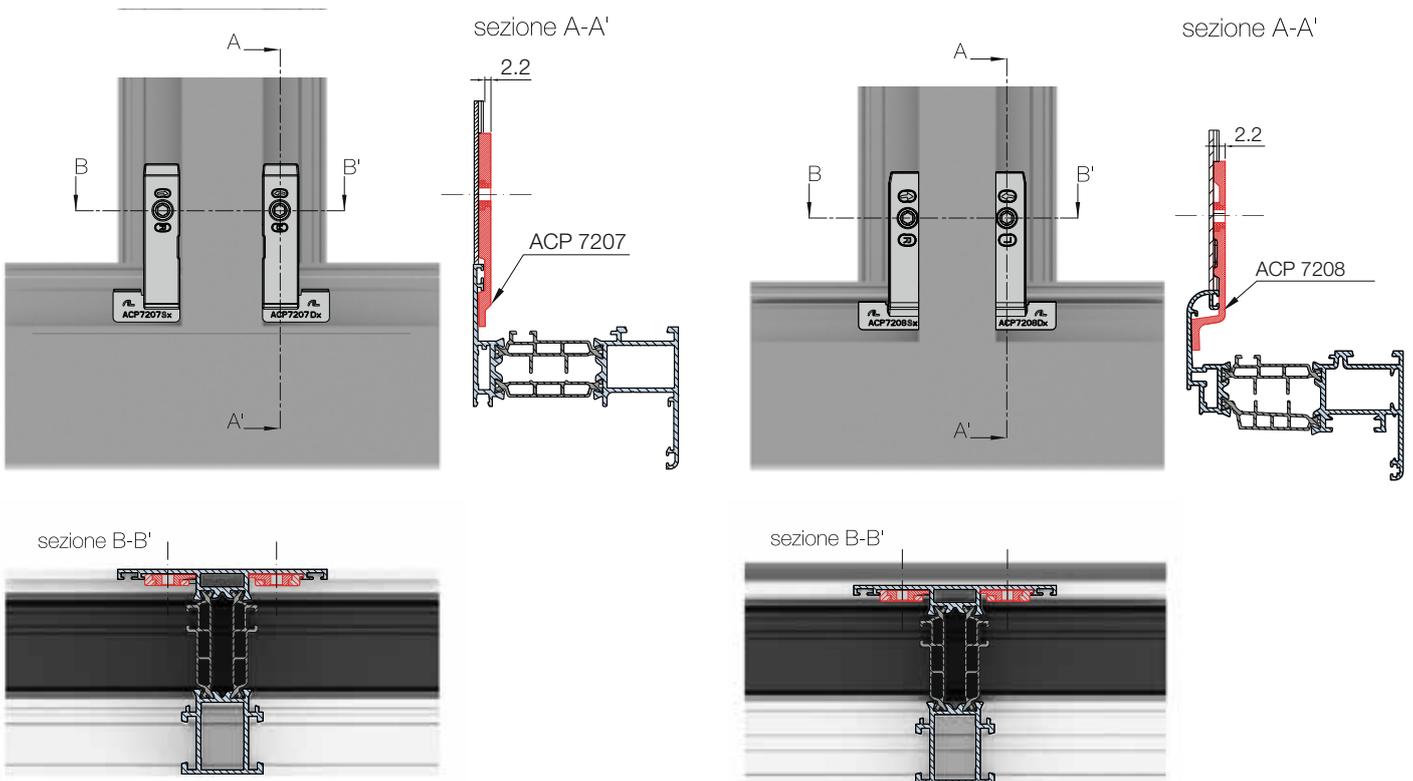

## 42

### Applicazione cavallotti esterni ACP 7207 e ACP 7208

I cavallotti ACP 7207 e ACP 7208 conferiscono alla giunzione tra montante e traverso un perfetto allineamento della scocca esterna nonché un tiraggio notevole, sulle serie di una certa profondità aiutano a mantenere il traverso in posizione ortogonale senza subire rotazione a causa del peso del vetro.

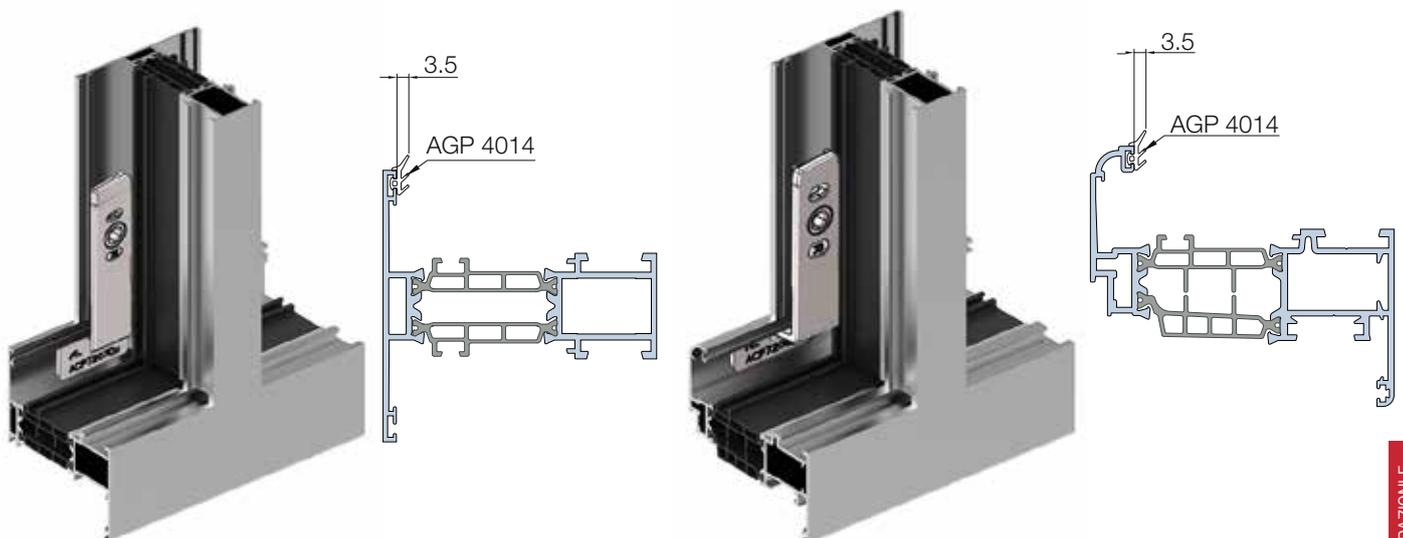

*Applying alignment clamp ACP 7207 and ACP 7208*

*The alignment clamp ACP 7207 and ACP 7208 gives a perfect alignment between transom and mullion and helps to keep the transom in orthogonal position.*

Nell'utilizzo dei cavallotti ACP 7207 e ACP 7208 è obbligatorio adoperare la guarnizione AGP 4014, in quanto permette di posizionare il vetro alla giusta distanza dall'accessorio stesso, evitando ogni rischio di contatto.

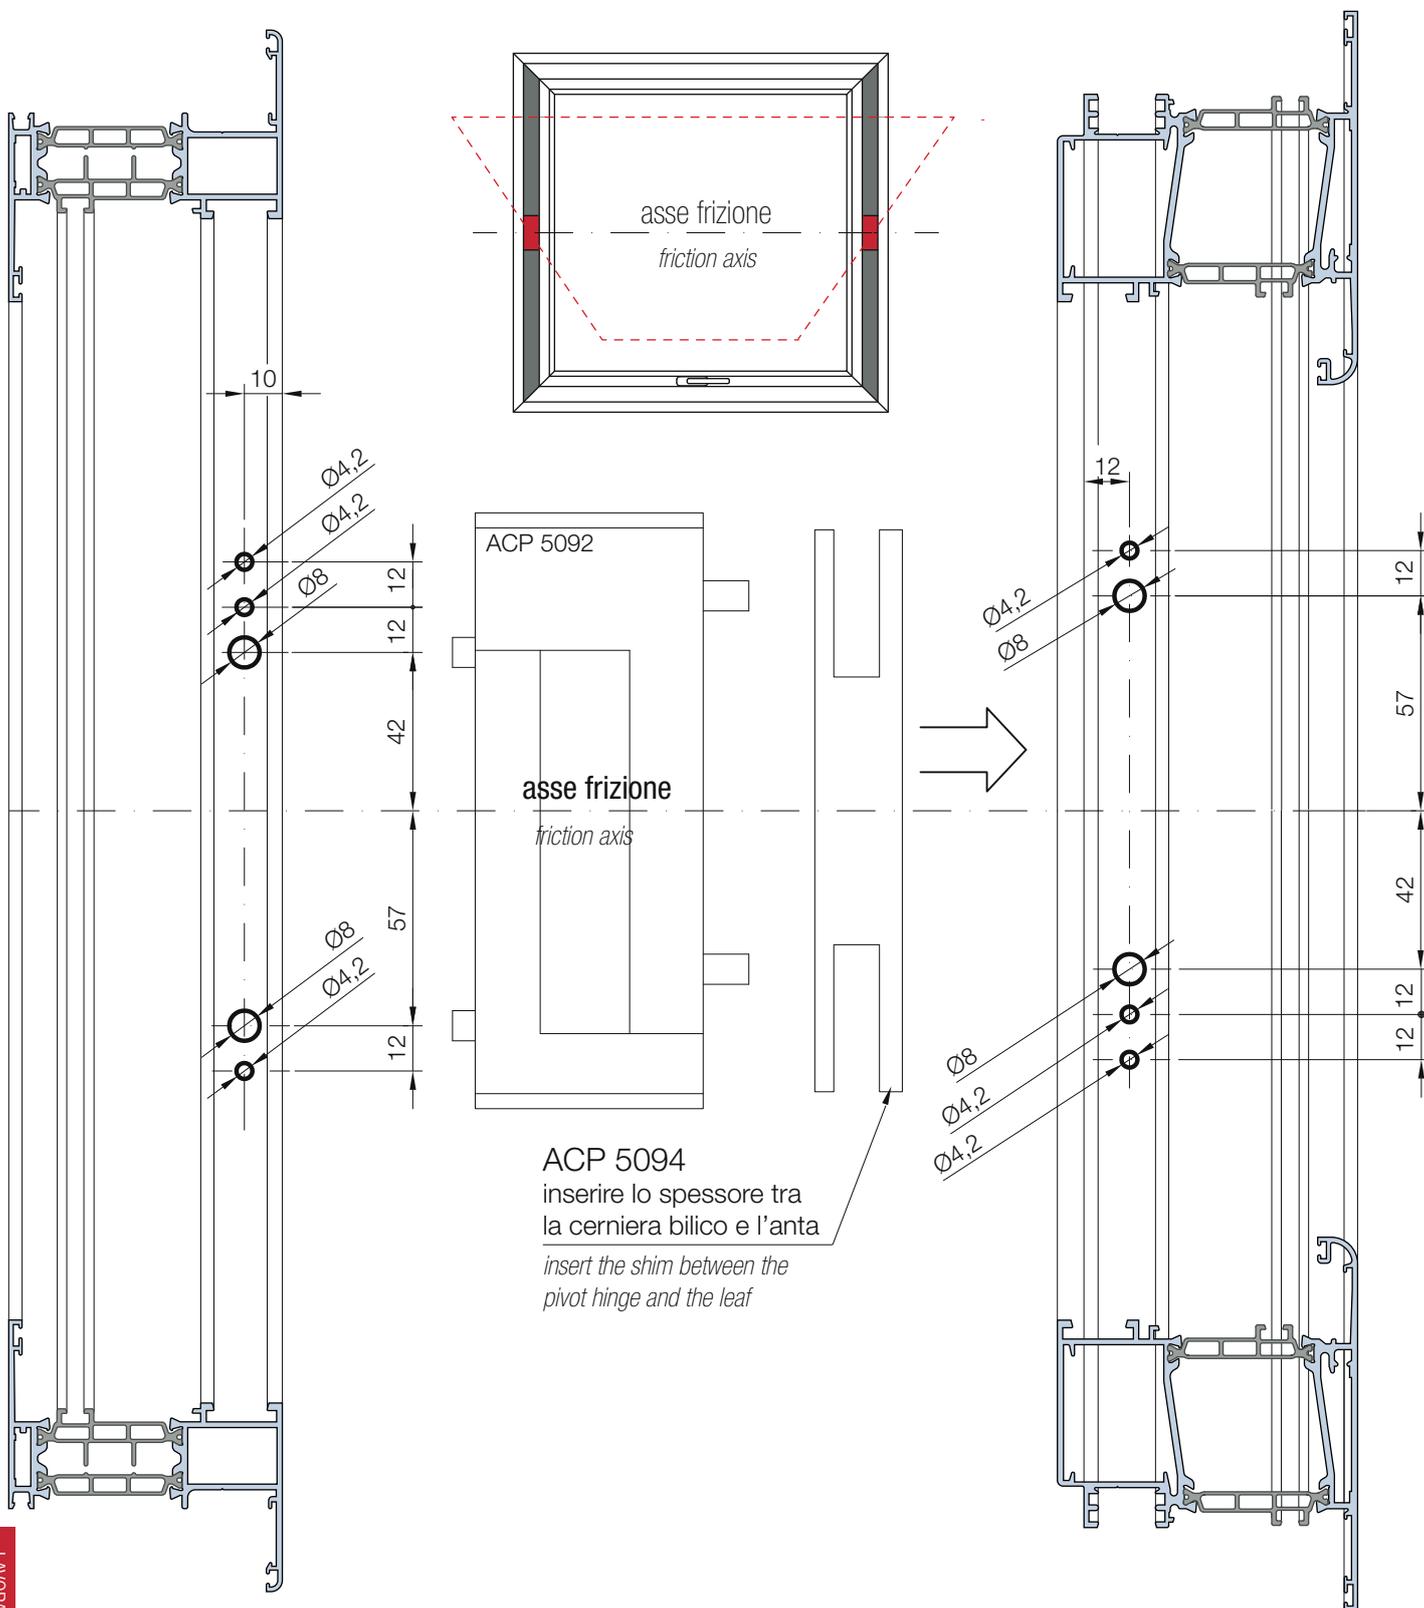

*To use clamps ACP 7207 and ACP 7208 is required use the gasket AGP 4014 that allows you to place the glass at the right distance, avoiding any risk of contact.*

# 43

## Lavorazione telaio e anta bilico orizzontale per applicazione ACP 5092 - portata 175kg

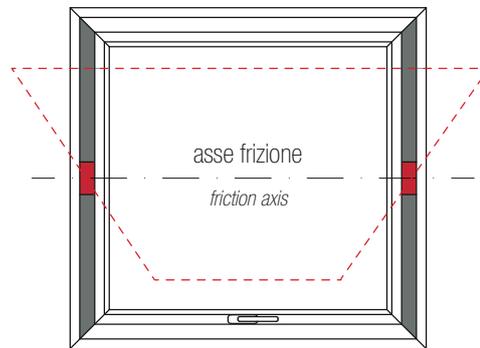

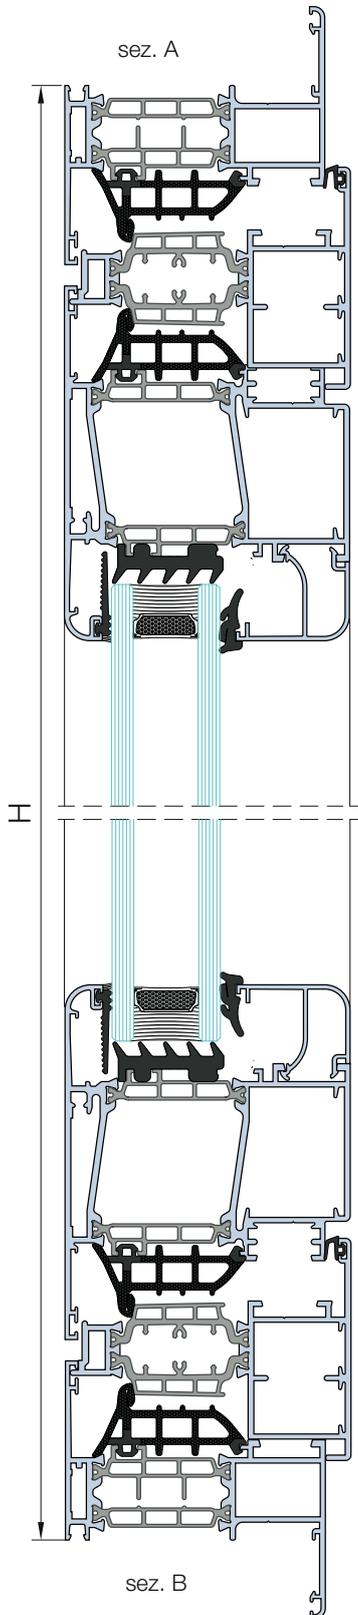

Machining of frame and horizontal pivot leaf to fit hinge ACP 5092 - capacity 175kg

## 44

Lavorazione inversione bilico orizzontale per applicazione cerniera ACP 5092 - portata 175kg

Machining of horizontal pivot reversal to fit hinge ACP 5092 - capacity 175kg

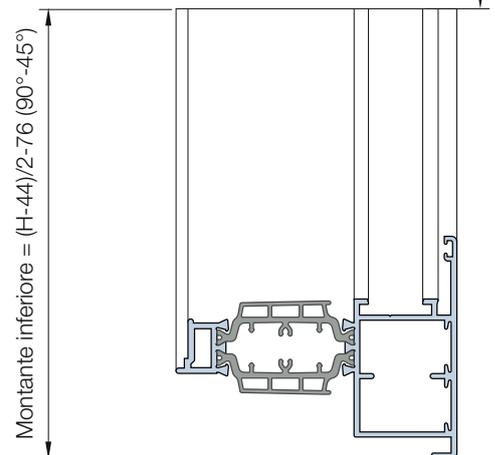

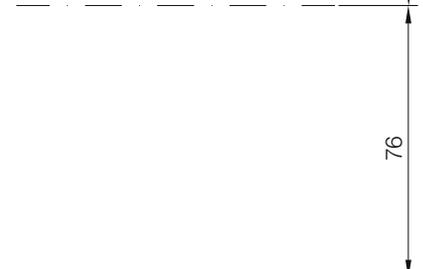

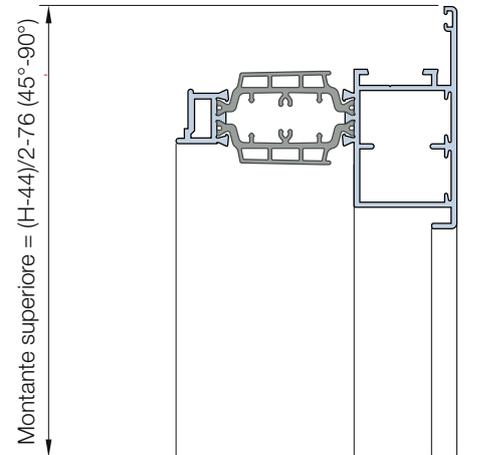

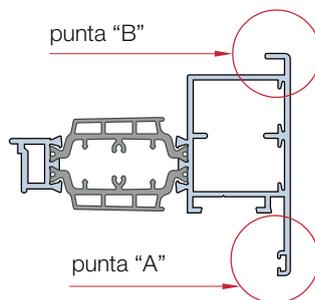

### Inversione bilico Riepilogo tagli:

- traverso inferiore:  
1 pezzo L - 44 (45° - 45°) Punta "B" - Punta "B"
- traverso superiore:  
1 pezzo L - 44 (45° - 45°) Punta "A" - Punta "A"
- montante superiore:  
2 pezzi (H - 44)/2 - 76 (45° - 90°) Punta "A"
- montante inferiore:  
2 pezzi (H - 44)/2 - 76 (45° - 90°) Punta "B"

### Pivot reversal Summary of cuts:

- lower crosspiece:  
1 piece L - 44 (45° - 45°) Point "B" - Point "B"
- upper crosspiece:  
1 piece L - 44 (45° - 45°) Point "A" - Point "A"
- upper jamb:  
2 pieces (H - 44)/2 - 76 (45° - 90°) Point "A"
- lower jamb:  
2 pieces (H - 44)/2 - 76 (45° - 90°) Point "B"

Dopo aver effettuato il taglio dell'inversione TT7120, utilizzare i tappi plastici di compenso ACP 50119 inserendoli nella frizione ACP 5092.

After cutting TT 7120, use plastic plugs ACP 50119

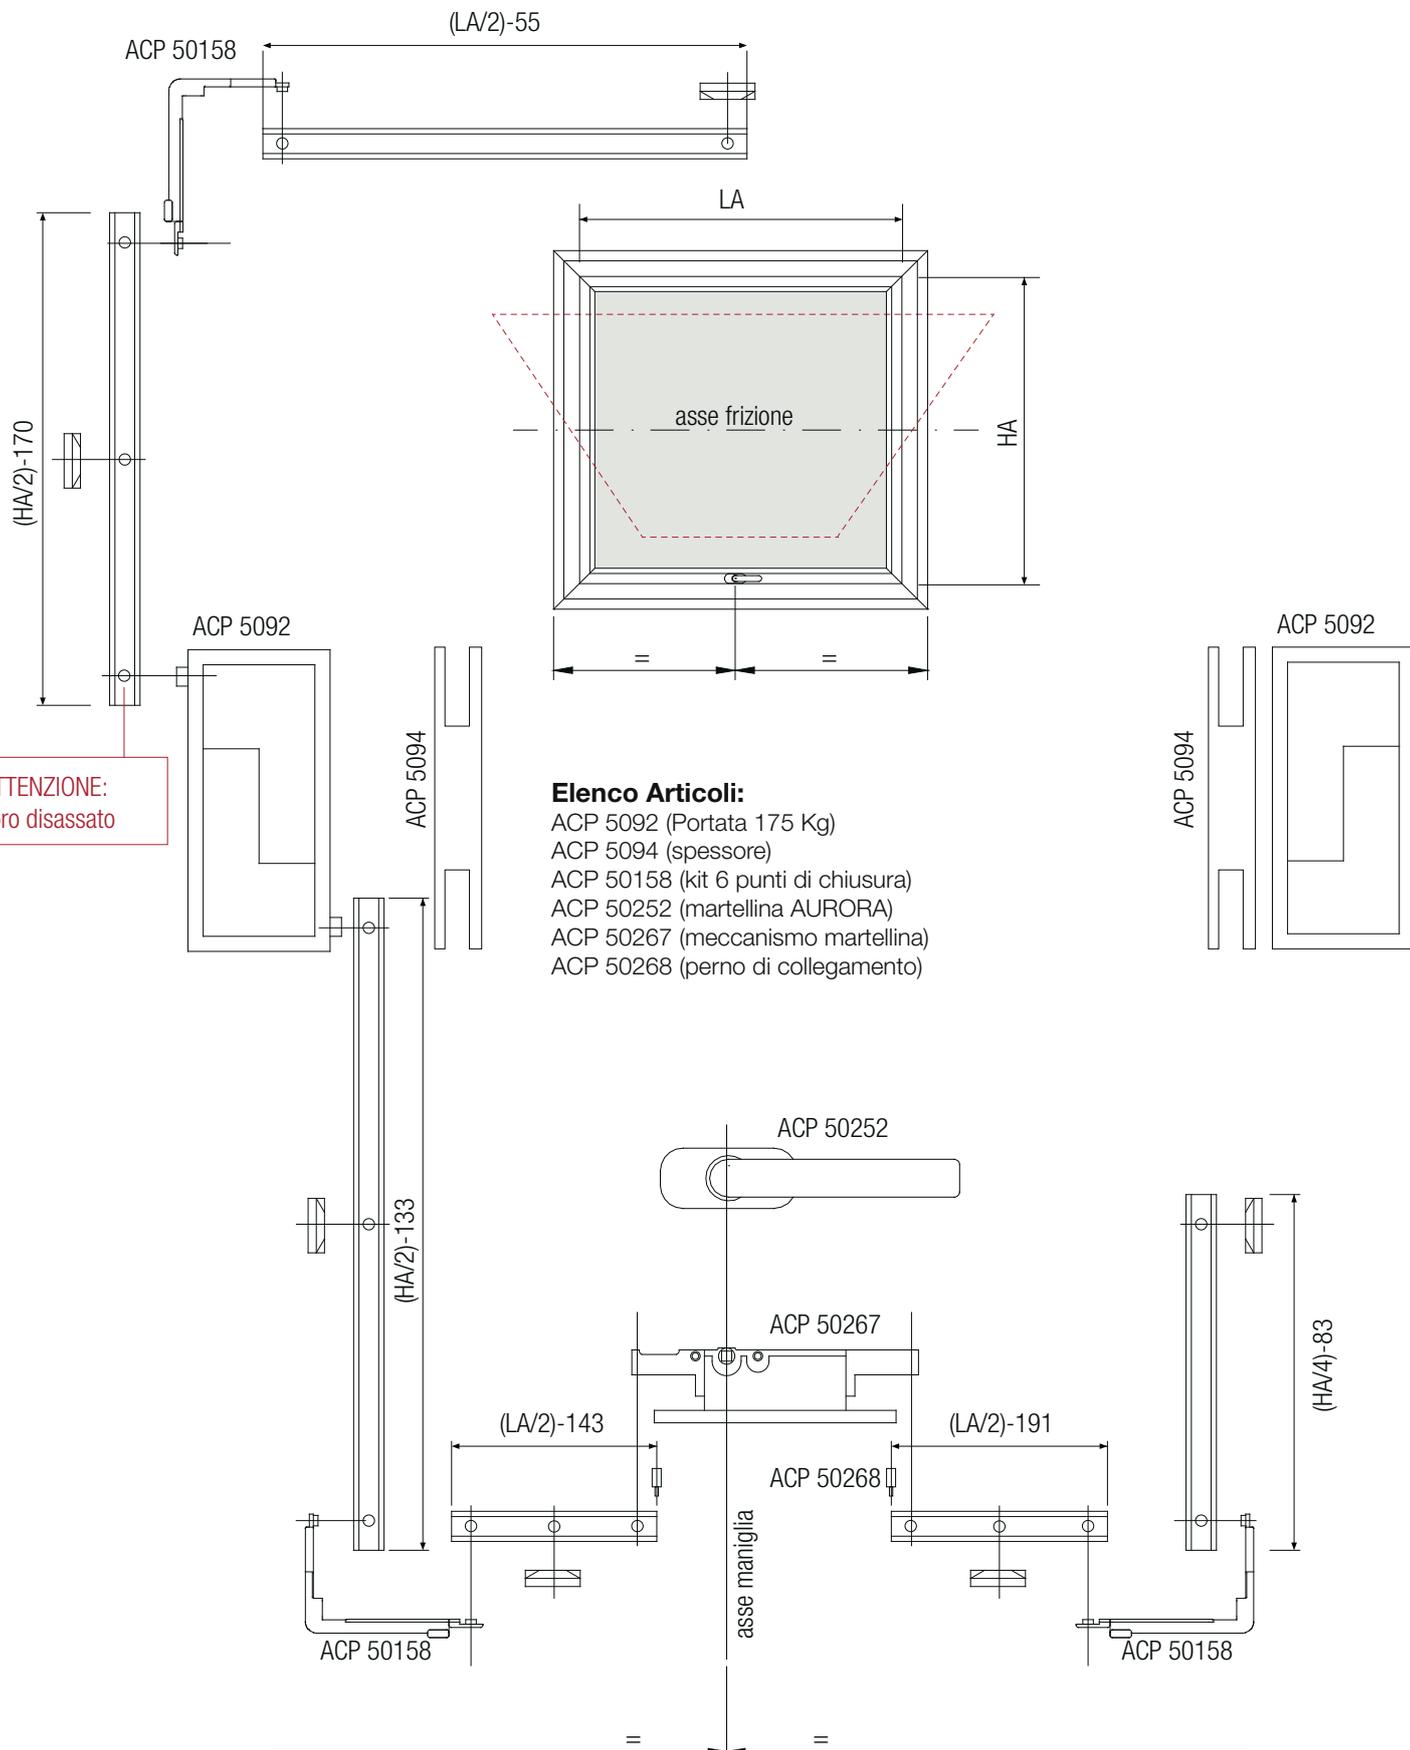

L'utilizzo dei tappi evita l'intestatura del profilo "inversione di battuta bilico", velocizzando il processo di realizzazione dell'infisso.

The use of plugs prevents the fabricator the butting profile "pivot window rabbet adapter", wich speeds up the implementation process of the frame.

## 45

## Lavorazione taglio asta per applicazione kit ACP 50158, bilico orizzontale

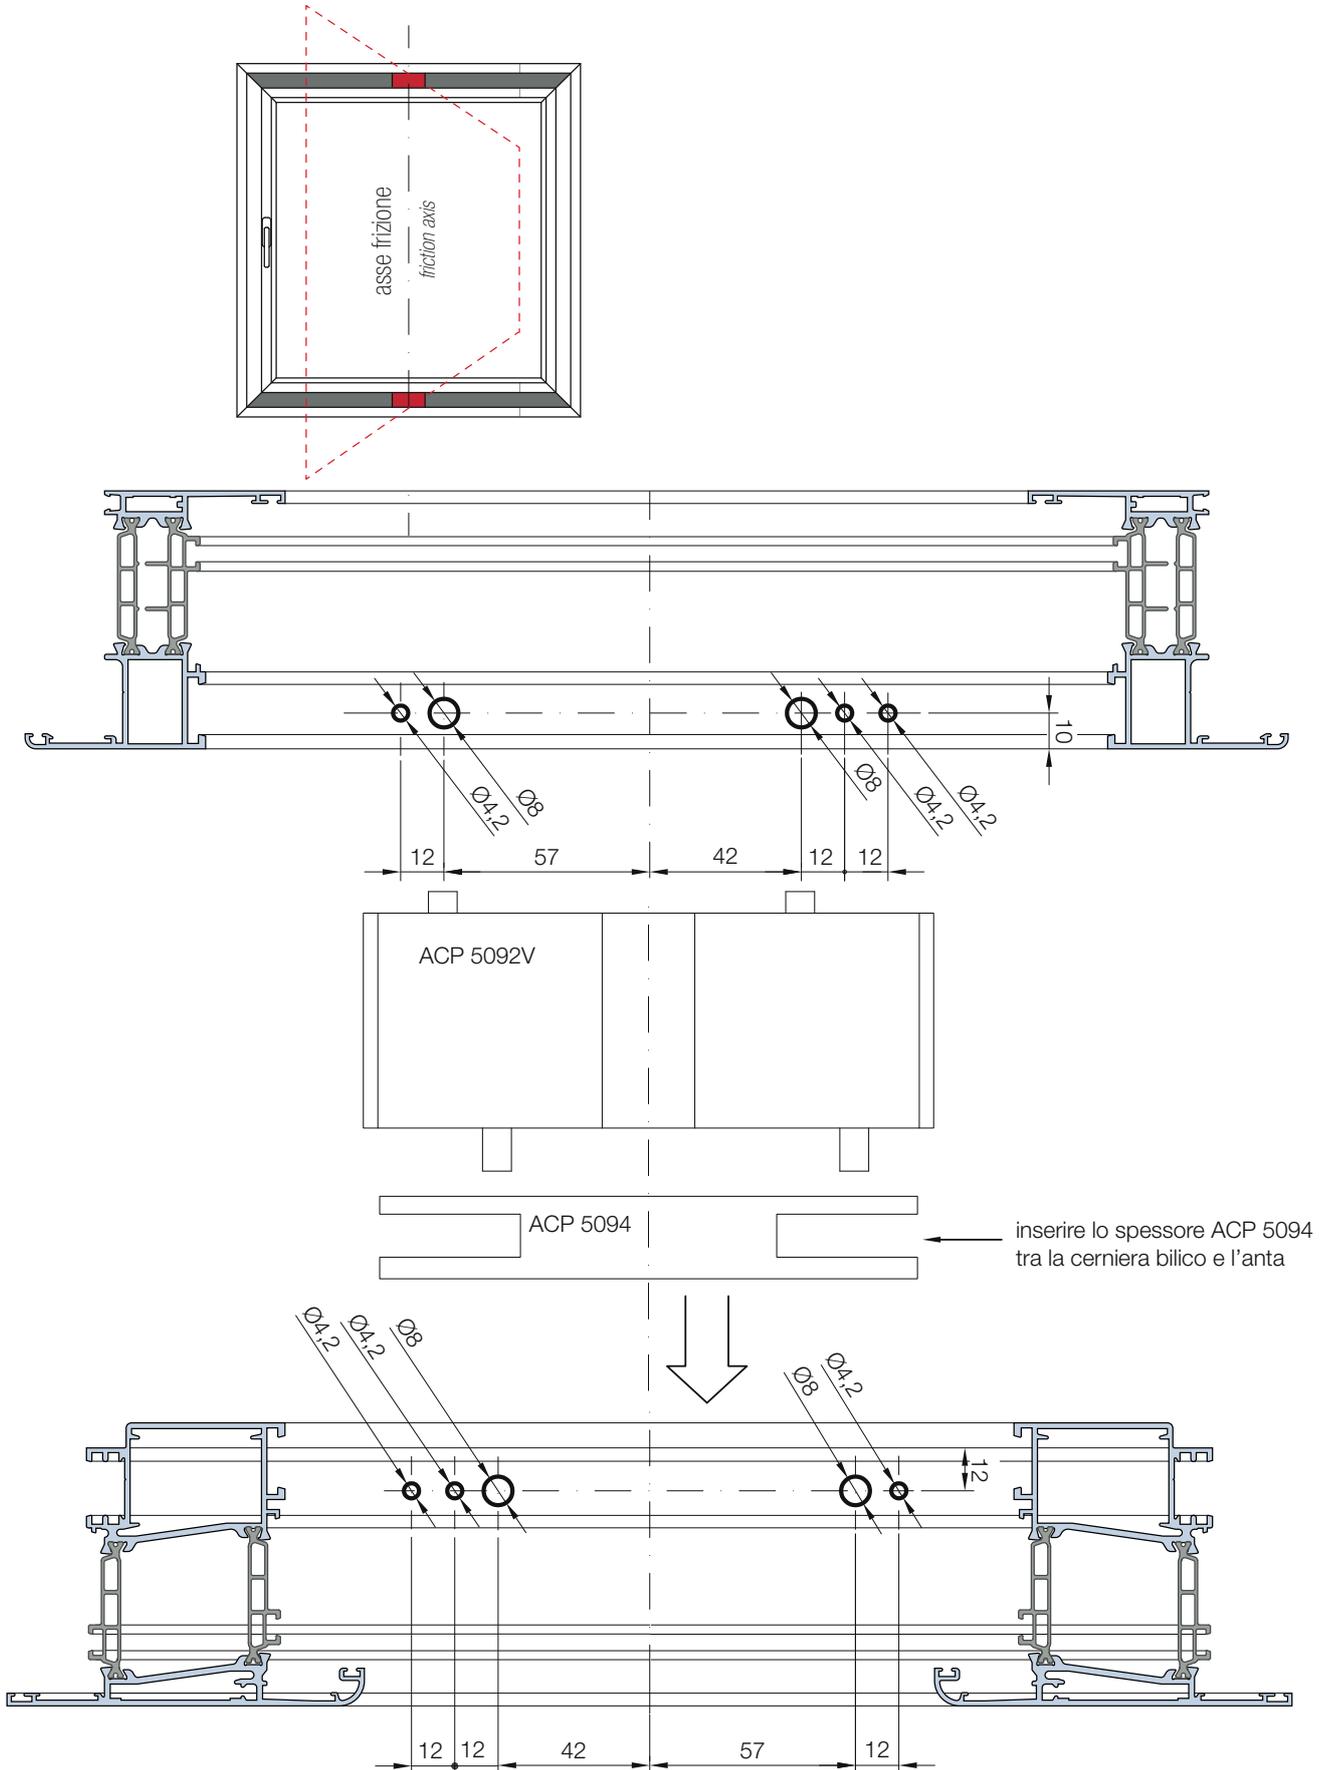

Working application ACP 50158, horizontal pivot window

## 46

### Lavorazione telaio e anti bilico verticale per applicazione cerniera ACP 5092V - portata 175kg

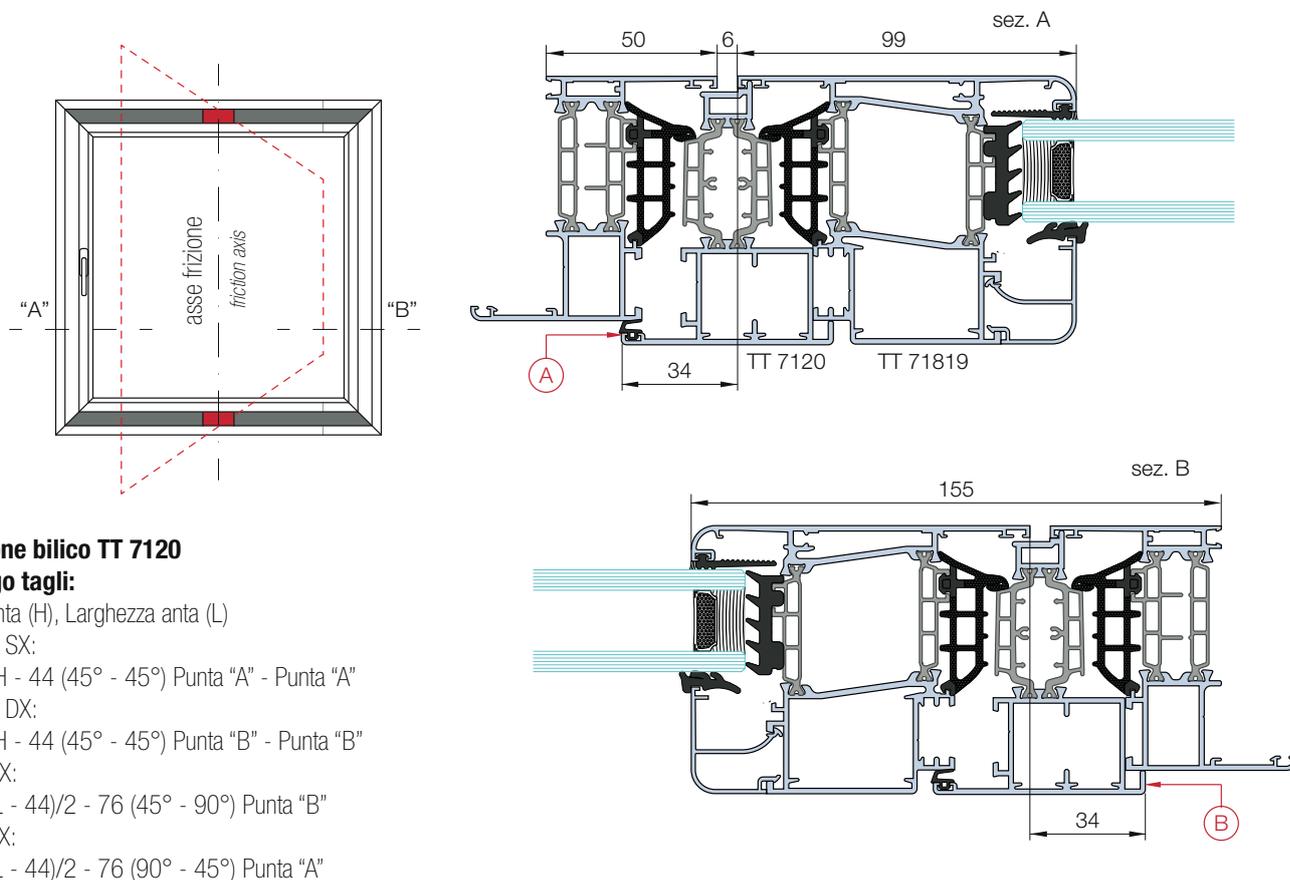

Machining of frame and vertical pivot leaf to fit hinge ACP 5092V - capacity 175kg

47

Lavorazione inversione bilico verticale per applicazione cerniera ACP 5092 - portata 175kg

Machining of vertical pivot reversal to fit hinge ACP 5092 - capacity 175kg

**Inversione bilico TT 7120****Riepilogo tagli:**

Altezza anta (H), Larghezza anta (L)

montante SX:

1 pezzo H - 44 (45° - 45°) Punta "A" - Punta "A"

montante DX:

1 pezzo H - 44 (45° - 45°) Punta "B" - Punta "B"

traversi DX:

2 pezzi (L - 44)/2 - 76 (45° - 90°) Punta "B"

traversi SX:

2 pezzi (L - 44)/2 - 76 (90° - 45°) Punta "A"

**Pivot reversal TT 7120****Summary of cuts:**

High leaf (H), Weight leaf (L)

left mullion:

1 piece H - 44 (45° - 45°) Point "A" - Point "A"

right mullion:

1 piece H - 44 (45° - 45°) Point "B" - Point "B"

right transom:

2 pieces (L - 44)/2 - 76 (45° - 90°) Point "B"

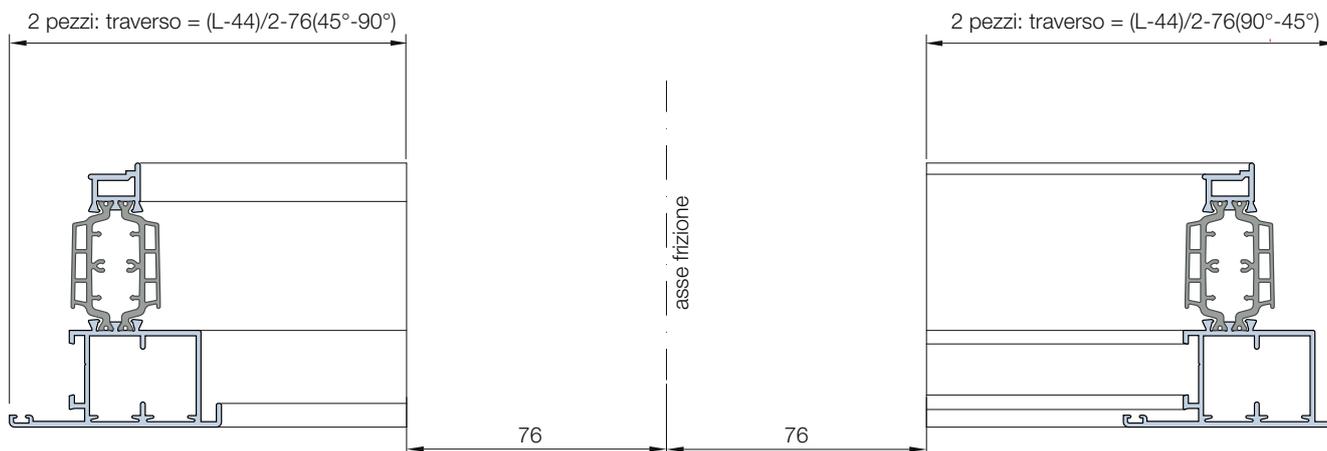

left transom:

2 pieces (L - 44)/2 - 76 (90° - 45°) Point "A"

Dopo aver effettuato il taglio dell'inversione TT 7120, utilizzare i tappi plastici di compenso ACP 50119 inserendoli nella frizione ACP 5092.

After cutting TT 7120, use plastic plugs ACP 50119

## MATIC 72 *plus*

## Traccia per capitolato

Infissi in alluminio realizzati con la serie taglio termico Matic 72 PLUS con sistema di tenuta a giunto aperto con pinna centrale di forma tubolare e materiale coestruso, espanso/compatto. I profilati sono estrusi in lega di alluminio 6060 (EN 573.3), stato di fornitura T5 e T6 conformi alla norma EN 755.2 con tolleranze dimensionali e spessori conformi alla norma UNI12020-2 : 2001. Lega secondo formula ALSistem. L'isolamento termico sarà costituito da barrette esclusivamente tubolari a tripla camera da 38mm in poliammide 6.6 rinforzato al 25% con fibre di vetro, l'assemblaggio delle barrette avverrà a mezzo di rullatura meccanica computerizzata, e le caratteristiche meccaniche delle barrette dovranno rimanere inalterate sino ad una temperatura massima di trattamento di 245°C.

Il processo di produzione è controllato secondo le norme UAETC, i valori di scorrimento dovranno essere superiori ai 24 daN/mm. Il telaio fisso avrà profondità 72mm mentre le parti apribili avranno una profondità di 80mm. Il sistema di tenuta sarà a giunto aperto con guarnizione centrale, in EPDM, avente un'aletta di tenuta che sormonta di 4,5mm il piano inclinato della parte apribile, la guarnizione centrale dovrà essere raccordata nei giunti con gli opportuni angoli vulcanizzati. I profili avranno linee dritte o arrotondate internamente ed esternamente con la possibilità di accogliere soluzioni di fermavetri con taglio a 45° oppure 90°; nel caso di taglio a 90° con fermavetri arrotondati si potranno utilizzare gli appositi angoli di raccordo in alluminio pressofuso. La sigillatura dei vetri dovrà avvenire secondo le indicazioni riportate nel catalogo e solo ed esclusivamente con guarnizioni fermavetro originali. Appositi fori di drenaggio dovranno essere previsti sul telaio fisso e su quello mobile al fine di permettere il corretto drenaggio del serramento. La scelta dei profili sarà in funzione delle caratteristiche geometriche e dimensionali dell'infisso, della portata degli accessori e dei carichi di esercizio. Gli accessori utilizzati nella fabbricazione delle diverse tipologie dovranno essere solo ed esclusivamente quelli originali studiati appositamente per il sistema, riportati a catalogo e distribuiti dai licenziatari ALSistem, l'utilizzo di prodotti diversi da quelli indicati oppure il montaggio parziale o scorretto degli stessi comporterà la nullità dei certificati di prova e garanzia. La fabbricazione e la posa dovranno avvenire secondo i criteri di lavoro indicati da ALSistem. L'assemblaggio dei profili avverrà con squadrette in alluminio pressofuso multifunzione, i tagli dovranno essere protetti a mezzo sigillanti neutri.

La protezione e finitura dei profilati avverrà a mezzo dei normali trattamenti di superficie, ossidazione anodica conforme al marchio di qualità "Qualanod" oppure a mezzo di verniciatura con polveri poliesteri termoindurenti e polimerizzate in forno a temperature comprese tra 185°C e 195°C, in conformità del marchio di qualità "Qualicoat". La posa dovrà avvenire secondo i criteri disciplinati nel protocollo Thermoposa.

## Materiali

L'esecuzione dei serramenti è in lega d'alluminio EN AW 6060 sotto forma di profilati estrusi come indicato dalla disposizione normativa EN 755.3. Lo stato di fornitura è in classe T5 e T6 secondo norma EN 755.2. Le tolleranze dimensionali sono conformi alla UNI 12020-2 : 2001. Lega secondo la formula ALSistem.

## Caratteristiche tecniche e dimensionali

Aspetto visivo esterno: complanare

Aspetto visivo interno: sormonto di 8mm

Profilati: estrusi in lega leggera 6060 (UNI35690TA) anodizzabili e verniciabili. Lega secondo la formula ALSistem.

Sistema di tenuta: giunto aperto con precamera, con guarnizioni in EPDM

Sistema di isolamento termico: realizzato con distanziali in poliammide da 28mm a forma bitubolare

Sistema di accessori: originali ALSistem

Distanza telaio anta: 12mm

Sovrapposizione battuta anta su telaio: 6mm

Altezza battuta vetro: 22mm

Fuga tra i profili: 5mm

Profondità telaio: 72mm

Profondità anta: 80mm

Tubolarità profili finestra: 15mm

Tubolarità profili porta: 36.4mm

Fissaggio vetri: con fermavetri lisci, tubolari, raggiati, smussati o modanati

Spazio vetro o pannello nei telai fissi: da 27mm a 65mm

Spazio vetro o pannello nelle ante: da 27mm a 73mm

## Certificazioni serie Matic 72 Plus

Per il principio di estendibilità i certificati sotto riportati sono validi per la serie Planet 72 Plus per le diverse tipologie di serramenti indicati in tabella.

## General specifications

Aluminum frames created with thermal break Matic 72 Plus doors and windows with central. The profiles are extruded in aluminium alloy EN AW 6060 (EN 573.3), supply condition T5 and T6 in accordance with standard EN 755.2 with dimensional tolerances and thicknesses compliant with standard UNI EN 755-9 and UNI12020-2 : 2001. Alloy according to ALSistem formula. The thermal insulation will consist of 38mm polyamide 6.6 reinforced 25% with fibreglass; the strips are assembled by means of computerised mechanical rolling, and the mechanical characteristics of the strips must remain unaltered up to a maximum treatment temperature of 245°C. The production process is controlled in accordance with UAETC standards, the sliding values must be greater than 24 daN/mm. The fixed frame shall be 72mm deep, whilst the openable parts shall be 80mm deep. The sealing system shall be of the open joint type with a central EPDM gasket with a seal fin on the sloping surface of the profile on the moving part of the window; the central gasket must be connected at the corners with the appropriate vulcanised corners. The profiles have been designed with streight of rounded lines internally and externally with the possibility of accommodating glazing bead solutions cut at 45° or 90°; where cut at 90° with rounded glazing beads, the appropriate connecting corners in die-cast aluminium can be used. The glazing must be sealed in accordance with the instructions shown in the catalogue and exclusively with original glazing bead gaskets. Appropriate drainage holes must be made on the fixed frame and on the moving frame in order to allow the correct drainage for the window/door. The limits of use of the profiles depend on their geometric characteristics, on the scope of the accessories and on the operating loads. The accessories used in the manufacture of the various types must be exclusively the originals designed especially for the system, as shown in the catalogue and distributed by the ALSistem licensees; the use of products other than those indicated or their partial or incorrect assembly shall render the test certificates and guarantee null and void. The manufacture and installation must be in accordance with the operating criteria indicated by ALSistem. The profiles shall be assembled with brackets in extruded or die-cast aluminium to be buttoned, pinned, crimped or screwed, the edges must be protected with acrylic, silicone or MS polymer sealants. The profiles must be protected and finished by means of normal surface treatments, anodic oxidation compliant with the "Qualanod" quality label or by painting with thermosetting polyester in powder form and oven-polymerised at temperatures between 185°C and 195°C, in accordance with the "Qualicoat" quality label.

## Materials

The doors and windows are made from aluminium alloy EN AW 6060 extruded profiles as indicated in standard EN 755.3. The supply condition is within class T5 and T6 in accordance with standard EN 755.2. Dimensional tolerances comply with UNI 12020-2 : 2001. Alloy according to ALSistem formula.

## Technical and dimensional characteristics

External visual appearance: flush

Internal visual appearance: flush or overlapping 8mm

Profiles: light alloy 6060 (UNI35690TA) extrusions; they can be anodised and painted. Alloy according to ALSistem formula.

Sealing system: open joint with pre-chamber or double rebate, with EPDM gaskets

Thermal insulation system: made using 38mm polyamide tubular spacers

Accessory system: ALSistem original

Distance between frame and leaf: 12mm

Superimposition of leaf rebate on frame: 6mm

Height of glass rebate: 22mm

Space between the profiles: 5mm

Frame depth: 72mm

Leaf depth: 80mm

Tubularity of window profiles: 15mm

Tubularity of door profiles: 36.4mm

Glass fastening: with smooth or radial glazing beads

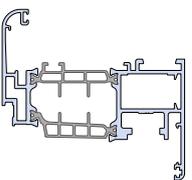

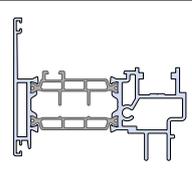

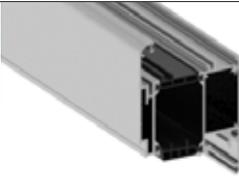

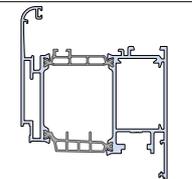

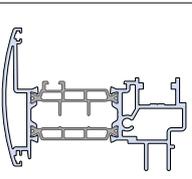

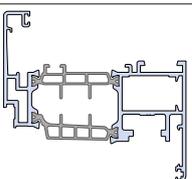

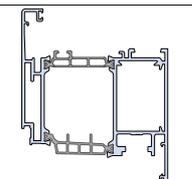

Space for glass or panel in fixed frames: from 27mm to 65mm

Space for glass or panel in leaves: from 27mm to 73mm

## Matic 72 Plus range certifications

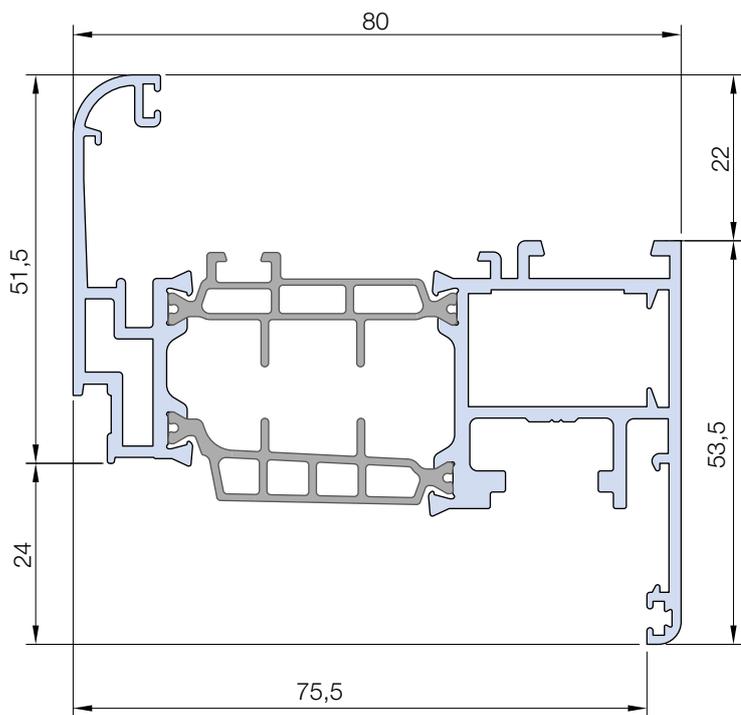

The Matic 72 Plus system has been subjected to the tests shown in the table for the different types of door and window.

## Montaggio tappo riporto centrale ACP 72180

*Application of the central cap ACP 72180*

ACP 72180

1

Prima di montare il tappo di riporto centrale occorre sigillare le zone evidenziate nel disegno

*Before installing astragal cap, seal area shown on drawing*

2

Avvitare con vite TC-CEA 4,8  
*After the cap, place the central fin, gluing the contact area*

3

Dopo aver inserito il tappo accostare la guarnizione centrale, incollando la zona di contatto, come evidenziato in figura

*After fitting the cap, place the central fin, gluing the contact area*

ACP 72180

## PLANET **72 Hi** *plus*

## Traccia per capitolato

Infissi in alluminio realizzati con la serie taglio termico Planet 72 Hi, con anta a scomparsa, con sistema di tenuta a giunto aperto con guarnizione centrale di forma tubolare e materiale coestruso, espanso/compatto. I profilati sono estrusi in lega di alluminio 6060 (EN 573.3), stato di fornitura T5 e T6 conformi alla norma EN 755.2 con tolleranze dimensionali e spessori conformi alla norma UNI12020-2 : 2001. L'isolamento termico sarà costituito da barrette esclusivamente tubolari a doppia camera da 38 mm in poliammide 6.6 rinforzato al 25% con fibre di vetro, l'assemblaggio delle barrette avverrà a mezzo di rullatura meccanica computerizzata, e le caratteristiche meccaniche delle barrette dovranno rimanere inalterate sino ad una temperatura massima di trattamento di 245°C. Il processo di produzione è controllato secondo le norme UAETC, i valori di scorrimento dovranno essere superiori ai 24 daN/mm. Il telaio fisso avrà profondità 77mm mentre le parti apribili avranno una profondità di 80.5mm. La parte apribile dovrà celarsi dietro l'aletta del telaio che dovrà completamente coprirla in vista esterna. Il sistema di tenuta sarà a giunto aperto con guarnizione centrale, in EPDM, avente un'aletta di tenuta che sormonta di 4,5mm il piano inclinato della parte apribile, la guarnizione centrale dovrà essere raccordata nei giunti con gli opportuni angoli vulcanizzati. I profili avranno linee dritte o arrotondate. La sigillatura dei vetri dovrà avvenire secondo le indicazioni riportate nel catalogo e solo ed esclusivamente con guarnizioni fermavetro originali. Appositi fori di drenaggio dovranno essere previsti sul telaio fisso e su quello mobile al fine di permettere il corretto drenaggio del serramento. La scelta dei profili sarà in funzione delle caratteristiche geometriche e dimensionali dell'infisso, della portata degli accessori e dei carichi di esercizio. Gli accessori utilizzati nella fabbricazione delle diverse tipologie dovranno essere solo ed esclusivamente quelli originali studiati appositamente per il sistema, riportati a catalogo e distribuiti dai licenziatari ALSistem, l'utilizzo di prodotti diversi da quelli indicati oppure il montaggio parziale o scorretto degli stessi comporterà la nullità dei certificati di prova e garanzia. La fabbricazione e la posa dovranno avvenire secondo i criteri di lavoro indicati da ALSistem. L'assemblaggio dei profili avverrà con squadrette in alluminio pressofuso multifunzione, i tagli dovranno essere protetti a mezzo sigillanti neutri.

La protezione e finitura dei profilati avverrà a mezzo dei normali trattamenti di superficie, ossidazione anodica conforme al marchio di qualità "Qualanod" oppure a mezzo di verniciatura con polveri poliesteri termoindurenti e polimerizzate in forno a temperature comprese tra 185°C e 195°C, in conformità del marchio di qualità "Qualicoat".

## Materiali

L'esecuzione dei serramenti è in lega d'alluminio EN AW 6060 sotto forma di profilati estrusi come indicato dalla disposizione normativa EN 755.3. Lo stato di fornitura è in classe T5 e T6 secondo norma EN 755.2. Le tolleranze dimensionali sono conformi alla UNI 12020-2 : 2001. Lega secondo la formula ALSistem.

## Caratteristiche tecniche e dimensionali

Aspetto visivo esterno: anta a scomparsa

Aspetto visivo interno: sormonto di 8mm

Profilati: estrusi in lega leggera 6060 (UNI35690TA) anodizzabili e verniciabili. Lega secondo la formula ALSistem.

Sistema di tenuta: giunto aperto con precamera, con guarnizioni in EPDM

Sistema di isolamento termico: realizzato con distanziali in poliammide da 38mm a forma tubolare

Sistema di accessori: originali ALSistem

Distanza telaio anta: 12mm

Sovrapposizione battuta anta su telaio: 6mm

Altezza battuta vetro: 22mm

Fuga tra i profili: 5mm

Profondità telaio: 77mm

Profondità anta: 80.5mm

Tubolarità profili finestra: 15mm

Fissaggio vetri: con fermavetro esterno nascosto da guarnizione cingivetro

Spazio vetro o pannello nei telai fissi: da 32mm a 70mm

Spazio vetro o pannello nelle ante: 57mm

## General specifications

Thermal break Aluminium frames Planet 72 Hi for windows with central gasket. The profiles are extruded in aluminium alloy EN AW 6060 (EN 573.3), supply condition T5 and T6 in accordance with standard EN 755.2 with dimensional tolerances and thicknesses compliant with standard UNI EN 755-9 and UNI12020-2 : 2001. The thermal insulation will consist of 38 mm polyamide 6.6 strips reinforced 25% with fibreglass; the strips are assembled by means of computerised mechanical rolling, and the mechanical characteristics of the strips must remain unaltered up to a maximum treatment temperature of 245°C. The production process is controlled in accordance with UAETC standards, the sliding values must be greater than 24 daN/mm. The fixed frame shall be 77mm deep, whilst the openable parts shall be 80,5mm deep the sash shall be hidden behind frame flap from outside view. The sealing system shall be with a central EPDM gasket with 4.5 overlap on the sloping surface of the sash profile; the central gasket must be connected at the corners with the appropriate vulcanised corners. The profiles have been designed with straight or rounded lines internally and externally with the possibility of accommodating glazing bead solutions cut at 45° or 90°; where cut at 90° with rounded glazing beads, the appropriate connecting corners in die-cast aluminium can be used. The glazing must be sealed in accordance with the instructions shown in the catalogue and solely and exclusively with original glazing bead gaskets. Appropriate drainage holes must be provided on the fixed frame and on the moving frame in order to allow the correct drainage for the window/door. The limits of use of the profiles depend on their geometric characteristics, on the scope of the accessories and on the operating loads. The accessories used in the manufacture of the various types must be solely and exclusively the originals designed especially for the system, as shown in the catalogue and distributed by the ALSistem licensees; the use of products other than those indicated or their partial or incorrect assembly shall render the test certificates and guarantee null and void. The manufacture and installation must be in accordance with the operating criteria indicated by ALSistem. The profiles shall be assembled with brackets in extruded or die-cast aluminium to be buttoned, pinned, crimped or screwed, the edges must be protected with neutralsealants. The profiles must be protected and finished by means of normal surface treatments, anodic oxidation compliant with the "Qualanod" quality label or by painting with thermosetting polyester in powder form and oven-polymerised at temperatures between 185°C and 195°C, in accordance with the "Qualicoat" quality label.

## Materials

The doors and windows are made from aluminium alloy EN AW 6060 extruded profiles as indicated in standard EN 755.3. The supply condition is within class T5 and T6 in accordance with standard EN 755.2. Dimensional tolerances comply with UNI 12020-2 : 2001.

## Technical and dimensional characteristics

External visual appearance: hidden leaf

Internal visual appearance: flush or overlapping 8mm

Profiles: light alloy 6060 (UNI35690TA) extrusions; they can be anodised and painted

Sealing system: central gasket pre-chamber, with EPDM

Thermal insulation system: made using 38mm polyamide tubular spacers

Accessory system: ALSistem original

Distance between frame and leaf: 12mm

Superimposition of leaf rebate on frame: 6mm

Height of glass rebate: 22mm

Space between the profiles: 5mm

Frame depth: 77mm

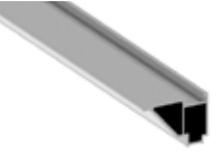

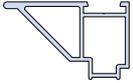

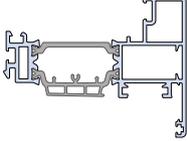

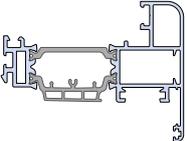

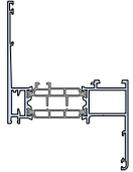

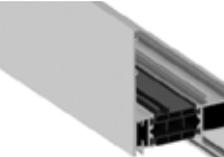

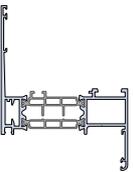

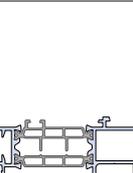

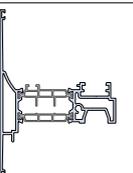

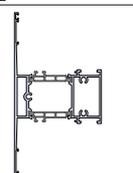

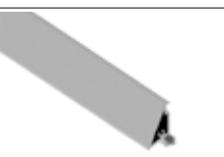

Leaf depth: 80.5mm

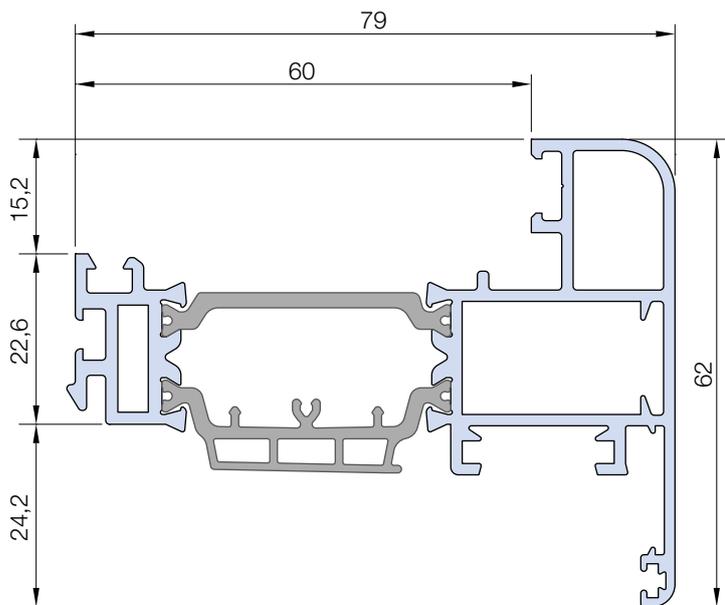

Tubularity of window profiles: 15mm

Glass fastening: external glass beading

Space for glass or panel in fixed frames: from 32mm to 70mm

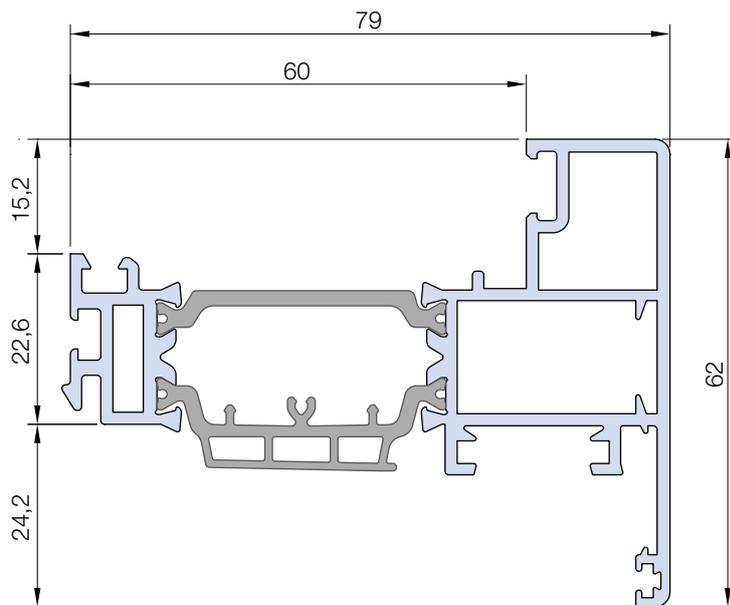

Space for glass or panel in leaves: 57mm

## Montaggio AGP 6236 e AGP 4136

*Application of AGP 6236 and AGP 4136*

Dopo aver inserito il vetro e il fermavetro, inserire i 4 angoli vulcanizzati AGP 6236; in seguito inserire la guarnizione AGP 4136 incollando le zone di giunzione.

*After entering the glass and the glazing bead, insert the 4 corners vulcanized AGP 6236; later insert the gasket AGP 4136 pasting the joint areas.*

## Sistemi scorrevoli e alzanti

### SLIDE **60**

Sistema scorrevole non isolato, essenziale e funzionale. Con zanzariera integrata nel sistema

*Non-insulated system, essential and functional. With built-in screen*

### SLIDE **65**

Sistema scorrevole a taglio termico essenziale e funzionale con zanzariera prevista e integrata al sistema

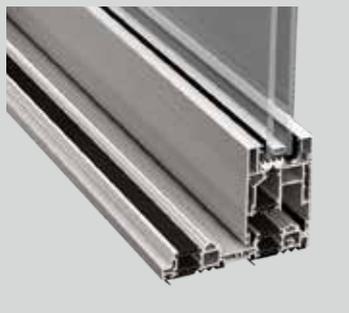

*Thermal break system, essential and functional, with built-in screen*

### SLIDE **80/106**

Sistema scorrevole-alzante a taglio termico rivoluzionario grazie agli eccellenti risultati termici ed acustici

*Revolutionary thermal break system providing excellent thermal and acoustic performance*

### TOP SLIDE **160**

Sistema a taglio termico per serramenti alzanti con portate fino a 400kg, ed eccellenti prestazioni acustiche, termiche e ambientali

*Thermal break system for lift-and-slide windows of up to 400kg providing excellent acoustic, thermal and environmental performance*

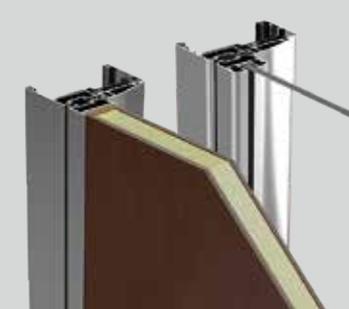

## Sistemi per porte

### PLANET **DOOR 62** **DOOR 72**

Sistema per porte e portoncini di ingresso con ottime prestazioni termo-acustiche. Ideale sia in contesti residenziali sia commerciali

*Top-of-the-range internal doors, sash or sliding, all types, finish and color*

### EASY **DOOR**

Sistema per la costruzione di porte interne di alto design ad ante o porte scorrevoli di ogni tipologia, finitura estetica e colore

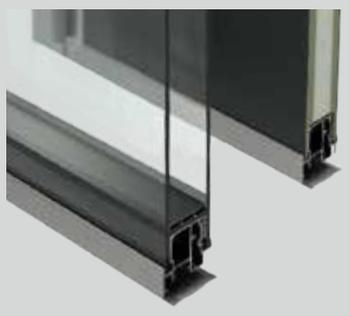

*Top-of-the-range internal doors, sash or sliding, all types, finish and color*

### PLANET **53**

Sistema termicamente non isolato per porte complanari

*Flush door system*

### ELITE DOOR **72**

Sistema a taglio termico concepito per porte solide ed eleganti. Marcata CE con soglia calpestabile e maniglione antipánico per le vie di fuga

*Thermal break system designed for robust elegant doors. EC markings with threadable threshold and anti-panic handle for emergency exit*

## Sistemi per facciate

### SIRIO **50**

Sistema per facciate continue montanti e traversi

*Stick-built curtain wall systems*

### SIRIO **50 SG**

Sistema per facciate continue montanti e traversi con vetro strutturale

*Structural curtain wall with transom/mullion*

### SIRIO **50N**

Sistema per facciate continue a nastro

*Ribbon windows system*
